MICHIGAN.

Table 1 shows the manufacturing and mechanical industries of the state of Michigan as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860

[1] Decrease.
[2] Includes proprietors and firm members with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] From assessed valuation made by the Boards of Supervisors, June sessions, 1901.
[6] Does not include value of rented property.

Table 1 shows that there has been a large growth in the manufacturing and mechanical industries of Michigan during the half century. The population during these years increased from 397,654 to 2,420,982, while the average number of wage-earners employed in manufacturing establishments increased from 9,344 to 162,355, embracing, in 1900, 6.7 per cent of the entire population, compared with 2.3 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 232,353, or 9.6 per cent of the total population of the state.

The greatest percentage of increase in the value of products, 262.5 per cent, is shown for the decade ending with 1870, but the greatest absolute increase, $127,181,681, was between the years 1880 and 1890. The much smaller absolute increase during the decade from 1890 to 1900, $79,047,376, is due to the decrease in the manufacture of lumber and timber products, by far the most important industry in the state. In 1890, at the close of the decade during which lumbering was at its height, the percentage of wage-earners to total population was 7.1, which is greater than at any other census year included in the half century.

The decrease between 1880 and 1890 in the number of children employed under 16 years of age was 39.5 per cent; during the decade ending with 1900 it was two-tenths of 1.0 per cent. This is attributed to the factory act of 1889, with its later amendments, and to the compulsory school law of 1895.[1] No child under 14 can be employed in any manufacturing establishment. A register containing a sworn statement of the name, age, birthplace, and residence of all employees under 16 must be kept by the employer, to be open to official inspection. The number of women employed over 16 years of age has increased rapidly during the last two decades, a natural result of the increase in the number of industries in which women are employed.

The large increase in the manufacturing industries of Michigan is due to a steady improvement in the means of communication within the state and with the states adjoining; to the growing markets afforded by the rapidly settling West; and to the state's extraordinary forest resources. It is to the Erie Canal that the first rapid advance of Michigan can be attributed;[2] a close relation

[1] Report of the Michigan Bureau of Labor Statistics, 1898, Appendix, pages 2 and 3.
[2] History of Michigan, by J. H. Lanman, page 233.

may be traced between the development of transportation and of manufactures in the state. Before 1812 there were no roads worthy of the name. Between 1815 and 1817 a few short military roads were constructed along the Erie shore; after 1825 territorial roads were built by Congress to Saginaw, Fort Gratiot, Sandusky, Miami, and Chicago; and by 1845 the road now known as the Grand River road had become the great highway of the state.[1] These roads, and others constructed under the general plank road act of 1848, had their greatest effect upon manufacturing through the stimulus they gave to the lumber industry. During the first half of the century Michigan was dependent upon Lake Erie for its communication with the East. The greater part of the goods which found their way into western Michigan went around by the lakes, and were poled or rafted up the Grand, Kalamazoo, and St. Joseph rivers, and even up their tributaries.[2] After the completion, in the fifth and sixth decades, of the Lake Shore, Michigan Central, and Great Western railroads, the latter giving through connection with the eastern seaboard, this primitive method of transportation disappeared and a marked development in business was at once apparent.

[1] History of Detroit and Michigan, by Silas Farmer, page 925.
[2] Michigan Pioneer and Historical Collections, Vol. III, page 283.

The industrial development of the state has been marked by a steady diversification of its manufactures. There has been a moderate localization of manufacturing in the southern half of the Lower Peninsula, due to the special facilities for transportation in this section, to the offering of bonuses on the part of municipalities, and to certain natural advantages, such as good waterpower and soil specially adapted to the growing of raw material like the sugar beet.

The most serious handicap to manufacturing in Michigan is the insufficient supply of coal. There are extensive coal deposits in the central part of the Lower Peninsula, but they are of an inferior quality, and manufacturers at times find it difficult to secure a supply adequate to their demands. The local production of coal, however, has increased steadily since 1896.[3] The product for 1899 was 624,708 short tons.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for educational, eleemosynary, and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	20,222	$285,845,087	22,354	163,836	$66,536,992	$25,574,235	$199,906,716	$48,707,099	$142,698,419	$8,501,198	$358,022,727
Hand trades[1]	6,779	8,231,512	7,661	15,591	7,005,853	1,776,193	11,159,812	182,211	10,720,233	306,868	26,661,198
Educational, eleemosynary, and penal institutions	8	517,594	--------	28	8,054	4,823	86,883	500	77,915	8,468	220,348
Establishments with a product of less than $500	3,407	1,230,360	3,674	1,453	61,071	73,989	259,928	24,282	235,646	----------	858,802
All other establishments	10,028	275,865,621	11,019	146,764	59,462,014	23,719,230	188,400,593	48,550,106	131,664,625	8,185,862	330,282,884

[1] Includes bicycle and tricycle repairing, 310; blacksmithing and wheelwrighting, 1,830; boots and shoes, custom work and repairing, 696; carpentering, 524; clothing, men's, custom work and repairing, 703; clothing, women's, dressmaking, 367; dyeing and cleaning, 50; furniture, cabinetmaking, repairing, and upholstering, 172; lock and gun smithing, 42; masonry, brick and stone, 163; millinery, custom work, 705; painting, house, sign, etc., 404; paper hanging, 31; plastering and stuccowork, 39; plumbing, and gas and steam fitting, 295; sewing machine repairing, 7; taxidermy, 3; watch, clock, and jewelry repairing, 438.

Of the 20,222 establishments of all classes shown in this table, 10,186, or 50.4 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $27,519,500, or only 7.7 per cent of the total value of the products of the state.

In addition to the 20,222 active establishments in the state during the census year, with a capital of $285,845,087, shown in Table 2, there were 139 idle establishments, with a capital of $2,861,192, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Boxes, wooden packing	2	$20,125	Lumber and timber products	17	$427,772
Brick and tile	20	135,390	Lumber, planing mill products, including sash, doors, and blinds	4	42,300
Chemicals	2	135,000	Matches	1	40,000
Cheese, butter, and condensed milk, factory product	10	16,945	Musical instruments, pianos and materials	2	27,000
Cooperage	1	50,000	Paper and wood pulp	2	34,307
Flouring and grist mill products	11	37,100	Patent medicines and compounds	1	25,000
Foundry and machine shop products	7	36,865	Paving and paving materials	1	49,746
Fruits and vegetables, canning and preserving	7	73,025	Saddlery and harness	1	15,000
Furniture, factory product	2	30,450	Salt	2	30,800
Grease and tallow	1	50,000	Tin and terne plate	1	529,259
Iron and steel	6	688,981	All other industries	33	63,435
Lime and cement	2	226,141			
Liquors, malt	3	76,551			

TABLE 3.—COMPARATIVE SUMMARY OF FIFTEEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

[1] Decrease.

The 15 leading industries of the state in 1900, as shown in Table 3, embraced 3,818 establishments, or 22.7 per cent of the total number in the state; used a capital of $172,225,897, or 60.6 per cent of the total; gave employment to 81,980 wage-earners, or 50.5 per cent of the total number; and paid $35,561,887, or 53.5 per cent of the total wages. The value of their products was $189,517,713, or 53.1 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of lumber and timber products is the most important industry in the state. The 1,705 establishments reported in 1900 gave employment to 26,199 wage-earners, or 16.1 per cent of the wage-earners employed in the state, and the products were valued at $54,290,520, or 15.2 per cent of the total value of the products of the state. In 1890 there were 2,124 establishments, 54,308 wage-earners, and products valued at $83,121,969. The decrease in the value of products during the decade was $28,831,449, or 34.7 per cent.

The vast pine and hard wood forests of Michigan have constituted the state's most valuable natural resource. During the first half of the century there was a great influx of settlers who were attracted to the oak openings back from Detroit, on the higher land of the interior. Timber was sawed by mills in this section for local trade, but the lumber industry may be said to have begun in 1834, when Harvey Williams built the first steam sawmill in the Saginaw Valley. Other small establishments followed in rapid succession, manufacturing chiefly for local markets. With roadbuilding the lumber industry advanced rapidly. At Flint, in 1854, after the opening of a plank road, the prices of lumber nearly doubled. In 1858 a regular logging business was begun at Alpena, 1,000,000 feet of logs being put out that year at $2 per 1,000 feet, board measure.[1] The industry was at first concentrated along the valleys of the Grand, Saginaw, and Muskegon rivers

[1] One Hundred Years of American Commerce, Vol. I, page 197.

and their tributaries, and at lake ports, such as Alpena, Manistee, Ludington, Cheboygan, and Grand Haven. The building of railways between 1870 and 1880 opened up the more inaccessible portions of the northern part of the Lower Peninsula, and many new lumber centers sprang up. A change thereupon took place in the industry. Instead of transporting logs to the mills located on the lake shore and at the mouths of rivers, lumber manufacturers moved their mills to the sources of supply. The Saginaw Valley, the Lake Huron shore, Manistee, Muskegon, and the Upper Peninsula came to be the most important lumber regions. The decline in the industry since 1890 is the inevitable penalty the state has been obliged to pay for the extravagant and wasteful exploitation of its forests in the preceding decades. The production is still great, although large quantities of logs are brought into the state. The industry at Alpena, for example, has been sustained by the importation of logs from Canada.[1] The high-grade woods of the state were the first to be exhausted. Public opinion is now developing in favor of a system of forestry, and a commission has been created looking toward the protection of the forests.

The manufacture of flouring and grist mill products ranks second among the industries of the state, with 765 establishments, 1,423 wage-earners, and products valued at $23,593,991. In 1890 there were 544 establishments, 1,852 wage-earners, and products valued at $22,778,829. The increase in the value of products during the decade was $815,162, or 3.6 per cent. In the earlier decades the number of establishments was large, the absence of adequate means of transportation necessitating the establishment of mills for every small market. In recent years the industry has tended to localize at points which possess superior waterpower or shipping facilities. Grand Rapids, Detroit, Adrian, Greenville, Coldwater, Saginaw, and Niles are important milling centers.

There were 364 establishments engaged in 1900 in the manufacture of foundry and machine shop products, the industry third in rank, with 13,502 wage-earners, and products valued at $20,615,864. In 1890 there were 260 establishments, 7,892 wage-earners, and products valued at $13,363,030. The increase in the value of products during the decade was $7,252,834, or 54.3 per cent. This industry is well distributed throughout the state. In addition to the principal centers, which are Detroit and contiguous towns on the Detroit River, Grand Rapids, Saginaw, Bay City, and Jackson, there are many other centers of growing importance, including Battle Creek, Kalamazoo, Lansing, Muskegon, Manistee, and Marquette.

There were 124 establishments engaged in the factory manufacture of furniture in 1900, with 11,870 wage-earners, and products valued at $14,614,506. In 1890 there were 116 establishments, 8,688 wage-earners, and products valued at $10,767,038. The increase in the value of products during the decade was $3,847,468, or 35.7 per cent. Grand Rapids is conspicuous as one of the great furniture centers of the world. Second in the state stands Detroit, and the industry is carried on also in Muskegon, Saginaw, Owosso, Holland, Pentwater, Bingham, Sturgis, Plymouth, and Big Rapids. There is a tendency toward localization and an increase in the size of establishments, notably at Grand Rapids, the value of whose furniture products in 1900 was $7,494,607. The first cabinet shop in that city is said to have been established in 1849 by Abraham Snively.[2] Abundant waterpower, and a river draining areas covered with both pine and hard wood, gave the industry a sudden and rapid growth. Although the waterpower is now of much less importance, and the timber is becoming exhausted, so that large quantities are imported, the impetus given by these early natural advantages has been maintained by the utilization of new resources. The most important of these are the unique method of sale by photographs, the invention and use of special furniture cars, and the establishment of great semiannual fairs at Grand Rapids. Buyers are thus attracted from a widely extended area, and the tendency toward centralization is accentuated.[3]

There were 235 establishments engaged in the manufacture of planing mill products in 1900, with 5,281 wage-earners, and products valued at $12,469,532. In 1890 there were 230 establishments, 4,788 wage-earners, and products valued at $10,007,603. The increase in the value of products during the decade was $2,461,929, or 24.6 per cent. While the manufacture of lumber and timber products has decreased, the manufacture of planing mill products has increased. In consequence of the impairment of the timber supply of the state, the attention of lumber manufacturers, especially in Saginaw, has been turned to the finer forms of wood manufacture. Other important cities in the planing mill industry are Detroit, Grand Rapids, Marquette, Bay City, Lansing, Kalamazoo, Jackson, and Owosso.

There were 299 establishments engaged in the manufacture of carriages and wagons in 1900, with 4,890 wage-earners, and products valued at $11,205,602. In 1890 there were 407 establishments, 2,893 wage-earners, and products valued at $5,699,941. The increase in the value of products during the decade was $5,505,661, or 96.6 per cent. From 1880 to 1890 there was an increase in the number of establishments, but since 1890 there has been a marked decrease, due to the inability of many small establishments to survive in competition with those producing on a large scale. The nearness of this industry to raw materials, as compared with the vehicle manufacturing centers of some of the other states, an increasing local and neighboring market, and excellent shipping facilities have influenced its growth and localization. The cities chiefly interested in the manufacture of carriages and wagons are Grand Rapids, Flint, Jackson, Detroit, Pontiac, and Lansing.

There were 4 establishments engaged in the manufacture of steam railroad cars in 1900, with 3,187 wage-

[3] Ibid., page 76.

earners, and products valued at $9,920,780. In 1890 there were 5 establishments, 3,723 wage-earners, and products valued at $11,078,281. The decrease in the value of products during the decade was $1,157,501, or 10.4 per cent. This decrease is due to the consolidation of large establishments located in Detroit with similar establishments in other states, and the resultant redistribution of production.

There were 59 establishments engaged in the manufacture of agricultural implements in 1900, with 1,944 wage-earners, and products valued at $6,339,508. In 1890 there were 65 establishments, 1,585 wage-earners, and products valued at $3,955,306. The increase in the value of products during the decade was $2,384,202, or 60.3 per cent. The cities in which this manufacture is most conspicuous are Albion, Adrian, Battle Creek, Kalamazoo, Greenville, Lansing, Pontiac, Saginaw, and Detroit.

There were 27 establishments engaged in the tanning, currying, and finishing of leather in 1900, with 1,427 wage-earners, and products valued at $6,015,590. In 1890 there were 20 establishments, 337 wage-earners, and products valued at $1,743,760. The increase in the value of products during the decade was $4,271,830, or 245 per cent. This large increase is due chiefly to a radical change in the industry, the hides being transported from centers like Chicago to the place of the tanning bark in Michigan, instead of the bark to the hides.

There were 10 establishments engaged in the manufacture of iron and steel in 1900, with 1,972 wage-earners, and products valued at $5,902,058. In 1890 there were 19 establishments, 1,427 wage-earners, and products valued at $5,829,843. The increase in the value of products during the decade was $72,215, or 1.2 per cent. In spite of this slight increase in the value of products, there has been a marked decrease in the number of establishments, which is explainable by the insufficiency of the coal supply. The high-grade iron ores of the Lake Superior district are available, but iron manufacturing has always shown a tendency to localize near the fuel rather than near the ore.

There were 51 establishments engaged in the manufacture of chemicals in 1900, with 2,897 wage-earners, and products valued at $5,364,724. In 1890 there were 4 establishments, 1,315 wage-earners, and products valued at $3,380,388. The increase in the value of products during the decade was $1,984,336, or 58.7 per cent. This is an industry of growing importance, and is carried on chiefly in Detroit. Prior to 1880 its rank in census statistics was very low.

There were 29 establishments engaged in slaughtering and meat packing in 1900, with 456 wage-earners, and products valued at $5,337,417. In 1890 there were 30 establishments, 329 wage-earners, and products valued at $3,998,978. The increase in the value of products during the decade was $1,338,439, or 33.5 per cent. Prior to 1890 this industry was inconsiderable, but it has had a favorable development during the last decade. The chief centers are Detroit and Bay City.

There were 77 establishments engaged in the manufacture of malt liquors in 1900, with 980 wage-earners, and products valued at $5,296,825. In 1890 there were 78 establishments, 687 wage-earners, and products valued at $2,979,258. The increase in the value of products during the decade was $2,317,567, or 77.8 per cent. The growth of this manufacture has been steady, keeping pace with the increasing local demand. Detroit is now the chief center.

There were 42 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 3,938 wage-earners, and products valued at $4,332,927. In 1890 there were 17 establishments, 2,098 wage-earners, and products valued at $2,645,314. The increase in the value of products during the decade was $1,687,613, or 63.8 per cent.

There were 27 establishments engaged in the manufacture of paper and wood pulp in 1900, with 2,014 wage-earners, and products valued at $4,217,869. In 1890 there were 31 establishments, 1,219 wage-earners, and products valued at $2,919,166. The increase in the value of products during the decade was $1,298,703, or 44.5 per cent. The increasing publishing and book-making industries furnish a good market, and the completion of the Sault Ste. Marie power canal, near the source of raw material, and now in process of construction, will offer great advantages for pulp manufacturing at that point.

In addition to the industries included in Table 3, attention may be called to the manufacture of beet sugar. There were 9 establishments engaged in this industry in 1900, with 473 wage-earners, and products valued at $1,602,266. There were no establishments in operation in 1890. Michigan ranked second in the United States in this industry in 1900, the value of its products constituting 21.9 per cent of the total for the United States. The manufacture of beet sugar on a small scale was unsuccessfully attempted in Michigan as early as 1838.[1] The natural conditions were found to be favorable, but large capital, efficient machinery, and an advanced system of agriculture were wanting. Within the past ten years these deficiencies have been supplied, and Michigan has been able to reap the benefits of its natural advantages for raising sugar beets.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Bay City, Detroit, Grand Rapids, Jackson, Muskegon, and Saginaw, as returned at the censuses of 1890 and 1900, with the percentages of increase.

[1] Blois' Gazetteer, 1838, page 110.

TABLE 4.—COMPARATIVE SUMMARY, BAY CITY, DETROIT, GRAND RAPIDS, JACKSON, MUSKEGON, AND SAGINAW, 1890 AND 1900, WITH PER CENT OF INCREASE.

	Year.	Number of establishments.	Capital.	Wage-earners. Average number.	Wage-earners. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

	1890	31.4	37.3	42.4	49.8	50.4	45.3	47.2

[1] Decrease.

It appears from Table 4 that there has been an increase during the past decade in the combined manufactures of these 6 cities. The number of establishments increased from 3,802 to 5,018, or 32.0 per cent; the average number of wage-earners from 63,053 to 75,682, or 20.0 per cent; and the value of products from $131,229,582 to $155,523,588, or 18.5 per cent. The percentage of increase in the number of establishments and the value of products has been smaller in these 6 cities than in the state as a whole. Jackson shows the most rapid growth, the value of products having increased from $5,376,347 in 1890 to $7,587,526 in 1900, or 41.1 per cent. In Detroit, the leading manufacturing city, the number of establishments increased from 1,746 to 2,847, or 63.1 per cent; the number of wage-earners from 34,535 to 45,707, or 32.3 per cent; and the value of products from $77,351,546 to $100,892,838, or 30.4 per cent. The number of establishments, number of wage-earners, and value of products in this city in 1900 constituted 16.9, 28.2, and 28.3 per cent, respectively, of the totals for the state. In Bay City, Muskegon, and Saginaw, lumber manufacturing, which shows a decline during the decade, has been the dominant industry. The decrease in the value of products, in cities shown in Table 4, is limited to these 3 cities.

Table 5 presents the totals for the manufacturing industries of the 63 cities and villages withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and villages, and shows their rank in population and in value of products.

[1] Less than one-tenth of 1 per cent.

Of the 16,807 establishments in the state, 9,679, or 57.6 per cent, were located in these 63 cities and villages. They furnished employment to 117,504 wage-earners, or 72.4 per cent of the total number, and the value of their products, $243,448,473, formed 68.2 per cent of the total for the state. Certain of the cities included in Table 5 have become centers of important industries: Kalamazoo for axles, beet sugar, carriages and carriage springs, corsets, machinery, paper, and blank books; Jackson for carriages, corsets, machines, oil stoves, tools, and wheels; Battle Creek for agricultural implements (especially threshing machines), books, health foods (for which it has established a national reputation), machinery, and pumps; Flint and Pontiac for carriages and wagons and carriage and wagon materials; Port Huron for engines, machinery, steel ships, and wood pulp; and Lansing for agricultural implements, beet sugar, carriages and wagons, display fixtures, furniture, stoves, and wheelbarrows. Products of some of these industries are exported.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Bay City, Detroit, Grand Rapids, Jackson, Kalamazoo, Muskegon, and Saginaw by specified industries.

Table 9 shows the totals for the cities and villages withdrawn from the enumerators, exclusive of those shown in Table 8.

MINNESOTA.

Table 1 shows the statistics of the manufacturing and mechanical industries of the state of Minnesota as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860

[1] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[2] Not reported separately.
[3] Decrease.
[4] Not reported.
[5] Exclusive of 9,408 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] As given for the year 1899, in the Legislative Manual, State of Minnesota, 1901, page 601.
[7] Does not include value of rented property.

Table 1 shows that there has been a steady growth in the manufacturing and mechanical industries of Minnesota during the half century. The population during these years increased from 6,077 to 1,741,986, while the average number of wage-earners employed in manufacturing establishments increased from 63 to 77,234, embracing, in 1900, 4.4 per cent of the entire population, compared with 1 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 113,509, or 6.5 per cent of the total population of the state. The greatest absolute increase in the value of products, $115,968,280, is shown for the decade ending with the year 1890.

The development of Minnesota's manufactures is due in part to its native forests of white and Norway pine and to its fertile valleys for the growing of grain; to its water-power; to cheap transportation by way of the Great Lakes; to the early construction of railroads connecting the state with the agricultural sections of the West and Southwest, and with the great centers of population of the East and South; to its geographical position; and to its corporation laws.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for educational, eleemosynary, and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	13,021	$167,342,210	14,365	77,896	$35,517,803	$13,330,926	$174,021,253	$96,553,401	$72,519,524	$4,948,328	$263,670,586
Hand trades[1]	5,138	9,193,847	5,905	15,032	7,372,128	2,043,700	13,892,022	346,819	13,066,566	478,637	29,806,800
Educational, eleemosynary, and penal institutions	5	664,730	.....	16	4,440	3,006	434,417	396,952	33,627	3,838	522,436
Establishments with a product of less than $500	1,899	845,234	2,112	646	28,538	54,272	161,221	17,070	144,151	.....	492,269
All other establishments	5,976	156,638,399	6,348	62,202	28,112,697	11,229,948	159,533,593	95,792,560	59,275,180	4,465,853	232,849,081

[1] Includes bicycle and tricycle repairing, 200; blacksmithing and wheelwrighting, 1,362; boots and shoes, custom work and repairing, 468; carpentering, 454; clothing, men's, custom work and repairing, 525; clothing, women's, dressmaking, 494; dyeing and cleaning, 23; furniture, cabinetmaking, repairing, and upholstering, 152; lock and gun smithing, 32; masonry, brick and stone, 155; millinery, custom work, 370; painting, house, sign, etc., 287; paper hanging, 34; plastering and stuccowork, 54; plumbing, and gas and steam fitting, 194; sewing machine repairing, 5; taxidermy, 8; typewriter repairing, 6; watch, clock, and jewelry repairing, 315.

Of the 13,021 establishments of all classes shown in this table, 7,037, or 54 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $30,299,069, or only 11.5 per cent of the total value of the products of the state.

In addition to the 13,021 active establishments in the state during the census year, with a capital of $167,342,210, shown in Table 2, there were 59 idle establishments, with a capital of $4,296,797, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Agricultural implements	1	$1,909,812	Ironwork, architectural and ornamental	1	$500,000
Boots and shoes, factory product	1	6,900	Liquors, distilled	1	125,000
Brick and tile	14	207,800	Lumber and timber products	8	19,750
Cheese, butter, and condensed milk, factory product	18	43,660	Oil, linseed	1	15,000
Flouring and grist mill products	4	13,540	All other industries	8	5,559
Iron and steel	2	1,449,776			

TABLE 3.—COMPARATIVE SUMMARY OF ELEVEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for selected industries for state	1900	2,500	$110,654,790	35,862	$17,528,938	$7,253,986	$130,594,541	$177,172,025

	1890	5	44,600	20	11,808	4,103	505,783	584,294

The 11 leading industries of the state in 1900, as shown in Table 3, embraced 2,500 establishments, or 22.5 per cent of the total number in the state; used a capital of $110,654,790, or 66.7 per cent of the total; gave employment to 35,862 wage-earners, or 46.4 per cent of the total number; and paid $17,528,938, or 49.4 per cent of the total wages. The value of their products was $177,172,025, or 67.5 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that flour and grist milling is the most important industry in the state. The 512 establishments reported in 1900 gave employment to 4,086 wage-earners, or 5.3 per cent of the wage-earners employed in the state, and their products were valued at $83,877,709, or 31.9 per cent of the total value of the products of the state. In 1890 there were 307 establishments, 3,509 wage-earners, and products valued at $60,158,088. The increase in the value of products during the decade was $23,719,621, or 39.4 per cent. This is a greater absolute increase than is shown for any other industry.

In 1900 Minnesota had 11 per cent of the total capital invested in the manufacture of flouring and grist mill products in the United States, and led the states in this regard. In 1890 this percentage was 9.4, New York and Pennsylvania preceding in the order named. The value of the products of the Minnesota mills in 1900 was 15 per cent of the total value of the flouring and grist mill products of the United States. In 1890 this percentage was 11.7. In 1900 no other state approached Minnesota's total, New York, the second in rank, having a value aggregating a little more than one-half.

The first manufactory established in Minnesota was a sawmill, constructed in 1821 for the use of the United States garrison at Fort Snelling.[1] It stood upon the west side of the falls of St. Anthony, in what is now a part of the city of Minneapolis. In 1823 it was fitted up for grinding flour, at an expense of $270.33 for the millstones and the cost of transporting them from St. Louis. The labor of erecting this mill and placing the stones in position was performed by the garrison, with no additional outlay. From this beginning have developed two of the greatest manufactures of the state—the milling of flour and grist and the sawing of lumber and timber. These, with the manufacture of planing mill products, furnished a trifle over one-half of the value of the manufactured products of the state in 1900.

The development of the flour and grist milling industry was very slow. For a long time little faith was placed in the future of Minnesota agriculture, and for many years the state did not raise sufficient wheat to feed its own population.[2] The second gristmill was erected in 1843, but, like the one built twenty years before, it had no bolting apparatus. The first bolting cloth was introduced in 1846 by Mr. Samuel Bowles, a miller in Washington county. The development began about 1858, in which year the first considerable shipments of wheat were made to other states. Wheat raising was stimulated by the high price which prevailed during the early sixties. The wheat then raised in Minnesota was the same variety as is now grown in that state, and was known as spring wheat. By the methods of milling in general use prior to 1870, the hard outer covering of this wheat was more or less pulverized, and passed through the bolting cloth with the flour. As a result, the flour made from spring wheat was darker than that made from winter wheat, and made a darker bread, while the fine particles of bran mixed with the flour attracted moisture in hot or damp climates, so that the flour soon spoiled. Therefore, it could not be readily exported. For these reasons its value was considerably less than that of flour manufactured from winter wheat. In the markets of Chicago and Buffalo 5 bushels of spring wheat seldom sold for as much as 4 bushels of winter wheat of the same general grade.[3]

Prior to 1870 practically all of the flour of the world was made by what is now known as the old process of low grinding, in which the upper millstone was set low, or very close to the lower, and the wheat was reduced to flour by one operation. Between 1870 and 1890 this method of making flour gave place to what is usually called the new process of milling, or the manufacture of flour by medium high grinding. This, in turn, gave way to the use of rollers.

The new process of making flour was introduced into the United States by Mr. N. La Croix, a French millwright who settled at Faribault, Minn., about 1860.[4] It attracted little attention until after the destruction by flood of his small mill, when he removed to Minneapolis and entered the service of Mr. Christian, who at once adopted his method. Other millers of that city soon followed, and thereafter the growth of the milling industry was phenomenal. The mills attracted the wheat of the state to the village by the Falls of St. Anthony, and in a few years, with the accompanying stimulus to other trades and industries, created a flourishing city. The new process spread over the United States and attracted the attention of the world. Large quantities of flour were exported, whereas previously very little had found a foreign market, the exports of breadstuffs being chiefly in the shape of grain.

Briefly outlined, the new process as introduced consisted of reducing grain to flour by two or more successive and distinct grindings. As a result of the first grinding, the grain was reduced to small particles or granules. The resulting chop, as it is called, was passed through the bolting apparatus and separated into its component parts, flour, middlings, and bran. The flour thus obtained was of an inferior grade. The middlings, containing the more valuable portion of the wheat, were reground on separate stones. Later, rollers were substituted for stones, but the

[4] Ibid., page 172.

principle governing their use remains substantially the same as in the system of high grinding with stones. It is the gradual reduction of the grain to flour by a number of distinct processes, instead of by one grinding, as was the time-honored custom. By this system the bran is removed as completely from spring wheat flour as from flour made from winter wheat. With this change, spring wheat flour at once began to sell for a higher price than flour made from winter wheat, for it was richer in gluten and otherwise more valuable. The relative prices which the two kinds of wheat had commanded were reversed. The average price of Minnesota wheat advanced to from 20 to 30 cents a bushel above the price of wheat grown in most other states. This advance was shared by the wheat growers of the Dakotas and northern Wisconsin; hence the rapid development of that section under the stimulus of the new process of milling. The millers of Minneapolis obtained their power from the Falls of St. Anthony, and found markets for their products at a profit not realized by the flour makers of any other section. The increase in the number of mills during the past decade has been principally outside of Minneapolis. However, the mills of that city have, by the introduction of new and improved milling machinery, greatly increased their capacity.

The manufacture of lumber and timber products ranks second among the industries of the state, with 438 establishments, 15,140 wage-earners, and products valued at $43,585,161. In 1890 there were 392 establishments, 16,170 wage-earners, and products valued at $25,075,132. The increase in the value of products during the decade was $18,510,029, or 73.8 per cent. This industry was started in 1821, two years before the milling industry began. It led the latter industry until La Croix's invention stimulated the production of wheat in the Northwest and advanced milling to the foremost place among the manufacturing industries of Minnesota. Minnesota is one of the leading lumber-producing states of the nation, its characteristic products being white and Norway pine. Within its borders the state now includes, in all probability, a greater quantity of merchantable forest pine than any other state. The timber country is studded with innumerable small lakes and streams, many of them connected with the St. Louis and Cloquet rivers, or with Lake Superior. The Minnesota lumber mills are also reached by large rafts of logs from the northern aud southern shores of Lake Superior. In 1900 the quantity of lumber sawed in the state, including custom sawing but not including lath, shingles, etc., was 2,342,338,000 feet; in Minneapolis, the great center of lumber manufacture in the state, it was 623,000,000 feet.

There were 596 establishments engaged in the factory manufacture of cheese, butter, and condensed milk, the industry third in rank, with 740 wage-earners, and products valued at $8,479,896. In 1890 there were 106 establishments, 783 wage-earners, and products valued at $2,958,476. The increase in the value of products during the decade was $5,521,420, or 186.6 per cent. One of the features of the revolution in Minnesota agriculture in the past thirty years is the development of the dairy industry. This growth has been accompanied, in the last twenty years, by a marked increase of cheese, butter, and condensed milk factories, which in 1880 numbered only 27, with a capital of $71,149, and products valued at $62,094. This increase marks the growth of dairying on farms, and the substitution of a system of diversified farming for the old single-crop husbandry. The great value of the products reflects the fact that Minnesota butter, like Minnesota flour, is an important adjunct to the prosperity of the farmers and the development of the state.

There were 20 establishments engaged in slaughtering and meat packing in 1900, with 668 wage-earners, and products valued at $7,810,555. In 1890 there were 18 establishments, 222 wage-earners, and products valued at $2,510,431. The increase in the value of products during the decade was $5,300,124, or 211.1 per cent. The slaughtering industry has shown even greater development in the last decade than the making of butter and cheese in factories. Its development is due in part to the factors that have contributed to the growth of the dairy industry, and in part to the favorable location of St. Paul and Minneapolis with reference to the slaughtering of cattle from the great ranges of the far West.

There were 39 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 4,700 wage-earners, and products valued at $6,319,876. In 1890 there were 18 establishments, 1,951 wage-earners, and products valued at $2,628,174. The increase in the value of products during the decade was $3,691,702, or 140.5 per cent. The marked increase in this industry is a result of the growth of the state's commercial cities, which are the centers of numerous and rapidly developing lines of railroads.

There were 175 establishments engaged in the manufacture of foundry and machine shop products in 1900, with 3,139 wage-earners, and products valued at $5,975,077. In 1890 there were 92 establishments, 1,289 wage-earners, and products valued at $2,835,024. The increase in the value of products during the decade was $3,140,053, or 110.8 per cent. Few industries in the state show a greater progress than this. The increased use of iron and steel in all industries, and the transportation facilities of the 3 leading cities of Minnesota, contributed to its rapid and continuous growth. Minnesota has vast deposits of red hematite. Only one state in the Union mined more iron ore in 1899 than Minnesota, and yet very little has ever been smelted within the state, because there are no coal and limestone deposits in proximity to the ore.

There were 560 establishments engaged in the printing and publishing of newspapers and periodicals in 1900, with 2,714 wage-earners, and products valued at $5,790,148. In 1890 there were 341 establishments, 2,143 wage-earners, and products valued at $4,157,026. The increase in the value of products during the decade was $1,633,122, or 39.3 per cent. The growth of the 3 commercial cities, Duluth, Minneapolis, and St. Paul, has been attended by a natural development of the newspaper business in these cities and also in the minor cities of the state.

There were 78 establishments engaged in the manufacture of malt liquors in 1900, with 856 wage-earners, and products valued at $4,456,928. In 1890 there were 66 establishments, 548 wage-earners, and products valued at $2,206,366. The increase in the value of products during the decade was $2,250,562, or 102 per cent.

There were 61 establishments engaged in the manufacture of planing mill products, including sash, doors, and blinds, in 1900, with 1,639 wage-earners, and products valued at $3,988,276. In 1890 there were 54 establishments, 2,530 wage-earners, and products valued at $4,943,451. The decrease in the value of products during the decade was $955,175, or 19.3 per cent.

There were 16 establishments engaged in the manufacture of boots and shoes, factory product, with 2,025 wage-earners, and products valued at $3,615,801. In 1890 there were 8 establishments, 1,099 wage-earners, and products valued at $2,032,814. The increase in the value of products during the decade was $1,582,987, or 77.9 per cent. When, in the decade 1870–1880, the shoemaking industries, centralized in Massachusetts, began to develop in other sections, Minnesota profited by the change, and in 1880 had 5 factories. The facilities furnished by the manufacturing centers of Minnesota for securing raw materials at a low cost for transportation, and the natural advantages of the same centers for marketing the goods in flourishing agricultural communities, have assisted in this development.

There were 5 establishments engaged in the manufacture of linseed oil in 1900, with 155 wage-earners, and products valued at $3,272,598. In 1890 there were 3 establishments, 90 wage-earners, and products valued at $1,547,719. The increase in the value of products during the decade was $1,724,879, or 111.4 per cent. The stimulus given to agriculture by the introduction of the new process of milling wheat has been followed, in many parts of the state, by a radical revolution in the methods of agriculture, which is reflected in manufactures. Flaxseed has been found most profitable when rotated with other cereals, and its cultivation has led to the establishment of linseed-oil mills at the centers of wheat milling.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Duluth, Minneapolis, and St. Paul, as returned at the censuses of 1890 and 1900, with the percentages of increase.

TABLE 4.—COMPARATIVE SUMMARY, DULUTH, MINNEAPOLIS, AND ST. PAUL, 1890 AND 1900, WITH PER CENT OF INCREASE.

[1] Decrease.

It appears from Table 4 that there has been an increase during the past decade in the manufactures of the 3 principal cities of the state. Although the number of establishments decreased from 4,443 to 4,392, or 1.1 per cent, the average number of wage-earners increased from 43,297 to 48,199, or 11.3 per cent, and the value of products from $124,769,770 to $160,113,030, or 28.3 per cent.

In Minneapolis, the leading manufacturing city in the state, the number of establishments decreased from 2,723 to 2,368, or 13 per cent, but the number of wage-earners increased from 23,703 to 26,608, or 12.3 per cent, and the value of products from $82,922,974 to $110,943,043, or 33.8 per cent. The number of establishments, number of wage-earners, and value of products in this city in 1900 constituted 21.3, 34.5, and 42.2 per cent, respectively, of the totals for the state. Minneapolis leads in two of the most important manufacturing industries of the state, the manufacture of flour and grist mill products, and the manufacture of lumber and timber products. It was in these industries that the city found the first important factors in its development. Minneapolis holds a prominent position also in the manufacture of foundry and machine shop products, malt liquors, and linseed oil.

In St. Paul the number of establishments increased from 1,442 to 1,591, or 10.3 per cent; the number of wage-earners from 16,279 to 17,593, or 8.1 per cent; and the value of products from $33,035,073 to $38,541,030, or 16.7 per cent. St. Paul early became the principal northwestern depot of the Hudson Bay Fur Company, and from that beginning it has developed into an important fur manufacturing center. It also leads the cities of the state in the factory manufacture of boots and shoes, and of men's clothing; in the printing and publishing of newspapers and periodicals; and in railroad repair shop work.

Duluth made the greatest gains in number of establishments, capital, number of wage-earners, and wages. The city is an important center for the manufacture of lumber. In 1900 the quantity sawed in Duluth was 305,000,000 feet, the product of what is known as the Duluth district being much larger.

Table 5 presents the totals for the manufacturing industries of the 27 cities and villages withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and villages, and shows their rank in population and in value of products.

[1] Exclusive of 9,408 Indians and other persons on Indian reservations, which classes were not included at previous censuses.

Of the 11,114 establishments in the state, 6,112, or 55 per cent, were located in these 27 cities and villages. They furnished employment to 61,880 wage-earners, or 80.1 per cent of the total for the state; and the value of their products, $205,170,094, formed 78.1 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Duluth, Minneapolis, and St. Paul by specified industries.

Table 9 shows the totals for all industries in the cities and villages withdrawn from the enumerators, exclusive of those shown in Table 8.

TABLE 6.—MANUFACTURES

	COUNTIES.	Number of establishments.	CAPITAL. Total.	Land.	Buildings.	Machinery, tools, and implements.	Cash and sundries.	Proprietors and firm members.	SALARIED OFFICIALS, CLERKS, ETC. Number.	Salaries.	AVERAGE NUMBER OF WAGE-EARNERS AND TOTAL WAGES. Total. Average number.	Wages.

MISSISSIPPI.

Table 1 shows the manufacturing and mechanical industries of Mississippi as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860
Number of establishments	4,772	1,698	1,479	1,731	976	947	181.0	14.8	[1]14.6	77.4	3.1
Capital	$35,807,419	$14,896,884	$4,727,600	$4,501,714	$4,384,492	$1,815,820	140.4	215.1	5.0	2.7	141.5

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 6.)
[3] Not reported separately.
[4] Not reported.
[5] As given in the state auditor's Comparative Statement of Assessments for 1900.
[6] Does not include the value of rented property.

Although Mississippi is an agricultural state, Table 1 shows that there has been a considerable growth in its manufacturing and mechanical industries during the half century. The population during these years increased from 606,526 to 1,551,270, or 155.8 per cent, while the average number of wage-earners employed in manufacturing establishments increased from 3,154 to 26,418, or 737.6 per cent, embracing, in 1900, 1.7 per cent of the entire population, compared with five-tenths of 1 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 43,369, or 2.8 per cent of the total population of the state. Measured by the value of products, the greatest percentage of increase, 148.8, was during the decade 1880 to 1890, although the greatest absolute increase was between the years 1890 and 1900.

Mississippi has few of the natural advantages which foster manufactures. It possesses no important harbor, little waterpower, and few mineral resources. The state is fortunate, however, in having cotton lands of inexhaustible fertility and extensive forests of pine and hard wood. Its industrial history dates back to the early years of the century Among the manufacturing establishments reported at the census of 1810 were 22 cotton factories, 10 tanneries, and 6 distilleries. At the census of 1840 there were reported 53 cotton factories with a total of 318 spindles, 128 tanneries, 14 distilleries, and 16 flouring mills. With the opening of the Chickasaw Cession to settlement in 1832, a period of gigantic speculation began.[1] No state "plunged more boldly into corrupt banking systems, and none suffered more disastrous consequences." Here, as in other states, this period of excessive speculation terminated in the financial panic of 1837. Repudiation of bonds followed in 1842. Confidence in the general policy and laws of Mississippi was destroyed. The census of 1850 shows only 3,154 persons engaged in manufactures, compared with 5,060 in 1840. In 1860 the state had, to a large extent, recovered from the speculative influences of these earlier years, and was experiencing its first genuine industrial development. The increase in the value of products during the decade ending with that year was 126.3 per cent. The industrial stagnation throughout the South during the next twenty years is well known, but with 1880 a new period of growth began. Between 1880 and 1890 great efforts were made to attract manufacturers.

[1] Industrial Resources of the South and West, by DeBow, Vol. II, page 14.

A bureau of immigration was organized, and in 1882 the legislature passed an act exempting machinery of factories from taxation for ten years.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for eleemosynary institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	9,432	$37,547,882	10,160	32,206	$7,577,894	$1,516,342	$21,959,861	$8,049,353	$12,821,425	$1,089,083	$41,311,374
Hand trades[1]	843	954,599	952	1,518	560,824	84,212	1,272,502	1,498	1,219,322	51,682	2,622,046
Eleemosynary institutions	4	42,500	--------	21	2,199	1,341	3,676	----------	2,587	1,089	13,912
Establishments with a product of less than $500	4,656	1,697,963	4,765	5,767	103,809	38,146	264,093	63,309	200,784	----------	866,076
All other establishments	3,929	34,852,820	4,443	24,900	6,911,062	1,392,643	20,419,590	7,984,546	11,398,732	1,036,312	37,809,340

[1] Includes bicycle and tricycle repairing, 12; blacksmithing and wheelwrighting, 362; boots and shoes, custom work and repairing, 55; carpentering, 68; clothing, men's, custom work and repairing, 42; clothing, women's, dressmaking, 21; dyeing and cleaning, 6; furniture, cabinetmaking, repairing, and upholstering, 12; lock and gun smithing, 12; masonry, brick and stone, 8; millinery, custom work, 119; painting, house, sign, etc., 28; paper hanging, 1; plastering and stuccowork, 2; plumbing, and gas and steam fitting, 18; sewing machine repairing, 1; watch, clock, and jewelry repairing, 76.

Of the 9,432 establishments of all classes, shown in this table, 5,499, or 58.3 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $3,488,122, or only 8.4 per cent of the total value of the products of the state.

In addition to the 9,432 active establishments in the state during the census year, with a capital of $37,547,882, shown in Table 2, there were 68 idle establishments, with a capital of $68,677, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Brick and tile	2	$2,200	Hosiery and knit goods	1	$7,000
Carriage and wagon materials	1	1,706	Lumber, planing mill products, including sash, doors, and blinds	1	2,500
Cheese, butter, and condensed milk, factory product	1	2,525	Pottery, terra cotta, and fire-clay products	1	7,919
Cotton, ginning	40	40,217	All other industries	19	1,200
Flouring and grist mill products	2	3,410			

TABLE 3.—COMPARATIVE SUMMARY OF EIGHT LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for selected industries for state	1900	3,205	$29,210,084	20,072	$5,474,122	$1,045,899	$17,621,763	$31,377,442

Cotton goods	1900	5	2,209,749	1,675	339,546	117,117	767,327	1,472,835
	1890	9	2,053,743	1,154	263,997	57,622	871,970	1,333,398
Flouring and grist mill products	1900	225	225,335	208	27,244	3,802	805,894	932,816
	1890	408	652,663	777	88,050	25,002	1,009,335	1,249,669
Lumber and timber products	1900	844	17,337,538	9,676	2,790,780	448,710	8,422,253	15,656,110
	1890	366	4,498,788	4,427	1,169,673	216,482	2,867,798	5,770,387
Lumber, planing mill products, including sash, doors, and blinds	1900	34	631,553	748	235,083	32,256	844,248	1,315,775
	1890	8	93,002	92	42,690	4,584	59,170	136,450
Oil, cottonseed and cake	1900	41	3,711,930	1,521	461,357	337,141	4,952,814	6,681,121
	1890	13	1,497,746	891	211,139	186,754	1,757,807	2,406,628
Turpentine and rosin	1900	145	798,373	2,288	530,410	18,655	697,539	1,772,435
	1890	24	173,698	620	106,442	9,754	102,902	282,066

[1] Does not include many ginneries operated in connection with saw, grist, and cottonseed-oil mills, or for the use exclusively of plantations on which they are located. For the full number of ginneries in operation reference should be made to the special report on cotton ginning.

The 8 leading industries of the state in 1900, as shown in Table 3, embraced 3,205 establishments, or 67.2 per cent of the total number in the state; used a capital of $29,210,084, or 81.6 per cent of the total; gave employment to 20,072 wage-earners, or 76 per cent of the total number; and paid $5,474,122, or 73.3 per cent of the total wages. The value of their products was $31,377,442, or 77.6 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of lumber and timber products is the most important industry in the state. The 844 establishments reported in 1900 gave employment to 9,676 wage-earners, or 36.6 per cent of the wage-earners employed in the state, and the products were valued at $15,656,110, or 38.7 per cent of the total value of the products of the state. In 1890 there were 366 establishments, 4,427 wage-earners, and products valued at $5,770,387. The increase in the value of products during the decade was $9,885,723, or 171.3 per cent. The forests of Mississippi constitute its most valuable natural resource. The longleaf pine region of the coastal plain no longer contains much valuable timber, but the rolling pine lands of the interior have been very little exploited. These in 1897 were estimated to cover 7,712,000 acres. The lumber industry is carried on chiefly along the Pascagoula River in the southeast, and in Hancock county in the southwest.[1]

The manufacture of cottonseed oil and cake ranks second, with 41 establishments, 1,521 wage-earners, and products valued at $6,681,121. In 1890 there were 13 establishments, 891 wage-earners, and products valued at $2,406,628. The increase in the value of products during the decade was $4,274,493, or 177.6 per cent. In 1900, Meridian had the mill of largest capacity, and Greenville the greatest number of establishments. Two establishments, one at Jackson and the other at Meridian, refined as well as expressed the oil. It is claimed that a Mississippian, John Ross, in 1801 made the first written suggestion that oil be expressed from the cottonseed and prophetically named its uses.[2] The first mill in the United States was erected at Natchez, Miss., in 1834,[3] and at the census of 1870, 4 mills were reported in the state.

Cotton ginning has undergone a remarkable development during the last decade and now holds third place among the manufacturing industries of the state. There were 1,901 establishments reported in 1900, with 2,422 wage-earners, and the receipts for ginning and other work done amounted to $2,214,949. In 1890 there were only 130 establishments reported, with 547 wage-earners, and the receipts for ginning and other work done amounted to $130,387. The increase in these receipts during the decade was $2,084,562, or 1,598.7 per cent. These figures do not include the operation of many private plantation ginneries, or ginneries connected with saw, grist, or cottonseed-oil mills [4]

[2] History of Mississippi, by Lowry and McCardle, page 137.

[3] Cotton and Cotton Oil, by D. A. Tompkins, page 210.

[4] See special report on Cotton Ginning.

There were 145 establishments engaged in the manufacture of turpentine and rosin in 1900, with 2,288 wage-earners, and products valued at $1,772,435. In 1890, 24 establishments were reported, with 620 wage-earners, and products valued at $282,066. The increase in the value of products during the decade was $1,490,369, or 528.4 per cent. In 1860 there was but 1 turpentine still in the state, while in 1880, 11 were reported.

There were 6 establishments engaged in the manufacture of cotton goods in 1900, with 1,675 wage-earners, and products valued at $1,472,835. In 1890, 9 establishments were reported, with 1,154 wage-earners, and products valued at $1,333,398. The increase in the value of products during the decade was $139,437, or 10.5 per cent. In 1850 there were 2 mills in the state, with products valued at but $30,500.[1] In 1870 the establishments reported numbered 5, and the value of products was $234,445. The 8 mills in operation in 1880 reported products valued at $679,093.[1] During the decade, 1870 to 1880, a cotton mill was established, which in 1892 had become what was claimed to be the largest plant of its kind in the South.[2]

There were 9 establishments engaged in the construction and general shop work of steam railroad companies in 1900, with 1,534 wage-earners, and products valued at $1,331,401. In 1890, 5 establishments were reported, with 1,076 wage-earners, and products valued at $1,329,549. The increase in the value of products during the decade was $1,852, or one-tenth of 1 per cent. The first railroad shops in the state were those of the West Feliciana Railroad, at Woodville.[3] The largest and most complete plant in the state is said to be at McComb. Five of the establishments reported, for both 1890 and 1900, are large, but the 4 additional shops reported for 1900 are comparatively small, having been erected by short-line railroads or at convenient junction points.

There were 34 establishments engaged in the manufacture of planing mill products in 1900, with 748 wage-earners, and products valued at $1,315,775. In 1890, 8 establishments were reported, with 92 wage-earners, and products valued at $136,450. The increase in the value of products during the decade was $1,179,325, or 864.3 per cent.

There were 225 establishments engaged in flour and grist milling in 1900, with 208 wage-earners, and products valued at $932,816. In 1890, 408 establishments were reported, with 777 wage-earners, and products valued at $1,249,669. The decrease in the value of products during the decade was $316,853, or 25.4 per cent.

URBAN MANUFACTURES.

Table 4 presents the totals for the manufacturing industries of the 11 cities and towns withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and towns, and shows their rank in population and in value of products.

TABLE 4.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	Wage-earners.		Miscellaneous expenses.	Cost of materials used.	Products.			Population.

Of the 4,772 establishments in the state, 533, or 11.2 per cent, were located in these 11 cities and towns. They furnished employment to 6,389 wage-earners, or 24.2 per cent of the total number, and the value of their products, $11,441,551, formed 28.3 per cent of the total for the state.

Table 5 shows the totals for the state by counties.

Table 6 shows the totals for the state by specified industries.

Table 7 shows the totals for the cities and towns withdrawn from the enumerators.

TABLE 5.—MANUFACTURES

MISSOURI.

Table 1 shows the manufacturing and mechanical industries of the state of Missouri as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] As given for the year 1900 in Dana's supplement, "State and City," to the Commercial and Financial Chronicle, under date of April 13, 1901.
[6] Does not include value of rented property.

Table 1 shows that there has been a large growth in the manufacturing and mechanical industries of Missouri during the half century. The population during these years increased from 682,044 to 3,106,665, while the average number of wage-earners employed in manufacturing establishments increased from 15,808 to 134,975, embracing, in 1900, 4.3 per cent of the entire population, compared with 2.3 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 186,631, or 6 per cent of the total population of the state. Both the greatest percentage of increase in the value of products, 393.5, and the greatest absolute increase, $164,430,698, are shown for the decade ending with 1870. Missouri occupies a most favored position in the Mississippi and Missouri valleys and is richly endowed with natural resources, including an abundance of coal, large deposits of minerals, and extensive timber areas. The mineral belt, called the Ozarks, from the Ozark Mountains, is in the southern and southwestern parts of the state, and its products are noted for variety and purity. They include lead, nickel and cobalt, iron ore, zinc, barytes, granite, marble, limestone, glass or silica sand, and kaolin and other clays. The state has extensive facilities for distributing its products by both rail and water.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for a governmental establishment, educational and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	23,950	$251,343,381	26,332	136,654	$60,792,178	$41,499,635	$215,383,791	$79,754,117	$129,149,683	$6,479,991	$386,737,134
Hand trades[1]	8,599	12,961,322	9,747	22,036	11,286,344	7,243,378	19,169,641	710,770	18,069,146	389,725	49,932,349
Governmental establishment	1	700		3	2,210	300	510		510		3,015
Educational and penal institutions	4	18,900					7,971		6,820	1,151	18,541
Establishments with a product of less than $500	5,191	1,435,200	5,673	1,676	70,535	102,430	387,292	62,739	321,410	3,143	1,222,794
All other establishments	10,155	236,927,259	10,912	112,939	49,433,084	34,153,527	195,818,377	78,980,608	110,751,797	6,085,972	335,560,435

[1] Includes bicycle and tricycle repairing, 96; blacksmithing and wheelwrighting, 2,380; boots and shoes, custom work and repairing, 785; carpentering, 1,104; clothing, men's, custom work and repairing, 745; clothing, women's, dressmaking, 314; dyeing and cleaning, 76; furniture, cabinetmaking, repairing, and upholstering, 204; lock and gun smithing, 105; masonry, brick and stone, 378; millinery, custom work, 695; painting, house, sign, etc., 562; paper hanging, 130; plastering and stuccowork, 171; plumbing, and gas and steam fitting, 358; sewing machine repairing, 19; taxidermy, 2; typewriter repairing, 13; watch, clock, and jewelry repairing, 462.

Of the 23,950 establishments of all classes shown in this table, 13,790, or 57.6 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $51,155,143, or only 13.2 per cent of the total value of the products of the state.

In addition to the 23,950 active establishments in the state during the census year, with a capital of $251,343,381, shown in Table 2, there were 107 idle establishments, with a capital of $2,156,423, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Ammunition	1	$32,000	Liquors, distilled	6	$295,320
Brick and tile	16	220,859	Lumber and timber products	18	25,654
Cooperage	2	48,580	Lumber, planing mill products, including sash, doors, and blinds	5	90,481
Flouring and grist mill products	16	97,755	Pottery, terra cotta, and fire-clay products	2	10,000
Foundry and machine shop products	2	22,826	Slaughtering, wholesale, not including meat packing	1	185,000
Fruits and vegetables, canning and preserving	3	41,890	Tinsmithing, coppersmithing, and sheet-iron working	2	87,000
Furniture, factory product	2	10,935	Woolen goods	1	11,250
Ice, manufactured	1	82,500	All other industries	25	42,870
Iron and steel	2	180,003			
Iron and steel, nails and spikes, cut and wrought, including wire nails	1	285,000			
Lead, smelting and refining	1	386,500			

TABLE 3.—COMPARATIVE SUMMARY OF FOURTEEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

	1890	404	1,060,739	1,294	584,990	275,219	778,492	2,154,882

The 14 leading industries of the state in 1900, as shown in Table 3, embraced 5,139 establishments, or 27.4 per cent of the total number in the state; used a capital of $113,326,395, or 45.4 per cent of the total; gave employment to 59,057 wage-earners, or 43.8 per cent of the total number; and paid $26,401,101, or 43.5 per cent of the total wages. The value of their products was $203,494,824, or 52.8 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that slaughtering and meat packing is the most important industry in the state. The 37 establishments reported in 1900 gave employment to 3,102 wage-earners, or 2.3 per cent of the wage-earners employed in the state, and the products were valued at $43,040,885, or 11.2 per cent of the total value of the products of the state. In 1890 there were 68 establishments, 1,264 wage-earners, and products valued at $18,320,193. The increase in the value of products during the decade was $24,720,692, or 134.9 per cent. This is a greater percentage of increase than is shown for any other selected industry in the state. St. Joseph and St. Louis are principal centers, in the order named. Missouri has profited by the trend of the industry toward the corn states and the great cattle ranges.

The manufacture of tobacco ranks second among the industries of the state, with 602 establishments, 5,231 wage-earners, and products valued at $27,847,432. In 1890 there were 430 establishments, 4,411 wage-earners, and products valued at $17,583,646. The increase in the value of products during the decade was $10,263,786, or 58.4 per cent. Missouri is not one of the great tobacco-growing states, although it raised 9,370,000 pounds in 1898,[1] but it has become a great center for the manufacture of chewing and smoking tobacco and snuff.

There were 1,145 establishments engaged in 1900 in the manufacture of flouring and grist mill products, the industry third in rank, with 1,654 wage-earners, and products valued at $26,393,928. In 1890 there were 710 establishments, 3,011 wage-earners, and products valued at $34,486,795. The decrease in the value of products during the decade was $8,092,867, or 23.5 per cent. Although this industry shows a decline, it is still important. In the state, exclusive of St. Louis, there was a slight increase. The decrease in St. Louis is accredited to the opening up of less developed country to the west and southwest by railway facilities, which connect the great grain-producing centers with the markets by shorter freight lines. One milling firm in St. Louis, which, prior to 1890, shipped annually 150,000 barrels of flour to Texas, now manufactures 1,200 barrels daily in that state. In other instances also the manufacture of flouring and grist mill products is carried on either near the markets or the grain centers.

There were 1,100 establishments engaged in printing and publishing in 1900, with 7,256 wage-earners, and products valued at $15,355,949. In 1890 there were 778 establishments, 7,423 wage-earners, and products valued at $13,004,440. The increase in the value of products during the decade was $2,351,509, or 18.1 per cent.

There were 261 establishments engaged in the manufacture of foundry and machine shop products in 1900, with

[1] Report of the Missouri State Board of Agriculture, 1899, page 6.

7,084 wage-earners, and products valued at $15,073,005. In 1890 there were 186 establishments, 6,754 wage-earners, and products valued at $13,680,773. The increase in the value of products during the decade was $1,392,232, or 10.2 per cent.

There were 49 establishments engaged in the manufacture of malt liquors in 1900, with 3,150 wage-earners, and products valued at $13,776,905. In 1890 there were 30 establishments, 2,834 wage-earners, and products valued at $16,954,137. The decrease in the value of products during the decade was $3,177,232, or 18.7 per cent. Although the value of products decreased from the value reported in 1890, there was an increase in the quantity of products and in the number of establishments, capital, number of wage-earners, and wages paid. There are a number of notable malt liquor establishments in the state, particularly at St. Louis.

There were 50 establishments engaged in the factory manufacture of boots and shoes in 1900, with 5,915 wage-earners, and products valued at $11,253,202. In 1890 there were 29 establishments, 2,716 wage-earners, and products valued at $4,841,004. The increase in the value of products during the decade was $6,412,198, or 132.5 per cent. Although this is a comparatively new industry in the West, Missouri has made a rapid advance. Only one other manufacture in the state exceeds this in percentage of increase in value of products. Missouri is now eighth in rank in the United States in the factory manufacture of boots and shoes; it was ninth in 1890.

There were 1,197 establishments engaged in the manufacture of lumber and timber products in 1900, with 6,043 wage-earners, and products valued at $11,177,529. In 1890 there were 830 establishments, 6,703 wage-earners, and products valued at $8,359,925. The increase in the value of products during the decade was $2,817,604, or 33.7 per cent.

There were 148 establishments engaged in the factory manufacture of men's clothing in 1900, with 6,129 wage-earners, and products valued at $8,925,088. In 1890 there were 59 establishments, 6,113 wage-earners, and products valued at $8,113,852. The increase in the value of products during the decade was $811,236, or 10 per cent.

There were 4 establishments, not operated by steam railroad companies, engaged in the manufacture of steam railroad cars in 1900, with 2,772 wage-earners, and products valued at $7,722,768. In 1890 there were 5 establishments, 1,854 wage-earners, and products valued at $3,974,173. The increase in the value of products during the decade was $3,748,595, or 94.3 per cent. There are only 2 industries in the state that show a larger percentage of increase in value of products.

There were 43 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 5,581 wage-earners, and products valued at $6,524,121. In 1890 there were 27 establishments, 2,859 wage-earners, and products valued at $3,890,542. The increase in the value of products during the decade was $2,633,579, or 67.7 per cent. These establishments are located at railway centers, and the remarkable increase in all particulars shows that Missouri is not only a great distributing center, but a highway for the transportation of commodities.

There were 377 establishments engaged in the manufacture of carriages and wagons in 1900, with 2,583 wage-earners, and products valued at $5,583,364. In 1890 there were 425 establishments, 3,026 wage-earners, and products valued at $5,233,324. The increase in the value of products during the decade was $350,040, or 6.7 per cent.

There were 99 establishments engaged in the manufacture of confectionery in 1900, with 2,058 wage-earners, and products valued at $5,554,384. In 1890 there were 75 establishments, 1,454 wage-earners, and products valued at $3,584,953. The increase in the value of products during the decade was $1,969,431, or 54.9 per cent.

There were 27 establishments engaged in roasting and grinding coffee and spice in 1900, with 499 wage-earners, and products valued at $5,266,264. In 1890 there were 15 establishments, 252 wage-earners, and products valued at $3,892,792. The increase in the value of products during the decade was $1,373,472, or 35.3 per cent.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Kansas City, St. Joseph, St. Louis, and Springfield, as returned at the censuses of 1890 and 1900, with the percentages of increase.

TABLE 4.—COMPARATIVE SUMMARY, KANSAS CITY, ST. JOSEPH, ST. LOUIS, AND SPRINGFIELD, 1890 AND 1900, WITH PER CENT OF INCREASE.

	Year.	Number of establishments.	Capital.	WAGE-EARNERS.		Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

	1890	58.2	85.8	81.6	86.8	89.2	83.4	85.1

[1] Decrease.

It appears from Table 4 that there has been a considerable increase during the past decade in the combined manufactures of these 4 cities. The number of establishments increased from 8,179 to 9,214, or 12.7 per cent; the average number of wage-earners, from 101,397 to 107,609, or 6.1 per cent; and the value of products from $276,071,945 to $305,974,732, or 10.8 per cent. The percentage of increase in each of these particulars was smaller in these 4 cities than in the state as a whole. The city of St. Joseph shows the most rapid growth, the value of products having increased from $11,916,141 to $31,690,736, or 165.9 per cent. This phenomenal increase was caused by the location there of large slaughtering and meat packing plants and industries incident thereto. In St. Louis, the leading city, the number of establishments increased from 6,148 to 6,732, or 9.5 per cent, and the value of products from $229,157,343 to $233,629,733, or 2 per cent, while the average number of wage-earners decreased from 82,911 to 82,672, or three-tenths of 1 per cent. The number of establishments, number of wage-earners, and value of products, in this city in 1900, constituted 35.9, 61.2, and 60.6 per cent, respectively, of the totals for the state. That the increase in the value of products of St. Louis is small, is due, in part, to the removal of manufactures to more favorable localities for fuel and transportation, notably to East St. Louis, Madison, and Granite City, manufacturing points situated opposite St. Louis, on the Mississippi River, and to the West.

Table 5 presents the totals for the manufacturing industries of the 25 cities withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities, and shows their rank in population and in value of products.

Of the 18,754 establishments in the state, 11,017, or 58.7 per cent, were located in these 25 cities. They furnished employment to 117,179 wage-earners, or 86.8 per cent of the total number; and the value of their products, $329,635,915, formed 85.5 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Joplin, Kansas City, St. Joseph, St. Louis, and Springfield by specified industries.

Table 9 shows the totals for all industries in the cities withdrawn from the enumerators, exclusive of those shown in Table 8.

MONTANA.

Montana was organized as a territory with its present area on May 26, 1864. Prior to that date, it formed a part of the territory of Idaho. The Ninth Census (1870) was the first, therefore, in which the statistics of Montana were published separately.

Table 1 shows the manufacturing and mechanical industries as returned at the censuses of 1870 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1870 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.				PER CENT OF INCREASE.		
	1900	1890	1880	1870	1890 to 1900	1880 to 1890	1870 to 1880

Assessed value of real estate	[6]$90,039,356	$54,943,531	$5,077,162	$2,728,128	63.9	982.2	86.1
Value of land and buildings invested in manufactures [7]	$14,162,070	$1,250,430	(8)	(8)	1,032.6		
Per cent of assessed value	15.7	2.3					

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 5.)
[3] Not reported separately.
[4] Not reported.
[5] Exclusive of 11,770 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] As given for the year 1900 in Dana's supplement, "State and City," to the Commercial and Financial Chronicle, under date of April 13, 1901.
[7] Does not include the value of rented property.
[8] Figures not accessible.

The rapid increase, shown in Table 1, for the manufacturing and mechanical industries of the state during the last decade, is due largely to the fact that the totals for 1900 include the smelting and refining of metals. At the censuses of 1880 and 1890 the statistics for smelting and refining were included in the report on mines and mining and not in those on manufactures, while the totals for 1870 included 34 establishments engaged in milling quartz not included in subsequent censuses. Notwithstanding the increase during the past decade, the manufacturing industries are inconsiderable as compared with mining, stock raising, and agriculture, which are the principal industries of the state.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments and establishments with a product of less than $500, neither of which were reported at previous censuses, and, therefore, are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	1,182	$41,002,143	1,261	10,130	$7,974,272	$1,671,587	$32,717,909	$20,625,771	$6,924,211	$5,167,927	$57,112,692
Hand trades [1]	498	1,646,980	567	1,134	918,943	181,938	1,355,446	59,667	1,227,197	68,582	3,236,418
Governmental establishments	3	12,500		4	3,240		7,520	6,700	820		13,755
Establishments with a product of less than $500	99	43,797	109	9	1,146	3,100	7,739	633	7,081	25	23,113
All other establishments	582	39,298,866	585	8,983	7,050,943	1,486,549	31,347,204	20,558,771	5,689,113	5,099,320	53,839,406

[1] Includes bicycle and tricycle repairing, 8; blacksmithing and wheelwrighting, 172; boots and shoes, custom work and repairing, 44; carpentering, 36; clothing, men's, custom work and repairing, 62; clothing, women's, dressmaking, 21; dyeing and cleaning, 6; furniture, cabinetmaking, repairing, and upholstering, 11; lock and gun smithing, 10; masonry, brick and stone, 8; millinery, custom work, 31; painting, house, sign, etc., 22; paper hanging, 2; plastering and stuccowork, 4; plumbing, and gas and steam fitting, 21; taxidermy, 4; watch, clock, and jewelry repairing, 36.

In addition to the 1,182 active establishments, shown in Table 2, with a capital of $41,002,143, there were 8 idle establishments with a capital of $335,248.

Table 3 combines the totals for the industries in Anaconda, Butte, Great Falls, and Helena, and places them in comparison with the totals for the entire state and the state exclusive of these cities.

TABLE 3.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	Wage-earners. Average number.	Wage-earners. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for state	1,080	$40,945,846	1,152	10,117	$7,969,886	$1,668,487	$32,702,650	$57,075,824
Total for urban manufactures	470	25,325,532	502	5,053	4,396,924	871,572	18,413,032	34,396,757
Anaconda	57	17,135,601	54	2,484	2,198,005	323,291	12,098,075	21,334,952
Butte	212	5,683,033	227	1,379	1,355,286	265,989	3,966,492	8,958,782
Great Falls	74	1,409,694	74	624	469,513	185,628	1,642,689	2,558,538
Helena	127	1,097,204	147	566	374,120	96,664	705,776	1,544,485
Total for state exclusive of urban manufactures	610	15,620,314	650	5,064	3,572,962	796,915	14,289,618	22,679,067
Per cent of urban manufactures to total for state	43.5	61.9	43.6	49.9	55.2	52.2	56.3	60.3

It appears from Table 3 that the establishments engaged in the manufacturing and mechanical industries in the 4 cities formed 43.5 per cent of the total number of establishments in the state; gave employment to 49.9 per cent of the total number of wage-earners; paid 55.2 per cent of the total wages; and the value of their product was 60.3 per cent of the total manufactures of the state.

The presentation of statistics in detail for cities is confined to those having a population of 20,000, or over. For Butte, which is the only city of this class in the state, statistics for specified industries are presented in detail in Table 6.

As shown by Table 5 the manufacturing industries of the state are very largely limited to so-called neighbor-

TABLE 4.—MANUFACTURES

	Counties.	Number of establishments.	Capital. Total.	Capital. Land.	Capital. Buildings.	Capital. Machinery, tools, and implements.	Capital. Cash and sundries.	Proprietors and firm members.	Salaried officials, clerks, etc. Number.	Salaried officials, clerks, etc. Salaries.	Average number of wage-earners and total wages. Total. Average number.	Average number of wage-earners and total wages. Total. Wages.

[1] Includes 1 establishment in Crow Indian reservation, included to prevent disclosing operations of individual establishments.

hood industries, the products being consumed at or near the point of production. The exception to this is the smelting and refining of ores. Mineral resources abound in the state, and smelting and refining of copper and lead are the most important branches of manufactures, the development of which has been facilitated by the abundant waterpower of the Missouri River at Great Falls, within easy reach of the copper district. The fall of the river for 10 miles below this point amounts to 512 feet, or more than three times that of the Niagara River at Niagara Falls. It is estimated that the amount of available waterpower is 340,000 horsepower; it is generated at but a fraction of the cost of such power at Niagara.[1]

The smelting and refining industry is also favored by the large coal production in the vicinity,[2] and by the abundance of timber suitable for use in the mines.[3] Cheap and abundant power and the supply of high-grade wheat have also stimulated flour and grist milling. The value of the product of this industry has increased from $302,965 in 1890 to $995,702 in 1900. Slaughtering, wholesale, is reported in 1900 for the first time with a product valued at $934,640. The manufacture of malt liquor has increased from a product valued at $204,645 in 1890 to $1,276,331 in 1900. This industry has been stimulated by the quality of the barley grown in certain parts of the state, and largely exported to the East and abroad, for the use of breweries.[4] The manufacture of coke may be attributed to the demand for it in the reduction works, and to the existence within the state of a suitable coking coal. The product of the coke ovens in 1900 was valued at $356,190. Twelve million acres of timber land within the state[5] furnish abundant raw material for sawmills, and a product valued at $2,949,992 was reported for this industry in 1900.

The detailed statistics of the census of 1900 are presented in the 4 tables which follow.

Table 4 shows the totals for the state by counties.

Table 5 shows the totals for the state by specified industries.

Table 6 shows the totals for the city of Butte by specified industries.

Table 7 shows the totals for all industries in the cities withdrawn from the enumerators, exclusive of Butte, shown in Table 6.

NEBRASKA.

Nebraska was organized as a territory in 1854, and therefore first appeared in census statistics in 1860.

Table 1 shows the manufacturing and mechanical industries of Nebraska as returned at the censuses of 1860 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate.

TABLE 1.—COMPARATIVE SUMMARY, 1860 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.					PER CENT OF INCREASE.			
	1900	1890	1880	1870	1860	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870
Number of establishments	5,414	3,014	1,403	670	107	79.6	114.8	109.4	526.2

[1] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[2] Not reported separately.
[3] Decrease.
[4] Not reported.
[5] As given in the Biennial Report of the Auditor of Public Accounts to the Governor of the State of Nebraska, under date of November 30, 1900, page 118.
[6] Does not include value of rented property.

Although Nebraska is an agricultural and stock-raising state, Table 1 shows that there has been a considerable growth in its manufacturing and mechanical industries during the last forty years. The population during these years increased from 28,841 to 1,066,300, while the average number of wage-earners employed in manufacturing establishments increased from 336 to 24,461, embracing, in 1900, 2.3 per cent of the entire population, compared with 1.2 per cent in 1860. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 33,845, or 3.2 per cent of the total population of the state. The last decade shows an increase of $50,952,308, or 54.8 per cent, in the value of products of manufactures. This increase is especially noteworthy because it was not accompanied by any appreciable increase in the population of the state. The greatest absolute increase, $80,410,458, in the value of products was in the decade 1880 to 1890.

While agricultural and stock-raising products are the basis of a large part of the manufactures of Nebraska, the state possesses other advantages, which are beginning to stimulate manufacturing in different lines. The Missouri River, forming the eastern boundary of the state for 500 miles, and navigable for 200 miles above the city of Omaha, furnishes cheap transportation north and south, while the 15 railroads which enter the city of Omaha afford shipping facilities in other directions. The value of products reported for Douglas and Otoe counties, which border upon the Missouri River and include the cities of Omaha, South Omaha, and Nebraska City, was $118,389,890, or 82.2 per cent of the total for the entire state. The lack of cheap fuel has been the greatest hindrance to manufacturing in Nebraska, but conditions have improved with the development of the coal fields of Iowa, Kansas, and Missouri.[1] Waterpower is used to some extent for manufacturing purposes at Gothenburg, Kearney, and Loup.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for educational and eleemosynary institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products including custom work and repairing.
Total	6,775	$72,471,976	7,391	24,641	$11,582,599	$6,968,097	$102,312,958	$70,629,173	$28,819,430	$2,864,355	$144,339,432
Hand trades[1]	2,703	3,446,478	3,069	4,217	2,013,260	556,322	4,215,777	50,363	4,008,739	156,675	9,510,267
Educational and eleemosynary institutions	5	6,200	-------	2	695	1,708	3,891	392	3,063	436	8,275
Establishments with a product of less than $500	1,356	483,649	1,449	178	11,216	30,990	111,360	6,451	104,909	----------	341,055
All other establishments	2,711	68,535,649	2,873	20,244	9,557,428	6,379,077	97,981,930	70,571,967	24,702,719	2,707,244	134,479,835

[1] Includes bicycle and tricycle repairing, 51; blacksmithing and wheelwrighting, 939; boots and shoes, custom work and repairing, 196; carpentering, 296; clothing, men's, custom work and repairing, 193; clothing, women's, dressmaking, 104; dyeing and cleaning, 11; furniture, cabinetmaking, repairing, and upholstering, 55; lock and gun smithing, 16; masonry, brick and stone, 79; millinery, custom work, 318; painting, house, sign, etc., 136; paper hanging, 12; plastering and stuccowork, 34; plumbing, and gas and steam fitting, 81; sewing machine repairing, 3; taxidermy, 2; typewriter repairing, 3; watch, clock, and jewelry repairing, 174.

Of the 6,775 establishments of all classes, shown in this table, 4,059, or 59.9 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $9,851,322, or only 6.8 per cent of the total value of the products of the state.

In addition to the 6,775 active establishments in the state during the census year, with a capital of $72,471,976, shown in Table 2, there were 37 idle establishments, with a capital of $297,232, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Brick and tile	10	$51,715	Lumber, planing mill products, including sash, doors, and blinds	1	$18,000
Cheese, butter, and condensed milk, factory product	3	10,960	Slaughtering and meat packing, wholesale	2	109,500
Flouring and grist mill products	7	50,550	Woolen goods	1	16,237
Food preparations	1	11,000	All other industries	12	29,270

TABLE 3.—COMPARATIVE SUMMARY OF NINE LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

The 9 leading industries of the state in 1900, as shown by Table 3, embraced 1,520 establishments, or 28.1 per cent of the total number in the state; used a capital of $33,971,417, or 47.2 per cent of the total; gave employment to 13,387 wage-earners, or 54.7 per cent of the total number; and paid $6,669,681, or 57.6 per cent of the total wages. The value of their products was $92,372,460, or 64.2 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products. This table reveals the close relation existing between the manufactures of Nebraska and its agricultural and stock-raising interests. Four industries dependent upon agriculture and stock raising are the manufacture of cheese, butter, and condensed milk, of flouring and grist mill products, of malt liquors, and of slaughtering and meat packing. The combined value of the products of these 4 industries was $82,806,527, or 89.6 per cent of the total value of the products of the leading industries shown in Table 3.

Table 3 shows that slaughtering and meat packing is the most important industry in the state. The 8 establishments reported in 1900 gave employment to 6,083 wage-earners, or 24.9 per cent of the wage-earners employed in the state, and the products were valued at $71,018,339, or 49.3 per cent of the total value of the products of the state. In 1890 there were 6 establishments, 1,863 wage-earners, and products valued at $24,026,876. The increase in the value of products during the decade was $46,991,463, or 195.6 per cent. The development of the industry in Nebraska during the last two decades has been remarkable. Meat packing was carried on in Omaha as early as 1871,[1] and in 1880 the products of the industry in the state were valued at $1,359,397. The first great advance was made in 1884, when the Union Stock Yards Company located its plant on farming land south of Omaha.[2] The city of South Omaha, which has grown up around these stock yards, had, in 1900, a population of 26,001, and was one of the largest stock markets in the United States.[3] Its situation on the Missouri River, the boundary between its own state and Iowa, has afforded special advantages for the growth of its great industry. Both states are superior "feeding states," Iowa ranking first and Nebraska third, in 1900,[4] in the production of corn. Slaughtering and meat-packing establishments are also located at Geneva, Nebraska City, and West Lincoln. In addition to the supplies of live stock bred in Nebraska and in Iowa, the stock yards receive sheep and "canning cattle" from many other states, while thousands of young animals are annually brought to the feed lots of Nebraska to be fattened on corn.[5]

The manufacture of flouring and grist mill products ranks second among the industries of the state, with 305 establishments, 698 wage-earners, and products valued at $8,100,794. In 1890 there were 185 establishments, 690 wage-earners, and products valued at $6,365,492. The increase in the value of products during the decade was $1,735,302, or 27.3 per cent. The 305 mills reported in 1900 were scattered over the state in more than two hundred different localities. Many were small, the average number of wage-earners employed per establishment during the census year being less than three. Nevertheless, the wheat-flour product of Nebraska was alone valued at $5,319,911.

There were 554 establishments engaged in printing and publishing in 1900, the industry third in rank, with 1,883 wage-earners, and products valued at $3,431,582. In 1890 there were 443 establishments, 1,771 wage-earners, and products valued at $3,222,368. The increase in the value of products during the decade was $209,214, or 6.5 per cent. Omaha is the headquarters of what is said to be one of the most extensive printing establishments of its kind in the United States. Plants are operated in 12 cities in Nebraska and other states, and partly printed sheets are supplied to country newspapers in the territory lying between the Mississippi River and the Rocky Mountains.[6]

There were 23 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 2,458 wage-earners, and products valued at $2,624,461. In 1890 there were 9 establishments, 2,041 wage-earners, and products valued at $2,067,908. The increase in the value of products during the decade was $556,553, or 26.9 per cent.

There were 93 establishments engaged in the manufacture of cheese, butter, and condensed milk in 1900, with 333 wage-earners, and products valued at $2,253,893. In 1890 there were 58 establishments, 428 wage-earners, and products valued at $1,183,000. The increase in the value of products during the decade was $1,070,893, or 90.5 per cent. The first creamery in Nebraska was built in 1881. Many of those reported in 1900 were conducted on the cooperative plan. One establishment, located at Lincoln, is said to be the largest of its kind in the United States. Skimming or separating stations, located in 77 different localities in southern Nebraska and northern Kansas, send their cream to the central station at Lincoln to be manufactured into butter.[7]

There were 391 establishments engaged in the manufacture of saddlery and harness in 1900, with 583 wage-earners, and products valued at $1,783,742. In 1890 there were 151 establishments, 419 wage-earners, and products valued at $1,028,540. The increase in the value of products during the decade was $755,202, or 73.4 per cent.

There were 19 establishments engaged in the manufacture of malt liquors in 1900, with 200 wage-earners, and products valued at $1,433,501. In 1890 there were 14 establishments, 172 wage-earners, and products valued at

$1,079,865. The increase in the value of products during the decade was $353,636, or 32.7 per cent. The first brewery in the state was erected at Omaha in 1859.[1] The industry has been favored by the large quantity of barley raised in the adjoining state of Iowa, whose production of this cereal in 1900 was second only to that of California.[2]

There were 21 establishments engaged in the manufacture of planing mill products in 1900, with 294 wage-earners, and products valued at $886,333. In 1890 there were 24 establishments, 497 wage-earners, and products valued at $1,112,412. The decrease in the value of products during the decade was $226,079, or 20.3 per cent.

There were 106 establishments engaged in the manufacture of brick and tile in 1900, with 855 wage-earners, and products valued at $839,815. In 1890 there were 155 establishments, 2,586 wage-earners, and products valued at $2,173,632. The decrease in the value of products during the decade was $1,333,817, or 61.4 per cent.

In addition to the industries included in Table 3, attention may be called to the manufacture of beet sugar, distilled liquors, and the smelting and refining of lead. Experiments in the growing of sugar beets were made in 1886. A bounty of 1 cent per pound of sugar manufactured was granted by the state legislature in 1889, and the first factory was established in 1890.[3] In 1900 there were 3 establishments in the state, 174 wage-earners, and products valued at $481,593. In the city of Omaha are located one of the largest distilleries and one of the largest lead smelting and refining works in the United States, but as these are the only establishments in the state in these industries, their statistics are not shown separately.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Lincoln and Omaha, as returned at the censuses of 1890 and 1900, with the percentages of increase.

TABLE 4.—COMPARATIVE SUMMARY, LINCOLN AND OMAHA, 1890 AND 1900, WITH PER CENT OF INCREASE.

	Year.	Number of establishments.	Capital.	Wage-earners. Average number.	Wage-earners. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
The State	1900	5,414	$71,982,127	24,461	$11,570,688	$6,935,399	$102,197,707	$143,990,102

Total for 2 cities	1900	1,088	37,087,006	9,273	4,593,432	4,131,148	24,384,918	47,274,827
	1890	857	20,680,048	9,863	5,761,545	3,943,258	30,794,725	46,049,459
Per cent of increase		27.0	79.3	[1]6.0	[1]20.3	4.8	[1]20.8	2.7
Per cent of 2 cities to total for state	1900	20.1	51.5	37.9	39.7	59.6	23.9	32.8
	1890	28.4	55.0	48.2	56.1	73.1	45.7	49.5

[1] Decrease.

It appears from Table 4 that the number of establishments in these 2 cities increased during the decade from 857 to 1,088, or 27 per cent; and the value of products from $46,049,459 to $47,274,827, or 2.7 per cent; while the average number of wage-earners decreased from 9,863 to 9,273, or 6 per cent. The increase in the number of establishments and in the value of products has been much smaller in these 2 cities than in the state as a whole, and the decrease in the average number of wage-earners is in contrast with an increase in the state. The city of Lincoln shows the more rapid growth, the value of products having increased from $3,710,138 in 1890 to $4,105,951 in 1900, or 10.7 per cent.

South Omaha, the leading manufacturing city of the state, was not separately reported at the census of 1890, and its growth, therefore, cannot be shown. In 1900 the value of its products was 48.7 per cent of the total for the state, although it had but 2.4 per cent of the total population.

In Omaha, the leading city of the state in population, the number of establishments increased during the decade from 675 to 838, or 24.1 per cent; and the value of products from $42,339,321 to $43,168,876, or 2 per cent; while the number of wage-earners decreased from 8,223 to 7,537, or 8.3 per cent. The number of establishments, the number of wage-earners, and the value of products in this city in 1900 constituted 15.5, 30.8, and 30 per cent, respectively, of the totals for the entire state.

Table 5 presents the totals for the manufacturing industries of the 10 cities withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities, and shows their rank in population and in value of products.

Of the 5,414 establishments in the state, 1,860, or 34.4 per cent, were located in these 10 cities. They furnished employment to 19,087 wage-earners, or 78 per cent of the total number, and the value of their products, $126,484,931, formed 87.8 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Lincoln, Omaha, and South Omaha by specified industries.

Table 9 shows the totals for all industries in the cities withdrawn from the enumerators, exclusive of those shown in Table 8.

NEVADA.

Table 1 shows the manufacturing and mechanical industries of the state of Nevada as returned at the censuses of 1870 (the first census at which separate totals were published) to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1870 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.				PER CENT OF INCREASE.

Per cent of assessed value	2.8	4.7					

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 5.)
[3] Not reported separately.
[4] Not reported.
[5] Exclusive of 1,673 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] Annual Report of State Controller of Nevada, 1900, page 38.
[7] Does not include value of rented property.

The decrease in the manufacturing industries of the state, as indicated by the statistics presented in Table 1, reflects the decline of gold and silver mining, which has always been the chief industry of the state. The discovery of silver in Nevada in 1858 caused an influx of immigrants, and the population continued to increase until soon after 1880. About this time thousands of miners left the state by reason of the apparent exhaustion of some of the richer deposits of gold and silver, and the general decrease has continued to the present time. The majority of the manufacturing establishments of the state are embraced by the neighborhood industries—that is, establishments engaged in the production or repair of articles for local consumption—and naturally the decrease in population has brought about a decrease in this class of industries. The state showed an actual decline in the number of establishments reported, and in the value of their products in 1880 as compared with 1870. This decrease is attributable in part to the fact that the figures for 1870 contained reports from 93 quartz-milling establishments with a product of $12,119,719,[1] not included in subsequent censuses.

[1] Ninth Census of the United States, Industry and Wealth, page 544.

From 1880 to 1890 there was a further decrease in the number of establishments reporting in the state, in the capital invested, and in the value of products amounting, in the latter item, to 49.3 per cent. From 1890 to 1900 the statistics indicate an increase in all of the items reported, and more particularly in the number of establishments, where the increase equals 140 per cent, the increase in the value of the product equaling 48.7 per cent. It seems altogether probable that this increase is more apparent than real and does not accurately represent existing conditions in the state of Nevada. It is a state exceedingly difficult to canvass owing to the sparse settlement of a great area of country; and the canvass of manufacturing and mechanical industries at the census of 1890 was undoubtedly defective. The closer and more careful canvass made in 1900 must be accepted as the explanation of the contradictory character of the statistics.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for a governmental establishment, an institution, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	261	$1,531,789	278	617	$426,692	$69,628	$832,058	$298,892	$447,045	$86,121	$1,673,880
Hand trades[1]	95	123,675	104	67	45,297	12,263	87,205		74,202	13,003	237,848
Governmental establishment	1	28,400		7	7,900	445	1,650		1,420	230	19,500
Eleemosynary institution	1	3,540		7	1,400		1,613		1,573	40	3,013
Establishments with a product of less than $500	31	27,065	31	2	660	726	2,657	25	2,632		7,692
All other establishments	133	1,349,109	143	534	371,435	56,194	738,933	298,867	367,218	72,848	1,405,827

[1] Includes bicycle and tricycle repairing, 2; blacksmithing and wheelwrighting, 49; boots and shoes, custom work and repairing, 14; carpentering, 3; clothing, men's, custom work and repairing, 9; clothing, women's, dressmaking, 1; furniture, cabinetmaking, repairing, and upholstering, 2; lock and gun smithing, 1; millinery, custom work, 4; painting, house, sign, etc., 1; plumbing, and gas and steam fitting, 3; watch, clock, and jewelry repairing, 6.

Of the 261 establishments of all classes shown in this table, 126, or 48.3 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $245,540, or only 14.7 per cent of the total value of the products of the state.

In addition to the 261 active establishments in the state during the census year, with a capital of $1,531,789, shown in Table 2, there were 6 idle establishments with a capital of $98,285.

Table 3 presents the totals for the manufacturing industries of the 3 cities withdrawn from the enumerators and places them in comparison with the totals for the entire state and the state exclusive of these cities.

TABLE 3.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for state	228	$1,472,784	247	601	$416,732	$68,457	$826,138	$1,643,675
Total for urban manufactures	109	620,522	114	216	156,533	39,479	281,719	637,232
Carson City	36	260,434	39	71	57,434	17,377	61,977	185,387
Reno	51	320,833	54	122	86,745	16,762	200,350	392,707
Virginia City	22	39,255	21	23	12,354	5,340	19,392	59,138
Total for state exclusive of urban manufactures	119	852,262	133	385	260,199	28,978	544,419	1,006,443
Per cent of urban manufactures to total for state	47.8	42.1	46.2	35.9	37.6	57.7	34.1	38.8

Of the 228 establishments in the state, 109, or 47.8 per cent, were located in these 3 cities. They furnished employment to 216 wage-earners, or 35.9 per cent of the total number of wage-earners in the state, and the value of their products formed 38.8 per cent of the total for the state.

Table 4 shows the totals for the state by counties.

Table 5 shows the totals for the state by specified industries. This table indicates that car construction and general shop work of steam railroad companies was the leading manufacturing industry of the state, followed by the flouring and grist mill industry, and the printing and publishing of newspapers and periodicals.

Table 6 shows the totals for all industries in the cities withdrawn from the enumerators.

TABLE 4.—MANUFACTURES

NEW HAMPSHIRE.

Table 1 shows the manufacturing and mechanical industries of the state of New Hampshire as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] As given in "Valuation and Taxation, State of New Hampshire, for 1900," page 41.
[6] Does not include value of rented property.

Table 1 reveals the generally steady growth of the manufacturing industries of New Hampshire during the half century. This progress becomes the more striking when compared with the slow growth of population. Since 1850 the population has increased only 29.4 per cent, but the average number of wage-earners has increased from 27,092 to 70,419, a gain of 159.9 per cent. The wage-earners in 1900 constituted 17.1 per cent of the total population, while in 1850 they constituted only 8.5 per cent. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 86,776, or 21.1 per cent of the total population of the state. The increase in the number of wage-earners decade by decade indicates that the growth in manufactures throughout the entire period was rapid and fairly uniform. The value of products and the amount paid for wages as given in the table show greater fluctuations. The values for 1870, however, were expressed in a currency which was at a discount in gold, and should, therefore, be reduced by about one-fifth for purposes of comparison with other census years. The decade from 1890 to 1900 shows an increase in the value of products of 38.4 per cent, which is greater than for any decade since 1870.

The result of this half century of development is that manufacturing has now become the leading industry of New Hampshire, while in 1850 the leading position was held by agriculture. The manufactures are mostly located in the southern part of the state. The proximity of this section to the business and financial center of New England, the abundant waterpower, and the excellent harbor at Portsmouth are important elements which have contributed to the development of its manufactures.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for educational and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	5,267	$101,370,866	5,754	70,786	$27,654,404	$6,371,491	$66,505,701	$22,200,721	$41,508,070	$2,796,910	$119,025,902
Hand trades[1]	2,211	3,192,894	2,417	5,158	2,312,078	392,850	3,361,685	7,278	3,251,778	102,629	8,308,491
Educational and penal institutions	5	130,790	-------	186	20,508	2,911	107,849	19,500	87,444	905	158,310
Establishments with a product of less than $500	593	310,415	627	181	13,649	12,449	49,258	7,190	42,020	48	168,284
All other establishments	2,460	97,736,767	2,710	65,261	25,308,169	5,963,281	62,986,909	22,166,753	38,126,828	2,693,328	110,400,817

[1] Includes bicycle and tricycle repairing, 65; blacksmithing and wheelwrighting, 538; boots and shoes, custom work and repairing, 193; carpentering, 231; clothing, men's, custom work and repairing, 129; clothing, women's, dressmaking, 209; dyeing and cleaning, 9; furniture, cabinetmaking, repairing, and upholstering, 48; lock and gun smithing, 17; masonry, brick and stone, 96; millinery, custom work, 191; painting, house, sign, etc., 231; paper hanging, 7; plastering and stuccowork, 4; plumbing, and gas and steam fitting, 108; sewing machine repairing, 5; taxidermy, 3; watch, clock, and jewelry repairing, 127.

Of the 5,267 establishments of all classes shown in this table, 2,804, or 53.2 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $8,471,775, or only 7.1 per cent of the total value of the products of the state.

In addition to the 5,267 active establishments in the state during the census year, with a capital of $101,370,866, shown in Table 2, there were 48 idle establishments, with a capital of $822,951, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital	INDUSTRIES.	Number of idle establishments.	Capital.
Boots and shoes, factory product	2	$100,000	Marble and stone work	2	$24,200
Brick and tile	5	11,250	Painting, house, sign, etc	1	10,000
Electrical apparatus and supplies	1	31,598	Wood, turned and carved	1	20,000
Flouring and grist mill products	2	11,000	Woodenware, not elsewhere specified	1	20,000
Foundry and machine shop products	2	195,000	Woolen goods	3	274,350
Kaolin and other earth grinding	1	14,300	Worsted goods	1	29,000
Lumber and timber products	12	50,295	All other industries	14	31,958

TABLE 3.—COMPARATIVE SUMMARY OF TEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for selected industries for state	1900	1,040	$76,847,141	49,828	$18,564,054	$3,762,119	$52,059,848	$85,528,450

The 10 leading industries of the state in 1900, shown in Table 3, embrace 1,040 establishments, or 22.3 per cent of the total number in the state; $76,847,141, or 76.1 per cent of the total capital; 49,828, or 70.8 per cent of the total number of wage-earners; $18,564,054, or 67.2 per cent of the total wages; and $85,528,450, or 72 per cent of the total value of products. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products. It appears that the leading industry of the state is the manufacture of boots and shoes. The 67 establishments reported for this industry gave employment to 12,007 wage-earners, or 17.1 per cent of the wage-earners employed in the state, and the products were valued at $23,405,558, or 19.7 per cent of the total value of the products of the state. In 1890 the products were valued at $11,986,003. The increase from 1890 to 1900 was $11,419,555, or 95.3 per cent.

The boot and shoe factories are largely located in cities and towns in the southern part of the state where the industry early gained a foothold, due to the proximity of these places to Lynn and Haverhill, shoe centers of Massachusetts. Until the application of machinery to the industry, after the Civil War, stock for shoes was cut in the factories located in these centers, and put out for manufacture to the people in the adjoining towns of the state and in New Hampshire. So great became the demand for this kind of labor between the years 1825 and 1850 that "nearly every boy in the southeastern towns of New Hampshire who could hold a lapstone was either an apprentice or a full-fledged workman."[1] The work was carried on either in the houses of farmers or in small shops. In 1856, in the typical town of Northwood, there were at least 100 of these small shoemaking shops. The introduction of machinery displaced this labor and the various towns established local factories to retain their shoemaking population. There is record of the building of 27 shoe factories between 1870 and 1895 by associations of business men in almost as many cities and towns of the state. These were leased to experienced shoe manufacturers, usually from Lynn or Haverhill, and were generally exempted from local taxation for ten years.[2]

The manufacture of cotton goods, for years the leading industry of the state, now ranks second with 23 establishments, having a capital of $29,261,835, 20,454 wage-earners, and products valued at $22,998,249, as compared in 1890 with 27 establishments, $26,801,933 capital, 19,383 wage-earners, and products valued at $21,958,002. The importance of the industry is due largely to the water-power of the state. In 1804, fourteen years after Samuel Slater built the first successful cotton factory in the country at Pawtucket, R. I., one of his employees, Charles Robbins, constructed a mill at New Ipswich, N. H.[3] Five years later Benjamin Pritchard, housewright of the New Ipswich mill, established a mill where the city of Manchester now stands.[4] The growth of the industry has been steady. "In 1826 four hundred distinct buildings for the manufacture of cotton had been built in the United States, and of these 50 belonged to New Hampshire,"[5] while the value of the land and buildings used for this purpose in the state in 1900, together with the machinery, amounted to $15,685,459.

Wool manufactures rank third in importance with 45 establishments, having a capital of $11,280,295, 5,461 wage-earners, and products valued at $10,381,056, as compared in 1890 with 52 establishments, 6,102 wage-earners, and products valued at $10,963,250. In 1801, at New Ipswich, James Sanderson established the first carding mill in the state. This developed gradually into a full-fledged woolen mill.[6] In 1823 there were 307 carding machines in the state, 256 fulling mills, and 18 woolen factories.[7] The value of the products shows a decrease of 5.3 per cent since 1890, due in part to the lower prices of woolen and worsted goods.

The manufacture of lumber and timber products ranks fourth among the industries of the state with 553 establishments, having a capital of $11,382,114, 4,188 wage-earners, and products valued at $9,218,310. The value of the products in 1890 was $5,641,445, showing an increase during the last decade of $3,576,865, or 63.4 per cent. This is the oldest manufacturing industry in the state. New Hampshire, unlike several of the neighboring colonies, was founded for the purpose of trade, the intention of Captain Mason, the proprietor of the region, being to exploit its lumber and fisheries. He accordingly procured from Denmark several men "skilled in the sawing of plank" who established previous to 1635, near Portsmouth, what is claimed to be the first sawmill in New England of which there is any distinct record.[8] The original forests of white pine, chiefly in the Connecticut Valley, are now practically exhausted, but over large areas there has been a second growth and this, together with the spruce of the northern part of the state, is being used by the mills.[9] In 1896 it was estimated that forests still covered more than 60 per cent of the area of the state.[10]

The manufacture of paper and wood pulp is fifth in rank with 29 establishments, having a capital of $8,163,081, 2,391 wage-earners, and products valued at $7,244,733, including sulphite fiber, valued at $2,711,278; news paper, valued at $2,078,604; and bogus or wood manila paper, valued at $629,401. There was a very decided growth

in these manufactures during the last decade, the value of the products in 1890 being $1,282,022, an increase during this period of $5,962,711, or 465.1 per cent. The industry existed in the state as early as 1823, and 12 paper mills were reported for that year.[1] In addition to the waterpower of the state available for this manufacture, there is also an abundance of spruce, the variety of wood more largely used than any other for material in this industry. Wood, wood pulp, and wood fiber have in recent years become the most important materials used in the manufacture of paper, and in 1900 constituted 40 per cent of the total cost of materials used in this industry in the United States.

The foundry and machine shop industry ranks sixth with 87 establishments, having a capital of $2,894,474, 1,979 wage-earners, and products valued at $3,049,334, as compared in 1890 with 76 establishments, $3,658,689 capital, 2,034 wage-earners, and products valued at $2,895,716. This industry has had a steady growth during recent years.

The tanning and currying of leather ranks seventh with 12 establishments, having a capital of $1,900,277, 552 wage-earners, and products valued at $2,664,942, as compared in 1890 with 18 establishments, $1,303,992 capital, 668 wage-earners, and products valued at $2,988,209. The abundance of bark suitable for tanning purposes early made the tanning of leather a considerable industry. What is said to be "practically the first incorporated company in this business" in the country was formed in 1809, under the name of the Hampshire Leather Manufacturing Company of Massachusetts, to operate extensive tanneries in New Hampshire belonging to Colonel William Edwards. This noted leather manufacturer had established himself in the state as early as 1790, and because of the extensive improvements he introduced in the mechanism and arrangement of the tannery, left a considerable impress upon the business of that period.[2] In 1823 there were 193 "bark mills" and 304 tanneries in the state.[3] In 1880 the value of the leather, tanned and curried, reached its maximum, $4,477,350, and has declined since that date owing to the increasing scarcity of bark.

The manufacture of hosiery and knit goods ranks eighth with 22 establishments, having a capital of $2,525,286, 2,492 wage-earners, and products valued at $2,592,829, as compared in 1890 with 37 establishments, $2,706,065 capital, 3,121 wage-earners, and products valued at $3,481,922. The industry became properly a branch of manufacturing by the successful use of a power machine at Cohoes, N. Y., in 1832, and in 1839 the largest stocking factory in New England began operations at Portsmouth, N. H.[4] In 1846 the first knitting mill was erected at Laconia, a town which has since become noted as a center for the industry.

Flour and grist milling ranks ninth with 149 establishments, having a capital of $1,004,990, 185 wage-earners, and products valued at $2,505,936. This was naturally one of the earliest industries in the state. In 1661 permission to erect a windmill for grinding corn was granted to Captain Pendleton by the selectmen of Portsmouth.[5] The value of the products in 1900, as compared with 1890, shows an increase of $147,320, or 6.2 per cent.

The last of the industries included in Table 3 is the factory manufacture of cheese, butter, and condensed milk. The number of establishments reported is 53, with 119 wage-earners, and a product valued at $1,467,503. The increase in the value of the product in 1900 over 1890 is $973,037, or 196.8 per cent.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the city of Manchester as returned at the censuses of 1880, 1890, and 1900, with the percentages of increase.

TABLE 4.—COMPARATIVE SUMMARY, MANCHESTER, 1880, 1890, AND 1900, WITH PER CENT OF INCREASE.

	DATE OF CENSUS.			PER CENT OF INCREASE.	
	1900	1890	1880	1890 to 1900	1880 to 1890
Number of establishments	577	386	121	49.5	219.0
Capital	$22,426,125	$22,424,968	$15,149,153	(1)	48.0
Wage-earners, average number	19,032	15,351	10,838	24.0	41.6
Total wages	$7,030,966	$5,950,234	$3,370,404	18.2	76.5
Miscellaneous expenses	$1,548,205	$1,072,875	(2)	44.3	-------
Cost of materials used	$14,755,640	$11,872,289	$7,901,066	24.3	50.3
Value of products, including custom work and repairing	$26,607,600	$20,187,295	$14,136,305	31.8	42.8

[1] Less than one-tenth of 1 per cent.
[2] Not reported.

It appears from Table 4 that there has been a considerable increase during the past decade in the manufactures of the city. The number of establishments increased from 386 to 577, or 49.5 per cent; the average number of wage-earners from 15,351 to 19,032, or 24 per cent; and the value of the products from $20,187,295 to $26,607,600, or 31.8 per cent. There were 577 establishments in Manchester in 1900, or 12.4 per cent of the entire number in the state. These establishments had a combined capital amounting to $22,426,125, or 22.2 per cent of all the capital employed in the state. Of the wage-earners, 19,032, or 27 per cent of all in the state, were employed

in Manchester. The total amount of wages paid in the city amounted to $7,030,966, or 25.5 per cent of all wages paid in the state. The value of products, including custom work and repairing, during 1900 was $26,607,600, or 22.4 per cent of the total products of the state.

Table 5 presents the totals for the manufacturing industries of the 29 cities and towns withdrawn from the enumerators and places them in comparison with the totals for the entire state, and the state exclusive of these cities and towns.

Per cent of urban manufactures to total for state	65.8	79.0	65.1	80.9	81.4	85.9	79.3	79.2	-------	-------	56.0	-------	-------

Of the 4,671 establishments in the state, 3,074, or 65.8 per cent, are located in these 29 cities and towns. The capital reported for these establishments is $79,753,617, or 79 per cent of that for the entire state. They furnished employment to 56,935 wage-earners, or 80.9 per cent of the total number; paid $22,478,399 in wages, or 81.4 per cent of the total amount; and the value of their products, $94,024,532, formed 79.2 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Manchester and Nashua by specified industries.

Table 9 shows the totals for all industries in the cities and towns withdrawn from the enumerators, exclusive of those shown in Table 8.

TABLE 6.—MANUFACTURES

NEW JERSEY.

Table 1 shows the manufacturing and mechanical industries of the state of New Jersey as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860

Value of land and buildings invested in manufactures [6]	$118,767,360	$66,835,493	(3)	(3)	(3)	(3)	77.7				
Per cent of assessed value	15.3	11.9									

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] As given in the Tenth Annual Report of the State Board of Taxation of the state of New Jersey, for the year ending October 31, 1900, page 11.
[6] Does not include value of rented property.

Table 1 shows that there has been a large growth in the manufacturing and mechanical industries of New Jersey during the half century. The population during these years increased from 489,555 to 1,883,669, while the average number of wage-earners employed in manufacturing establishments increased from 37,830 to 241,582, embracing, in 1900, 12.8 per cent of the entire population, compared with 7.7 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 307,933, or 16.3 per cent of the total population of the state. The greatest percentage of increase in the value of products, 121.8, is shown for the decade ending with 1870, but the greatest absolute increase, $257,175,362, was between the years 1890 and 1900.

In the value of manufactured products New Jersey ranked sixth in the United States at the censuses of 1870, 1880, 1890, and 1900. Among the causes of the great development in productive industry, indicated in Table 1, are the exceptionally favorable geographical position of the state, and the transportation facilities furnished by the railroads which connect its manufacturing centers with the Hudson River, New York Bay, Staten Island Sound, and Raritan Bay. There are seven trunk-line railroad systems in the state, all having terminals close to New York Bay, the total mileage in 1899 being 2,242 miles.[1] It is necessary to transport the coal needed for manufacturing over comparatively short distances, the center of the anthracite coal district of Pennsylvania being but about fifty miles from the western border of the state, and one hundred and twenty-five miles from the eastern border. Much of the pig iron used by manufacturers comes from Morris and Warren counties, in the northern part of the state.[2] Four railroad lines connect this region with the chief manufacturing centers. The industrial growth of the state has been stimulated also by the proximity to the markets of New York city on the east and Philadelphia on the west.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments, educational, eleemosynary, and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	17,680	$503,514,032	18,713	242,096	$110,128,062	$42,735,581	$361,135,755	$89,001,150	$256,457,216	$15,677,389	$612,423,738
Hand trades[1]	7,180	17,312,747	7,939	22,585	12,581,411	3,064,631	19,636,815	258,141	19,043,102	335,572	45,837,913
Governmental establishments	2	4,750		4	2,204	804	5,380	4,295	720	365	11,961
Educational, eleemosynary, and penal institutions	5	78,844		66	10,482	2,211	21,818		12,636	9,182	56,636
Establishments with a product of less than $500	2,192	606,356	2,275	444	26,771	78,490	162,714	12,929	149,785		606,208
All other establishments	8,301	485,511,335	8,499	218,997	97,507,194	39,589,445	341,309,028	88,725,785	237,250,973	15,332,270	565,911,020

[1] Includes bicycle and tricycle repairing, 390; blacksmithing and wheelwrighting, 1,183; boots and shoes, custom work and repairing, 969; carpentering, 889; clothing, men's, custom work and repairing, 632; clothing, women's, dressmaking, 550; dyeing and cleaning, 46; furniture, cabinetmaking, repairing, and upholstering, 215; lock and gun smithing, 63; masonry, brick and stone, 297; millinery, custom work, 303; painting, house, sign, etc., 678; paper hanging, 66; plastering and stuccowork, 34; plumbing, and gas and steam fitting, 639; sewing machine repairing, 12; taxidermy, 6; watch, clock, and jewelry repairing, 298.

Of the 17,680 establishments of all classes shown in this table, 9,372, or 53 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $46,444,121, or only 7.6 per cent of the total value of the products of the state.

In addition to the 17,680 active establishments in the state during the census year, with a capital of $503,514,032, shown in Table 2, there were 92 idle establishments, with a capital of $4,867,586, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Babbitt metal and solder	1	$17,400	Ice, manufactured	1	$39,500
Boots and shoes, factory product	1	18,800	Iron and steel	5	674,543
Boots and shoes, rubber	1	105,000	Leather, tanned, curried, and finished	3	25,300
Brick and tile	6	164,850	Lime and cement	1	500,000
Carpets and rugs, other than rag	2	24,000	Matches	1	20,000
Chemicals	1	30,225	Paving and paving materials	2	36,860
Electrical apparatus and supplies	2	365,000	Paper and wood pulp	2	48,852
Explosives	1	65,000	Pottery, terra cotta, and fire-clay products	5	120,967
Flouring and grist mill products	5	61,700	Saddlery and harness	1	13,500
Fruits and vegetables, canning and preserving	3	25,060	Shipbuilding, iron and steel	2	2,188,940
Glass	8	84,700	Silk and silk goods	11	57,810
Hats and caps, not including fur hats and wool hats	3	50,000	Worsted goods	1	63,539
Hosiery and knit goods	2	19,200	All other industries	21	46,840

TABLE 3.—COMPARATIVE SUMMARY OF FIFTEEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

The 15 leading industries of the state in 1900, as shown in Table 3, embraced 1,780 establishments, or 11.5 per cent of the total number in the state; used a capital of $260,301,975, or 51.8 per cent of the total; gave employment to 117,008 wage-earners, or 48.4 per cent of the total number; and paid $52,825,741, or 48 per cent of the total wages. The value of their products was $258,421,105, or 42.2 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of textiles is the most important industry in the state. The 321 establishments reported in 1900 gave employment to 46,932 wage-earners, or 19.4 per cent of the wage-earners employed in the state, and their products were valued at $72,921,528, or 11.9 per cent of the total value of the products of the state. In 1890 there were 242 establishments, 33,860 wage-earners, and products valued at $52,855,496. The increase in the value of products during the decade was $20,066,032, or 38 per cent. The textiles here shown are: Carpets and rugs, other than rag; cotton goods, including cotton small wares; dyeing and finishing textiles; hosiery and knit goods; shoddy; silk and silk goods; woolen goods; and worsted goods.

There were 180 establishments engaged in the manufacture of silk and silk goods in 1900, with 24,157 wage-earners, and products valued at $39,966,662. In 1890 there were 132 establishments, 17,445 wage-earners, and products valued at $30,760,371. The increase in the value of products during the decade was $9,206,291, or 29.9 per cent.

The silk industry was begun in Paterson about 1840 by Christopher Colt, a brother of Samuel Colt, the inventor of the revolving pistol, and the first silk mill was established in a floor of a building which the latter had erected for the manufacture of pistols. Use was made of water-power derived from the Passaic River, which has been so important a factor in the industrial development of the city. This mill, although equipped with the best machinery, was not successful under Mr. Colt's management, and was closed in about four months. John Ryle, who had learned the art of silk manufacture in England, was the next to engage in the industry in Paterson, and to his skill, energy, and perseverance were due the first successful operations in the state. John Ryle and G. W. Murry, who had had some experience in a silk mill at Northampton, Mass., purchased the Colt mill at Paterson with its entire outfit. No attempt was made to weave broad goods until 1846 when Mr. Ryle, who had become sole owner of the mill, succeeded in weaving pieces of dress silk of several hundred yards length. For nearly twelve years from its foundation this mill was the only

one in Paterson.[1] In 1852 John C. Benson erected a small mill, and in 1854 the firm of Hamill & Booth began business. Both partners were throwsters, who had previously confined their operations to their particular branch of the industry. Like other throwsters, however, they were compelled to take up the business of weaving or leave the silk industry, for the larger firms were then doing their own throwing.

The great growth of the silk industry in Paterson began during the decade ending with 1870. Great amounts of capital were invested and large mills were erected. The number of establishments increased from 8 to 29, and the value of products from $960,900 to $4,495,564. Paterson has now become the greatest center of silk production in the United States. Large mills have grown up in other towns in the northern and middle sections of New Jersey, but this city still maintains its preeminence in the industry. Proximity to New York city, the principal market for the sale of silk goods, was one of the influences favorable to the growth of the silk industry at Paterson. Of equal importance were the waterpower of the Passaic River, the facilities for cheap transportation afforded by the Morris and Essex Canal, and, later, by the railroads, and the available supply of labor. Paterson, at an early period, had drawn together a large laboring population. The men were employed largely in machine shops, and their wives and children were glad to take employment in the new industry.

There were 59 establishments engaged in the dyeing and finishing of textiles in 1900, with 7,074 wage-earners, and the work done was valued at $10,488,963. In 1890 there were 41 establishments, 3,735 wage-earners, and the work done was valued at $6,183,397. The increase during the decade in the value of the work done was $4,305,566, or 69.6 per cent.

There were 25 establishments engaged in the manufacture of cotton goods, including cotton small wares, in 1900, with 5,681 wage-earners, and products valued at $6,930,766. In 1890 there were 17 establishments, 5,632 wage-earners, and products valued at $5,902,615. The increase in the value of products during the decade was $1,028,151, or 17.4 per cent.

There were 11 establishments engaged in the manufacture of worsted goods in 1900, with 3,910 wage-earners, and products valued at $6,823,721. In 1890 there were 6 establishments, 937 wage-earners, and products valued at $2,058,662. The increase in the value of products during the decade was $4,765,059, or 231.5 per cent.

There were 13 establishments engaged in the manufacture of woolen goods in 1900, with 2,942 wage-earners, and products valued at $4,755,393. In 1890 there were 21 establishments, 4,165 wage-earners, and products valued at $5,652,166. The decrease in the value of products during the decade was $896,773, or 15.9 per cent.

There were 16 establishments engaged in the manufacture of hosiery and knit goods in 1900, with 1,841 wage-earners, and products valued at $1,748,148. In 1890 there were 15 establishments, 1,250 wage-earners, and products valued at $1,091,403. The increase in the value of products during the decade was $656,745, or 60.2 per cent.

There were 13 establishments engaged in the manufacture of carpets and rugs, other than rag, in 1900, with 1,171 wage-earners, and products valued at $1,522,827. In 1890 there were 6 establishments, 579 wage-earners, and products valued at $817,242. The increase in the value of products during the decade was $705,585, or 86.3 per cent.

There were 4 establishments engaged in the manufacture of shoddy in 1900, with 156 wage-earners, and products valued at $685,048. In 1890 there were 4 establishments, 117 wage-earners, and products valued at $389,640. The increase during the decade was $295,408, or 75.8 per cent.

The manufacture of foundry and machine shop products ranked second among the industries of the state in 1900, with 353 establishments, 17,918 wage-earners, and products valued at $32,621,229. In 1890 there were 249 establishments, 12,793 wage-earners, and products valued at $21,666,955. The increase in the value of products during the decade was $10,954,274, or 50.6 per cent. With the exception of 1 large establishment in Camden and 1 in Phillipsburg, the great machine shops and foundries are located in the large cities and towns of the middle section of the state. The greatest number are in Newark, Jersey City, Hoboken, Paterson, Plainfield, and Elizabeth. The superior railroad facilities for the transportation of coal and iron have been the most important factor in the development of this industry. During the past ten years many firms engaged in it have moved their works from New York city because of the combined advantages of cheap land for building purposes and efficient railroad service.

There were 4 establishments engaged in 1900 in the refining of petroleum, the industry third in rank, with 2,951 wage-earners, and products valued at $29,649,460. In 1890 there were 4 establishments, 2,610 wage-earners, and products valued at $20,711,826. The increase in the value of products during the decade was $8,937,634, or 43.2 per cent.

The refining of petroleum is a comparatively new industry in New Jersey. The first large plant was established about 1875 at Bayonne on the water front facing the Kill van Kull and New York Bay. This site was selected because the surrounding deep water permitted ocean-going ships to be loaded at the docks. The works have grown to immense size. There are 3 companies engaged in the industry at Bayonne and 1 at Edgewater on the Hudson River. During 1900 these 4 establishments used 12,136,537 barrels of crude petroleum, and their products included illuminating and lubricating oils, naphtha, tar, fuel oil, paraffine oil and wax, acid oil, benzine, oil of vitriol, and other articles.

There were 25 establishments engaged in the manufacture of iron and steel in 1900. with 8,288 wage-earners,

[1] History of the Silk Industry in America, by L. P. Brockett, pages 110-112.

and products valued at $24,381,699. In 1890 there were 28 establishments, 5,150 wage-earners, and products valued at $11,018,575. The increase in the value of products during the decade was $13,363,124, or 121.3 per cent. The beginning of this industry dates back to a very early period in the history of the state. One of the largest as well as the oldest manufactories of pig iron is at Oxford in Warren county. Furnaces were established there, and also at Phillipsburg, Hackettstown, Port Oram, and Stanhope, because of the local supplies of iron ore.[1] The rolling mills and steel works are distributed over that part of the state which lies between Dover and Trenton. In and about the city of Newark there are two large plants where crucible steel of a high grade is manufactured. Large establishments are also located at Boonton, Dover, Phillipsburg, Paterson, Passaic, and Trenton. One of these, located in the last-named city, employed more than 2,250 wage-earners in 1900, and its products, principally steel wire, are sent to all parts of the world.

There were 45 establishments engaged in the manufacture of malt liquors in 1900, with 1,723 wage-earners, and products valued at $14,386,456. In 1890 there were 34 establishments, 1,174 wage-earners, and products valued at $10,018,393. The increase in the value of products during the decade was $4,368,063, or 43.6 per cent. The manufacture of malt liquors is one of the leading industries of the state. Newark is the principal center of this industry, 19 of the 45 establishments in operation in 1900 being in that city. There were some small breweries of ale in Newark at an early period in the history of the city, but the great breweries of lager beer, ale, and porter now located there have grown from the small beginnings made by German refugees and immigrants, who came to Newark in large numbers after the revolution of 1848. Wherever these people settled in sufficient numbers brewing sooner or later sprang up.

There were 77 establishments engaged in the tanning, currying, and finishing of leather in 1900, with 4,178 wage-earners, and products valued at $13,747,155. In 1890 there were 31 establishments, 706 wage-earners, and products valued at $2,780,016. The increase in the value of products during the decade was $10,967,139, or 394.5 per cent. This industry is one in which New Jersey, and particularly the city of Newark, has held a leading place from a very early period. A small tannery was erected in Newark in 1770 and operated until the outbreak of the Revolutionary War. In 1792 there were 3 small tanneries there, and another, larger than its predecessors, was started in 1827 by the founders of a well-known firm which is still engaged in the industry. In 1837 there were 155 curriers and patent-leather makers in that city, and the tanned and curried products were valued at $899,200.[2] The business grew steadily in different parts of the state, but the growth was greatest in Newark, the largest establishments as a rule locating there. During the decade between 1860 and 1870 there was an immense advance, the city of Newark practically monopolizing the industry. In the next decade the growth of the industry was very much stimulated by the products displayed by Newark leather manufacturers at the Centennial Exposition. Large factories became the rule, as is seen by the fact that while the number of establishments decreased between 1870 and 1880, the increase in the value of products was very great. In 1887, owing to a prolonged strike and other disturbing influences, the leather industry in Newark received a setback, and conditions had not become normal at the census of 1890. Work had been suspended in many factories and the falling off in value of products was very marked. Since that date conditions have improved again, Newark still maintaining its preeminence in the industry.

There were 61 establishments engaged in the manufacture of chemicals in 1900, with 3,048 wage-earners, and products valued at $12,207,289. In 1890 there were 44 establishments, 1,712 wage-earners, and products valued at $8,146,795. The increase in the value of products during the decade was $4,060,494, or 49.8 per cent. A majority of the establishments engaged in this industry are located in Newark, Camden, and Bayonne.

There were 498 establishments engaged in the manufacture of tobacco in 1900, with 3,595 wage-earners, and products valued at $10,435,974. In 1890 there were 448 establishments, 1,182 wage-earners, and products valued at $2,258,220. The increase in the value of products during the decade was $8,177,754, or 362.1 per cent.

There were 81 establishments engaged in the manufacture of pottery, terra cotta, and fire-clay products in 1900, with 8,117 wage-earners, and products valued at $8,940,723. In 1890 there were 60 establishments, 4,425 wage-earners, and products valued at $5,165,537. The increase in the value of products during the decade was $3,775,186, or 73.1 per cent.

The name of New Jersey is intimately associated with this manufacture. Brick clay is found in every county in the state, but in some the deposits are small. With the exception of some porcelain clays found in the northern part of the state and some in Mercer county, substantially all the valuable clays and sands which form the basis of the pottery industry are mined in Middlesex county, in the neighborhood of Woodbridge and Perth Amboy. The hundreds of clay and sand pits are fortunately so situated that none of them is more than three miles from the navigable waters of Staten Island Sound, the Raritan River, or the South River. Stimulated by these advantages, immense works have been constructed in this section of the state in which architectural terra cotta, fire brick, common and front building brick, gas retorts, stove lining, sewer pipe, and roofing tile are made and distributed to all parts of the United States. The city of Trenton is, however, the most famous pottery center of New Jersey, its name being as naturally associated with the industry in the

[1] History of Sussex and Warren counties, by Col. Charles Scranton, pages 78 and 80.

[2] The New Jersey Register, 1837, pages 246 and 247.

United States as are the names of Staffordshire, Dresden, and Sevres with the industry in Europe. The finest qualities of porcelain, granite, and white ware are produced in this city, and in the production of sanitary ware Trenton leads all other centers.

The first pottery works in New Jersey were erected at Old Bridge, Middlesex county, but the first white ware with any pretensions to artistic beauty was made by the American Pottery Company at Jersey City in 1829. In 1852 the pottery industry of Trenton was begun by James Taylor, in partnership with a man named Speeler.[1] Mr. Taylor had been previously engaged in this manufacture in Jersey City. Yellow and Rockingham ware were successfully made and some experiments tried with porcelain. In 1856 the firm made white-granite ware in connection with its other products, and the same year received the Franklin medal in recognition of what had been accomplished. In 1857 the Excelsior Pottery Company was organized and erected large works along the banks of the Delaware and Raritan Canal. Many who subsequently became successful pottery owners or managers received their training in these works. The first pottery for the production of white-granite and cream colored ware was established in 1859 by the firm of Rhodes & Yates, and other master potters soon followed their example.

The Centennial exhibition in 1876 opened a new era in the pottery industry. The ivory porcelain and Parian vases exhibited there by Trenton manufacturers attracted much attention and greatly lessened the popular prejudice in favor of foreign-made pottery. The stimulus thus given called into existence many new establishments, some of which afterwards became famous in the industry. Hitherto there had been little disposition on the part of practical master potters to go beyond the making of such ware as was put to the most ordinary uses. But as a result of competition, higher grades of ware, more artistic shapes, and better glazes began at this time to take the place of the less perfect products of the kilns. Employers and workmen grew in experience and skill, the old conservatism was abandoned, and the reputation of Trenton pottery products became established.

There were 37 establishments engaged in the manufacture of rubber and elastic goods in 1900, with 2,609 wage-earners, and products valued at $8,458,274. In 1890 there were 12 establishments, 926 wage-earners, and products valued at $2,135,705. The increase in the value of products during the decade was $6,322,569, or 296 per cent. This increase was greater than is shown for any other manufacture carried on in the state, excepting leather. In 1860 there were but 5 establishments reported, 1 in Newark and 4 in New Brunswick, and the products were valued at $1,303,000. The great increase in this manufacture occurred during the three years between 1897 and 1900, and was caused to some extent by the consolidation of New Jersey companies with competing companies outside of the state, but it is chiefly due to the general industrial growth which so largely affected all industries during that period.

There were 100 establishments engaged in the manufacture of jewelry in 1900, with 2,779 wage-earners, and products valued at $7,379,777. In 1890 there were 74 establishments, 1,757 wage-earners, and products valued at $4,724,500. The increase in the value of products during the decade was $2,655,277, or 56.2 per cent. In 1900, as in 1890, only 3 states, Rhode Island, Massachusetts, and New York, ranked higher than New Jersey in this industry. The manufacture was established in Newark about the year 1830.[2] Solid gold jewelry was made and the city acquired a reputation for fine work which it still maintains. All kinds and grades of solid and filled jewelry are now made in the state. The machinery employed is of the latest type, and the workmen engaged in the industry are among the most skillful to be found anywhere.

There were 4 establishments engaged in the manufacture of sewing machines in 1900, with 4,701 wage-earners, and products valued at $6,643,348. In 1890 there were 3 establishments, 3,931 wage-earners, and products valued at $4,177,330. The increase in the value of products during the decade was $2,466,018, or 59 per cent. The manufacture of sewing machines was begun in Newark about 1870. In 1873 an immense plant was moved from New York city to Elizabeth, N. J., and located on the water front facing the Kill van Kull. The main building in which the enterprise is now carried on is five stories in height and more than one-third of a mile long, and 4,500 wage-earners are employed. The sewing machine made when the industry was started in Elizabeth had a capacity of 700 stitches per minute; the capacity of the machine now made is 3,500 stitches.

There were 35 establishments engaged in the manufacture of electrical apparatus and supplies in 1900, with 2,793 wage-earners, and products valued at $6,447,154. In 1890 there were 3 establishments, 425 wage-earners, and products valued at $744,274. The increase in the value of products during the decade was $5,702,880, or 766.2 per cent.

There were 113 establishments engaged in the manufacture of planing mill products in 1900, with 1,993 wage-earners, and products valued at $5,107,217. In 1890 there were 101 establishments, 1,635 wage-earners, and products valued at $4,869,372. The increase in the value of products during the decade was $237,845, or 4.9 per cent.

There were 26 establishments engaged in the manufacture of glass in 1900, with 5,383 wage-earners, and products valued at $5,093,822. In 1890 there were 34 establishments, 5,688 wage-earners, and products valued at $5,218,152. The decrease in the value of products during the decade was $124,330, or 2.4 per cent. This manufacture is confined to the southern part of the state, where an abundance of fine sand of the quality required for making

glass is to be found. Bridgeton and Millville are the principal centers. The first glasshouse in the state of which there is any record was built about 1765, near Alloway, Salem county, for the manufacture of bottles, by a German workman who brought men skilled in the industry from his native country.[1] The works were closed about the time of the outbreak of the Revolutionary War, and the men employed started a new glasshouse at Glassboro. One of the largest window and bottle plants in the state is still owned and managed by the descendants of the men who started it nearly one hundred and twenty-five years ago.

[1] Decrease.

It appears from Table 4 that there has been an increase during the past decade in the combined manufactures of these 7 cities. The number of establishments increased from 5,837 to 7,504, or 28.6 per cent; the average number of wage-earners from 109,786 to 139,577, or 27.1 per cent; and the value of products from $237,531,120 to $341,204,049, or 43.6 per cent. The percentage of increase in each of these particulars has been smaller in these 7 cities than in the state as a whole. Jersey City shows the most rapid growth, the value of products having increased from $37,376,322 to $77,225,116, or 106.6 per cent. In Newark, the leading city, the number of establishments increased from 2,490 to 3,339, or 34.1 per cent; the average number of wage-earners from 42,719 to 49,550, or 16 per cent; and the value of products from $93,476,652 to $126,954,049, or 35.8 per cent. The number of establishments, number of wage-earners, and value of products in this city in 1900 constituted 21.6, 20.5, and 20.8 per cent, respectively, of the totals for the state.

Table 5 presents the totals for the manufacturing industries of the 44 cities and towns withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and towns, and shows their rank in population and in value of products.

NEW MEXICO.

The territory of New Mexico was organized in 1850, and then included Arizona and parts of Nevada and Colorado; in 1860 it included Arizona and part of Colorado. Table 1 shows the manufacturing and mechanical industries of the territory of New Mexico, as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 5.)
[3] Not reported separately.
[4] Not reported.

The figures for the earlier censuses are preserved in this table as possessing a certain historical value, but, in view of the changes which have occurred in the boundaries of the territory, they should not be used for comparative purposes until 1870, since which date there has been no change in its area.

New Mexico is a mining and stock-raising region, with agricultural pursuits ranking next in importance. The most important manufacturing industries in the territory, in the order of their importance, are the railroad repair shops, carpentering, lumber and timber products, and flour and grist mills. The totals for 1860 included 15 establishments engaged in mining and, in 1870, 7 establishments engaged in milling and smelting quartz, not included in subsequent censuses. The statistics of mining have not been included since 1860; the statistics for copper and lead, smelting and refining, which were included in the report on mining at the censuses of 1880 and 1890, are now included in the report on manufactures. The census for 1900 includes 2 smelting and refining establishments, 1 of copper and 1 of lead, which together have a product of nearly one million dollars, but, to avoid disclosing the operations of individual establishments, are not separately shown.

One notable development of the decade is the establishment of 4 wool-scouring establishments in the territory. New Mexico has a larger number of sheep than any other state or territory, and the possession of facilities for scouring the wool before it is forwarded to Eastern markets is proving of great advantage to the growers.

Table 2 divides the industries of the territory between the hand trades and the manufactures proper. This table also gives the statistics for establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	479	$2,746,276	528	2,603	$1,350,921	$206,589	$2,920,631	$1,195,715	$1,488,515	$236,401	$5,621,332
Hand trades[1]	169	252,973	190	304	182,895	64,233	612,749	50,945	541,495	20,309	1,170,444
Establishments with a product of less than $500	59	47,490	70	3	335	2,252	6,493	1,273	5,220		15,537
All other establishments	251	2,445,813	268	2,296	1,167,691	140,104	2,301,389	1,143,497	941,800	216,092	4,435,351

[1] Includes bicycle and tricycle repairing, 7; blacksmithing and wheelwrighting, 45; boots and shoes, custom work and repairing, 20; carpentering, 29; clothing, men's, custom work and repairing, 15; clothing, women's, dressmaking, 2; furniture, cabinetmaking, repairing, and upholstering, 5; masonry, brick and stone, 6; millinery, custom work, 4; painting, house, sign, etc., 8; plastering and stuccowork, 2; plumbing, and gas and steam fitting, 5; sewing machine repairing, 2; watch, clock, and jewelry repairing, 19.

Of the 479 establishments of all classes, shown in Table 2, 228, or 47.6 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $1,185,981, or only 21.1 per cent of the total products of the territory.

In addition to the 479 active establishments in the territory during the census year, with a capital of $2,746,276, shown in this table, there were 8 idle establishments, with a capital of $108,289.

Table 3 presents the totals for the manufacturing industries in Albuquerque, Santa Fe, and Socorro, and places them in comparison with the totals for the entire territory, and the territory exclusive of these cities.

TABLE 3.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
				Average number.	Total wages.			
Total for territory	420	$2,698,786	458	2,600	$1,350,586	$204,337	$2,914,138	$5,605,795
Total for urban manufactures	160	980,197	175	1,100	576,578	89,022	1,092,797	2,210,425
Albuquerque	102	793,644	117	926	497,268	70,476	953,597	1,879,413
Santa Fe	39	82,053	39	89	44,740	13,446	88,966	204,123
Socorro	19	104,500	19	85	34,570	5,100	50,234	126,889
Total for territory exclusive of urban manufactures	260	1,718,589	283	1,500	774,008	115,315	1,821,341	3,395,370
Per cent of urban manufactures to total for territory	38.1	36.3	38.2	42.3	42.7	43.6	37.5	39.4

Of the 420 establishments in the territory, 160, or 38.1 per cent, are located in these 3 cities. The capital reported for these establishments is $980,197, or 36.3 per cent of that for the entire territory. They furnished employment to 1,100 wage-earners, or 42.3 per cent of the total number; paid $576,578 in wages, or 42.7 per cent of the total amount; and the value of their products, $2,210,425, formed 39.4 per cent of the total for the territory. The industries most developed are those which are common as well to rural as urban localities.

Table 4 shows the totals for the territory by counties.

Table 5 shows the totals for the territory by specified industries.

Table 6 shows the totals for all industries in the cities withdrawn from the enumerators.

TABLE 4.—MANUFACTURES

NEW YORK.

Table 1 shows the manufacturing and mechanical industries of the state of New York as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] Exclusive of 5,784 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[6] As given in the Report of the State Board of Tax Commissioners of New York, 1900, page 31.
[7] Does not include value of rented property.

Table 1 shows that there has been a large growth in the manufacturing and mechanical industries of New York during the half century. The population during these years increased from 3,097,394 to 7,263,110, while the average number of wage-earners employed in manufacturing establishments increased from 199,349 to 849,056, embracing, in 1900, 11.7 per cent of the entire population, compared with 6.4 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 1,091,026, or 15 per cent of the total population of the state. The greatest percentage of increase in the value of products, 107.2, is shown for the decade ending with 1870, and the greatest absolute increase, $630,881,075, for the decade ending with 1890.

The commonwealth that has for many decades maintained its claim to the title of Empire State, did not hold this leading position among the thirteen colonies. At the First Census, New York ranked fifth in population, but rose to second place in population and manufactures before 1810, owing to the rapid settlement of the central and western portions of the state. With the completion of the Erie Canal in 1825, a great highway was opened to the West, and New York assumed position as the Empire State in population, wealth, commerce, and industry.

The natural resources which, with its geographical and topographical position, have contributed to make New York a great industrial state are a rich soil, an excellent climate, extensive forests, and mineral deposits. New York's broad and fertile acres are capable of furnishing food for a large population; during part of the Nineteenth century agriculture was in a more flourishing condition in this state than in any other. Horticulture is favored by the mild climate prevailing in the neighborhood of Lakes Ontario and Erie and the smaller lakes in the central part of the state. Where the land is inaccessible to the cultivator and the air too cold for the fruit grower, notably in the Adirondack Mountain region, it yields its wealth in the form of forests, which have supported great lumber and paper-making industries, or in mineral deposits that furnish the materials for still other industries. Coal, the indispensable fuel, is lacking, but iron is found in several counties. The clay beds along the lower Hudson are the center of one of the greatest of brick-making districts; near them are extensive cement quarries. In the produc-

tion of granite, sandstone, slate, marble, and limestone the state ranked fourth in the United States in 1899.[1] Since 1893 New York has ranked first in the production of salt, of which there are rich deposits in the central and western parts of the state.[2] Gypsum, talc, graphite, petroleum, and natural gas are found in moderate quantities. The topography of the state is such that the natural wealth is readily accessible and easily developed. In the highlands swift water courses, including the Mohawk, Upper Hudson, Black, and Genesee rivers, take their rise and furnish abundant waterpower, while the great difference in level between the Erie and Ontario plains gives to the waters of the Great Lakes an immense power, which, at Niagara Falls, is rapidly being utilized for the generation of electrical energy. The tunnels already built on the American side of the Falls are said to be capable of developing 400,000 horsepower, an amount of energy nearly equal to 80 per cent of the steam power utilized in the factories of the entire state in 1890 and within about 12 per cent of the combined steam and water power in 1880. Of even greater importance than the presence of waterpower has been the existence of the great natural highways of commerce. From New York to Albany, the Hudson River is virtually an arm of the ocean; between Albany and Buffalo, through the Mohawk Valley and the Ontario plain, is the only natural break in the Appalachian Mountain range. The building of the Erie Canal, by which Lake Erie and the Hudson River were connected, brought to New York much of the commerce of the West, and a system of branch canals, connecting this trunk line with Lake Champlain, Lake Ontario, and several of the central New York lakes, perfected the inland waterways for the interchange of the state's own products. These cheap transportation lines encouraged the specialization of industries. Each community could devote its energies to the development of its own resources and exchange its products with other communities. Along the line of the waterways, centers of trade sprang into existence and developed rapidly. The largest of these cities, New York, at the southern terminus of the route, was naturally most favorably situated for coastwise and foreign trade and possessed fine harbor facilities. It became the commercial and financial center of the continent and gave support to important manufacturing industries. Factories were also built in the other commercial centers along the water highways. It is a noteworthy fact that of the 16 manufacturing centers separately reported in Table 4, all but Binghamton and Elmira are located upon water routes, which have in turn largely determined the location of railway routes.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments, educational, eleemosynary, and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	87,396	$1,674,088,301	97,837	854,234	$410,768,950	$222,216,246	$1,146,034,092	$261,072,332	$852,484,167	$32,477,593	$2,182,737,337
Hand trades[1]	34,498	86,095,759	40,115	105,340	62,257,695	33,756,717	94,075,257	1,387,831	90,994,107	1,693,319	246,681,237
Governmental establishments	3	18,439,326	--------	2,067	1,724,711	25,622	1,141,382	600	1,105,157	35,625	4,028,032
Educational, eleemosynary, and penal institutions	46	999,875	--------	252	40,363	8,502	431,162	56,527	363,401	11,234	651,861
Establishments with a product of less than $500	8,689	3,438,880	9,083	2,859	148,224	295,851	669,772	82,184	587,588	----------	2,330,544
All other establishments	44,160	1,565,114,461	48,639	743,716	346,597,957	188,129,554	1,049,716,519	259,545,190	759,433,914	30,737,415	1,929,045,663

[1] Includes bicycle and tricycle repairing, 1,094; blacksmithing and wheelwrighting, 5,394; boots and shoes, custom work and repairing, 4,941; carpentering, 2,981; clothing, men's, custom work and repairing, 5,089; clothing, women's, dressmaking, 2,913; dyeing and cleaning, 331; furniture, cabinetmaking, repairing, and upholstering, 1,295; lock and gun smithing, 420; masonry, brick and stone, 905; millinery, custom work, 1,721; painting, house, sign, etc., 2,742; paper hanging, 103; plastering and stuccowork, 152; plumbing, and gas and steam fitting, 2,491; sewing machine repairing, 110; taxidermy, 27; typewriter repairing, 11; watch, clock, and jewelry repairing, 1,778.

Of the 87,396 establishments of all classes, shown in this table, 43,187, or 49.4 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $249,011,781, or only 11.4 per cent of the total value of the products of the state.

In addition to the 87,396 active establishments in the state during the census year, with a capital of $1,674,088,301, shown in Table 2, there were 264 idle establishments, with a capital of $10,519,033, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Agricultural implements	1	$60,000	Lumber, planing mill products, including sash, doors, and blinds	7	$61,397
Brick and tile	9	172,839	Malt	7	521,500
Brooms and brushes	2	14,040	Marble and stone work	5	344,072
Carpentering	5	187,350	Matches	1	120,000
Carriage and wagon materials	2	15,500	Millinery and lace goods	1	17,500
Cheese, butter, and condensed milk, factory product	11	19,620	Models and patterns	1	27,000
Chemicals	1	50,000	Musical instruments, organs and materials	1	20,100
Dye stuffs and extracts	1	27,500	Oil, essential	3	13,205
Flouring and grist mill products	21	175,925	Oil, linseed	2	1,351,818
Foundry and machine shop products	12	253,966	Paper and wood pulp	3	47,500
Fruits and vegetables, canning and preserving	32	119,554	Paving and paving materials	5	37,465
Furniture, factory product	1	26,400	Pottery, terra cotta, and fire-clay products	2	202,700
Glass	4	337,900	Salt	2	1,437,950
Hosiery and knit goods	10	784,050	Silk and silk goods	1	95,000
Iron and steel	8	2,976,532	Stamped ware	1	44,500
Leather, tanned, curried, and finished	7	303,275	Woodenware, not elsewhere specified	2	36,935
Liquors, distilled	5	88,945	Woolen goods	8	166,775
Liquors, malt	2	204,526	All other industries	57	103,667
Lumber and timber products	21	52,027			

TABLE 3.—COMPARATIVE SUMMARY OF THIRTY-SIX LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

The 36 leading industries of the state in 1900, as shown in Table 3, embraced 24,417 establishments, or 31 per cent of the total number in the state; used a capital of $1,156,396,994, or 70 per cent of the total; gave employment to 502,839 wage-earners, or 59.2 per cent of the total number; and paid $234,922,692, or 57.5 per cent of the total wages. The value of their products was $1,380,975,268, or 63.5 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

The following leading industries, numbering 19, have increased at a greater rate than the population: Sugar and molasses, refining; electrical apparatus and supplies; furnishing goods, men's; patent medicines and compounds; millinery and lace goods; paper and wood pulp; cheese, butter, and condensed milk, factory product; cars and general shop construction and repairs by steam railroad companies; clothing, factory product; ironwork, architectural and ornamental; gloves and mittens; confectionery; soap and candles; jewelry; printing and publishing; foundry and machine shop products; lithographing and engraving; shirts; and fur goods.

The following 7 show a much less rate of increase than the population of the state, the order of presentation being from greatest percentage of increase to least: Gas; textiles; boots and shoes, factory product; liquors; petroleum, refining; tobacco; and furniture, factory product.

The following 10 have decreased in value of products since 1890, the order of presentation being from greatest percentage of decrease to least: Coffee and spice, roasting and grinding; slaughtering; carriages and wagons; flouring and grist mill products; iron and steel; lumber; agricultural implements; chemical products; musical instruments; and leather, tanned, curried, and finished. Of the declining industries, the majority are those which use such materials as lumber, hides, wheat, and iron, no longer produced as economically in New York as elsewhere.

The growing industries nearly all fall in the group of highly finished articles and luxuries demanded by an advancing civilization and a high state of the arts and sciences. Many of them pertain peculiarly to a city civilization, as for example, gas, paper and wood pulp, and printing and publishing. In New York the paper and wood pulp industry is almost entirely devoted to the production of news paper, and so large has become the output of the Adirondacks (mainly along the Black River in Jefferson and Lewis counties and the Hudson River in Saratoga and Washington counties) that New York now ranks first of all the states. The news paper product, and cheese, butter, and condensed milk, factory product, are virtually the only ones directly dependent upon the state's natural wealth. All the rest of the progressive industries of New York use materials imported from other states. It is a noteworthy fact that the production of confectionery now exceeds that of iron and steel in New York.

Table 3 shows that the factory manufacture of clothing is the most important industry in the state. The 4,204 establishments reported in 1900 gave employment to 90,017 wage-earners, or 10.6 per cent of the wage-earners in the state, and their products were valued at $233,370,447, or 10.7 per cent of the total value of the products of the

state. In 1890 there were 3,466 establishments, with 78,874 wage-earners, and products valued at $141,968,351. The increase in the value of products during the decade was $91,402,096, or 64.4 per cent.

The factory manufacture of clothing is of comparatively recent development. It began probably in the second quarter of the Nineteenth century and is particularly associated with two events since 1850, namely, the invention of the sewing machine, and the Civil War. Apart from army clothing, probably the only ready-made clothing sold in Europe or in this country in the earlier years of the Nineteenth century was so-called "slop clothing," which was bought for stocking sailors' "slop-chests" prior to setting out upon long voyages. As early as 1830, however, New York merchants began to supply a demand for ready-made clothing in the South and West. Many of them maintained retail stores in southern cities for the sale of clothing made in New York factories,[1] the largest of which are said to have employed 300 to 500 hands each. In 1841 the value of clothing sold at wholesale in New York city was estimated at $2,500,000.[2] The trade was greatly stimulated by the requirements of western emigrants, especially after the discovery of gold in California. Two or three years later the invention of the sewing machine put the business upon a substantial basis and enabled it to meet the demand for army clothing during the Civil War. About 1870 cutting machines were introduced; first, a long knife, operating perpendicularly like a saw and cutting through eighteen thicknesses of cloth, later a circular disk operating like a buzz saw and cutting twenty-four thicknesses. But while the ready-made clothing business has now attained so large proportions, it is not a fully organized factory industry. The clothing is not, as a rule, made in large factories under the supervision of the manufacturer, but in small workshops or tenement rooms through the intervention of a contractor. Various causes contribute to this backward state, one of which is the presence in cities of large bodies of unskilled workmen, whose ignorance of the English language prevents them from finding more remunerative employment than that offered by the "sweater." But the principal cause is the great variety of styles and patterns, which necessitates extreme specialization. This can be more readily accomplished by distributing the different designs among contractors than by undertaking to make all patterns under one roof. Garments of a standard design and cloth, such as overalls, are made in large factories outside the great cities. But the manufacturer of overcoats and suits finds it more profitable to locate in a large city, where he can find an abundant supply of labor and contractors who will relieve him of the necessity of investing money in a plant that would lie idle half the year. New York's dominance of the clothing trade is undisputed.

The manufacture of women's cloaks, wrappers, etc., for the wholesale trade apparently began in New York city in 1849,[3] but it developed slowly. It was not mentioned in the New York census of 1855, but according to the Federal Census of 1860, the state contained 22 establishments devoted to the manufacture of women's clothing (cloaks and mantillas), and their annual products were valued at $685,600. The trade has developed along the lines of the men's ready-made garment trade and has now attained nearly as large dimensions.

The manufacture of foundry and machine shop products ranked second among the industries of the state in 1900, with 1,352 establishments, 50,173 wage-earners, and products valued at $96,636,517. In 1890 there were 1,081 establishments, 39,133 wage-earners, and products valued at $72,084,500. The increase in the value of products during the decade was $24,552,017, or 34.1 per cent.

It is impossible to specify the great variety of machinery included in the foundry and machine shop products of New York state, but steam engines, pumps, locomotives, and other motors are prominent. A New York machinist is credited with having begun the business of making stationary engines in that city;[4] and New York city engineers, associated with Robert Fulton, founded and developed the manufacture of marine engines after Fulton had been obliged to send to England for an engine to propel his steamboat, the Clermont.[5] The steam engine, pump, boiler, and fire engine branches of the foundry and machine shop industry of New York now give employment to more than 10,000 workmen, while the two locomotive works at Dunkirk and Schenectady employ about 5,000.[6] Another large branch of the industry is the manufacture of printing presses. The history of this manufacture is largely interwoven with the growth of a firm in New York city, which was among the first (1822) in the United States to undertake the manufacture of iron instead of wooden presses. This firm also produced in 1847 the first rotary press, which carried the type on a revolving cylinder, and for many years the only competition was from another New York house. In recent years, however, Chicago has rivalled New York city in this manufacture.

The manufacture of stoves is another important branch of the foundry and machine shop industry. In the Eighteenth century stove plates were cast at the blast furnaces near the iron mines. But Troy early became the center of the stove trade; and in the Nineteenth century, when stove founding became a separate business, it grew up chiefly at Albany and Troy, where superior molding sand was found. With the settlement of the West, the stove business developed in the western cities, especially at Detroit, but New York state still ranks among the first.

There were 2,640 establishments engaged in 1900 in printing and publishing, the industry third in rank, with 32,948 wage-earners, and products valued at $95,232,051.

[6] Report of the New York State Department of Labor, 1901.

In 1890 there were 2,230 establishments, 27,587 wage-earners, and products valued at $68,929,001. The increase in the value of products during the decade was $26,303,050, or 38.2 per cent.

The art of printing was introduced in Massachusetts and Pennsylvania earlier than in New York; in fact, it was the pioneer of American printing, William Bradford, who was induced by the New York state government, in 1693, to leave Philadelphia and set up a printing press in New York city, where he was allowed 50 pounds annually for printing the "Acts of Assembly and Publick Papers."[1] In 1725 Bradford started the first newspaper in New York, the Weekly Gazette. The second New York paper, the Weekly Journal, is memorable for the heroic fight made by its editor, Peter Zenger, in defense of the freedom of the press.

Early in the Nineteenth century, New York began to overtake Philadelphia in printing and publishing newspapers. The system of annual fairs and trade sales of books was established at New York in 1802, under the auspices of the American Company of Booksellers.[2] The publishing house of Harper was founded in 1817 and that of Appleton in 1825.[3] Type foundries were established, and in 1838 Bruce, of New York, invented a type-casting machine that greatly cheapened type. Improvements in presses followed one another in rapid succession. The Hoe patent of 1847 for a type-revolving cylinder wrought a revolution in the publishing of daily newspapers, by enabling the publishers to print large editions in a short time. Stereotyping by plaster process had been introduced in book work in 1813, and in 1861 the Tribune first used stereotyping (papier mâché process) in newspaper work. Subsequent improvements in typography have been the invention of the web perfecting press by Bullock, of Philadelphia (1861), and the linotype, or typesetting machine, by Mergenthaler, of Baltimore (1888), both of which have played a notable role in establishing the daily press in its present position. New York is the center of the periodical press as well as of book publishing.

There were 537 establishments engaged in the manufacture of textiles in 1900, with 64,901 wage-earners, and products valued at $94,263,047. In 1890 there were 627 establishments, 61,097 wage-earners, and products valued at $86,642,771. The increase in the value of products during the decade was $7,620,276, or 8.8 per cent. New York ranked third in 1900 in combined textiles, which was also the position it occupied in 1890. These combined textiles are: Carpets and rugs, other than rag; cotton goods, including cotton small wares; dyeing and finishing textiles; felt goods; hosiery and knit goods; shoddy; silk and silk goods; wool hats; woolen goods; and worsted goods.

There were 242 establishments engaged in the manufacture of hosiery and knit goods in 1900, with 26,470 wage-earners, and products valued at $35,386,048. In 1890 there were 201 establishments, 19,828 wage-earners, and products valued at $24,776,582. The increase in the value of products during the decade was $11,109,466 or 44.8 per cent.

New York's prominence in the textile manufacture depends mainly upon its knitting industry, which is of New York origin. The state leads all other states, as it did in 1880 and 1890. The value of its products in 1900 exceeded that of Pennsylvania, which was second, by $13,989,985, or 63.9 per cent. Hosiery, in the early part of the Nineteenth century, was either knit by hand in the household or by a cumbrous machine, invented in England two centuries previously and requiring for its operation the strength of a man. In 1831 an Albany storekeeper, Egbert Egberts, recognized the clumsiness of the knitting frame and thought of the possibility of applying power. He sought out a young mechanic, Timothy Bailey, explained his idea to him, and sent him to Philadelphia to buy a machine. Within six days after the arrival of a disused frame in Albany, Bailey had arranged an apparatus to knit by turning a crank at the side. Egberts & Bailey then undertook to start a knitting mill in a dismantled cotton factory at Cohoes, where waterpower from the Mohawk River had just been secured. For eight or nine years their operations were limited, but by 1843 success appeared certain.[4] Egberts and Joshua Bailey then erected a brick mill, while Timothy Bailey, the inventor, remained in the old factory. In 1850 there were only 3 knitting mills in New York, and 6 in 1855, but in 1860 the annual production was valued at $1,944,090.

The power knitting machine was soon introduced in Philadelphia, which remained, as before, the principal hosiery center, while Cohoes and numerous other towns in the Mohawk and Hudson valleys, forming the other great centers of the knitting industry, have specialized in underwear. In recent years Amsterdam and Utica have become rivals of Cohoes.

There were 12 establishments engaged in the manufacture of carpets and rugs, other than rag, in 1900, with 8,603 wage-earners, and products valued at $15,029,218. In 1890 there were 15 establishments, 8,879 wage-earners, and products valued at $14,606,116. The increase in the value of products during the decade was $423,102, or 2.9 per cent.

Next to hosiery and knit goods, carpets and rugs are the largest textile manufacture of New York, and the state ranks second. E. S. Higgins & Co. began to manufacture ingrain carpets in 1841, and have built up large factories. The name of Alexander Smith, who died about six years ago, is prominently identified with this industry. The firm which he established at Yonkers, now known as Alex. Smith & Sons, possesses one of the largest plants for the manufacture of carpets in the United States. This enterprise grew out of the invention, in 1860, by Smith and Halcyon Skinner, of Yonkers, of an

[1] Tenth Census of the United States, The Newspaper and Periodical Press, page 8.

[2] Eighth Census of the United States, Manufactures, Introduction, page cxxxviii.

[3] One Hundred Years of American Commerce, Vol. I, page 309.

[4] History of Cohoes, by Masten, pages 61, 62, and 77.

Axminster and Moquette power loom, which, with the Bigelow power looms, revolutionized the carpet industry. There is a large carpet factory at Amsterdam, established by Stephen Stanford, for the weaving of tapestry ingrains, by a process patented by Alexander Smith and J. G. McNair.[1]

There were 92 establishments engaged in the manufacture of silk and silk goods in 1900, with 7,861 wage-earners, and products valued at $12,706,246. In 1890 there were 185 establishments, 12,719 wage-earners, and products valued at $19,417,796. The decrease in the value of products during the decade was $6,711,550, or 34.6 per cent.

The principal products of the New York silk mills are ribbons and laces. High rents and other reasons have lately caused many New York city manufacturers to move part or all of their plants to the country, usually into New Jersey or Pennsylvania. Elmira is the largest center of the industry after New York city, while Hornellsville, Amsterdam, and several smaller places have one or more factories each.

There were 52 establishments engaged in the manufacture of cotton goods, including cotton small wares, in 1900, with 9,259 wage-earners, and products valued at $10,788,003. In 1890 there were 42 establishments, 8,316 wage-earners, and products valued at $9,777,295. The increase in the value of products during the decade was $1,010,708, or 10.3 per cent.

The manufacture of cotton goods was begun in New York within a few years after it had been started in New England. The first factory is said to have been erected in Washington county by William Mowry, who had learned the business in the original Slater mill at Pawtucket, R. I. The industry in New York has always been localized to a large extent along the Mohawk and Hudson rivers, and Cohoes and Utica are to-day the principal centers.

There were 65 establishments engaged in the manufacture of woolen goods in 1900, with 4,033 wage-earners, and products valued at $6,715,005. In 1890 there were 91 establishments, 2,838 wage-earners, and products valued at $5,188,020. The increase in the value of products during the decade was $1,526,985, or 29.4 per cent.

There were 7 establishments engaged in the manufacture of worsted goods in 1900, with 3,726 wage-earners, and products valued at $5,958,259. In 1890 there were 16 establishments, 3,870 wage-earners, and products valued at $5,763,102. The increase in the value of products during the decade was $195,157, or 3.4 per cent.

There were 42 establishments engaged in the dyeing and finishing of textiles in 1900, with 3,117 wage-earners, and the work done was valued at $3,625,882. In 1890 there were 49 establishments, 2,725 wage-earners, and the work done was valued at $3,636,051. The decrease during the decade in the value of the work done was $10,169, or three-tenths of 1 per cent.

[1] One Hundred Years of American Commerce, Vol. II, pages 486 and 487.

There were 11 establishments engaged in the manufacture of felt goods in 1900, with 735 wage-earners, and products valued at $1,734,136. In 1890 there were 11 establishments, 773 wage-earners, and products valued at $1,517,199. The increase in the value of products during the decade was $216,937, or 14.3 per cent.

There were 5 establishments engaged in the manufacture of wool hats in 1900, with 930 wage-earners, and products valued at $1,376,721. In 1890 there were 5 establishments, 976 wage-earners, and products valued at $1,489,132. The decrease in the value of products during the decade was $112,411, or 7.5 per cent.

There were 9 establishments engaged in the manufacture of shoddy in 1900, with 167 wage-earners, and products valued at $443,529. In 1890 there were 12 establishments, 173 wage-earners, and products valued at $471,478. The decrease in the value of products during the decade was $27,949, or 5.9 per cent.

There were 14 establishments engaged in the refining of sugar and molasses in 1900, with 3,275 wage-earners, and products valued at $90,680,478. In 1890 there were 14 establishments, 610 wage-earners, and products valued at $17,157,694. The increase in the value of products during the decade was $73,522,784, or 428.5 per cent. It is probable that the returns for 1890 did not include all the establishments in this industry and that, therefore, caution should be exercised in making comparisons between the two censuses.

Of the food products derived by manufacturing processes from imported materials the most important is sugar, and this is one of the principal industries of New York. In the Eighteenth century the process of refining sugar and molasses was exceedingly expensive, and in consequence these commodities were generally consumed in the raw state. The first sugar refinery to be established in the country was probably Rhinelander's in New York. In 1805 the house of Havemeyer was founded, also in New York, with four or five employees. Refined sugar early became the most important single product of the city, and by 1810 the production of the 10 refineries then in operation was 2,474,742 pounds of sugar, valued at $420,706.[2] Improvements in machinery were numerous down to 1860, and after the introduction of Soleil's polariscope in the United States in 1870, revolutionary improvements in process were accomplished. The result of this progress was to reduce the time required for refining sugar, and the cost—the former from two weeks to sixteen hours; and the latter, between 1838 and 1876, from 10 to 3 cents per pound. The refineries are necessarily located on the seaboard, as nearly all raw sugar is imported, and what is now Brooklyn borough has been for years the chief center of the industry. In 1900, as in 1890, there were also 2 beet sugar factories in the state.

There were 279 establishments engaged in the manufacture of liquors in 1900, with 7,730 wage-earners, and products valued at $58,282,253. In 1890 there were 249

[2] One Hundred Years of American Commerce, Vol. I, page 259.

establishments, 7,084 wage-earners, and products valued at $54,009,249. The increase in the value of products during the decade was $4,273,004, or 7.9 per cent.

The Dutch settlement of New Amsterdam had a good-sized brewery, built by the West India Company, as early as 1633, and there was one at the Dutch settlement of Fort Orange, now Albany, before 1637.[1] Both cities have since possessed famous breweries and New York has led all the states in this industry ever since statistics have been gathered. A century ago the product of New York distilleries was relatively large, and even in 1850 New York led all the states. But the corn-growing centers moved westward and the New York distilleries lost ground rapidly.

The wine industry, though still small, is making excellent progress, New York's percentage of growth during the decade having been larger than that of any other state. The state reached second rank in value of products, California alone preceding. In the manufacture of champagne New York led, having produced 113,435, or 67.1 per cent of the 169,055 gallons made in the United States. Its principal centers are the Keuka Lake region in Yates and Steuben counties.

There were 110 establishments engaged in slaughtering and meat packing in 1900, with 3,099 wage-earners, and products valued at $57,431,293. In 1890 there were 181 establishments, 3,744 wage-earners, and products valued at $76,642,151. The decrease in the value of products during the decade was $19,210,858, or 25.1 per cent.

There were 3,097 establishments engaged in the manufacture of tobacco in 1900, with 27,071 wage-earners, and products valued at $53,660,580. In 1890 there were 2,888 establishments, 30,299 wage-earners, and products valued at $51,853,976. The increase in the value of products during the decade was $1,806,604, or 3.5 per cent.

There were 2,274 establishments engaged in the manufacture of lumber in 1900, with 18,365 wage-earners, and products valued at $45,523,234. In 1890 there were 2,274 establishments, 27,160 wage-earners, and products valued at $50,925,720. The decrease in the value of products during the decade was $5,402,486, or 10.6 per cent. New York's lumber and timber industry has some notable features. The state ranks fifth among the states in number of establishments, twelfth in value of products, and eighth in value per thousand feet of rough lumber. The distribution of sawmills is general, but there are a large number in the counties of St. Lawrence, Franklin, and Herkimer in the Adirondack region, Saratoga in the eastern part of the state, and Chautauqua and Cattaraugus in the western part. In the boroughs of Manhattan and Bronx there are 6 sawmills at which mahogany, Spanish cedar, and rosewood are sawed.

There were 1,513 establishments engaged in flour and grist milling in 1900, with 2,489 wage-earners, and products valued at $42,796,340. In 1890 there were 1,235 establishments, 3,389 wage-earners, and products valued at $52,550,744. The decrease in the value of products during the decade was $9,754,404, or 18.6 per cent.

Flour milling had grown out of the stage of a domestic industry before the first settlers came to America. While each family may have woven its own cloth and made therefrom its supply of clothing, it bought its flour and meal of the village miller. It is recorded that in the same year in which Peter Minuit bought the Island of Manhattan, one of his fellow citizens set up a horsemill and it is said this was the first gristmill in America. Windmills and watermills were scattered along the Hudson wherever the Dutch settled. More interesting is the fact that even in the Seventeenth century, New York city was making flour for an export trade. It appears that Governor Andros in 1678 had granted to the city a monopoly of bolting flour for the province and when, in 1794, the General Assembly revoked this privilege, at the instance of the Long Islanders, a disturbance ensued.[2]

What is more to the purpose, the settlers were clearing the land of its forests and sowing it to wheat. When they reached the fertile Genesee Valley early in the Nineteenth century, the inevitable result was the development of a great milling industry at the natural center, the falls of the Genesee. There Rochester was laid out in 1812 and there were built the numerous mills that made Rochester the "Flour City." With the opening of the Erie Canal in 1825, the city's source of supply was extended; it received grain from Ohio and Canada, and in 1836, from the shores of Lake Michigan, and it sent its flour to Europe. The next twenty years was the palmy period of the milling industry in Rochester, Oswego, and other New York towns. But the West was building its own flour mills and western men were enterprising enough to study the new milling processes in Hungary. Minneapolis adopted and improved upon these methods soon after 1870, and in 1890 Minnesota crowded New York out of first rank in the flouring industry. In the last decade production in this state declined, and at the present time New York has only a few mills of large capacity, principally located in Buffalo, Niagara Falls, and New York city. Most of the 1,513 mills in New York state are scattered in the cities and villages and produce feed and flour for the local farmers. It is therefore custom grinding, as in the days of neighborhood industries.

There were 279 establishments engaged in the manufacture of chemical products in 1900, with 8,854 wage-earners, and products valued at $40,663,363. In 1890 there were 288 establishments, 8,720 wage-earners, and products valued at $41,338,134. The decrease in the value of products during the decade was $674,771, or 1.6 per cent.

There were 270 establishments engaged in the manufacture of men's furnishing goods in 1900, with 21,610 wage-earners, and products valued at $31,000,834. In 1890 there were 215 establishments, 11,671 wage-earners, and products valued at $14,379,970. The increase in the value

[1] History of American Manufactures, Vol. I, pages 250 and 254.

[2] History of American Manufactures, Vol. I, pages 119 and 133.

of products during the decade was $16,620,864, or 115.6 per cent.

Closely allied to the manufacture of men's furnishing goods is the manufacture of shirts. There were 324 establishments engaged in this industry in 1900, with 13,565 wage-earners, and products valued at $22,782,302. In 1890 there were 377 establishments, 17,948 wage-earners, and products valued at $17,483,958. The increase in the value of products during the decade was $5,298,344, or 30.3 per cent.

The principal center of the shirt, as well as of the collar and cuff industry of the United States is at Troy, and it is here that the manufacture originated. In 1827 the Rev. Ebenezer Brown, a retired preacher who had gone into the dry goods business in Troy, recognized a demand for detachable linen collars, and bargained with some women to make, wash, and iron string collars, which he put up in boxes of assorted sizes and sold to dealers as well as customers. But he removed from Troy in 1834, and in the same year the manufacture of linen collars and shirt bosoms ("dickeys") was begun as a separate business by Montague & Granger, who filled orders for Troy and New York.[1] In time the making of shirts for the wholesale trade developed as a distinct industry. It may be true, as William C. Browning, the veteran clothier, affirms, that the first shirt factory in America was founded in 1832 by the clothing merchants, David and Isaac N. Judson, at the corner of Cherry and Market streets, New York city, but for eight years theirs was the only shirt factory in the metropolis. The larger development was in Troy, where garments were cut and distributed to seamstresses for miles around, not only in Rensselaer and the neighboring counties, but even in Massachusetts and Vermont. At the present time, comparatively little work on shirts is done outside of the factories; but collars and cuffs are very generally sent to outside workers to be turned and pressed. The manufacture of linen cuffs began about 1845. In 1851 or 1852 Nathaniel Wheeler, of the Wheeler & Wilson Company, brought a sewing machine to Troy and exhibited it to the manufacturers. Most of them doubted its applicability to their business, but Jefferson Gardiner gave it a trial, which ultimately turned out successfully, and in 1855 O. W. Edison applied steam power to the machines. The industry was now firmly established and in the state census of that year gained recognition as a separate business; all the shirt, collar, and cuff factories reported were in Rensselaer county, Troy being the principal seat. In 1860 paper collars were put on the market and for several years had a large sale. Auxiliary industries have grown up around the shirt and collar industry of Troy and given the city a world-wide reputation, notably for its laundering processes and laundering machinery. Other articles known as men's furnishing goods—neckwear, suspenders, etc.—are made chiefly in New York city, the center of wealth and fashion.

[1] Troy's One Hundred Years, 1789–1889, by Arthur J. Weise, page 174.

There were 4 establishments engaged in the refining of petroleum in 1900, with 2,629 wage-earners, and products valued at $27,184,524. In 1890 there were 9 establishments, 3,096 wage-earners, and products valued at $25,786,841. The increase in the value of products during the decade was $1,397,683, or 5.4 per cent.

There were 179 establishments engaged in the manufacture of paper and wood pulp in 1900, with 9,268 wage-earners, and products valued at $26,715,628. In 1890 there were 153 establishments, 5,339 wage-earners, and products valued at $14,192,240. The increase in the value of products during the decade was $12,523,388, or 88.2 per cent. In 1900 New York led all the states in the aggregate value of its paper products, having taken the lead from Massachusetts during the decade. Of particular products it was first in news paper, wrapping paper, and other paper products, and first also in wood pulp, for which its fine forests furnished the best of materials.

There were 1,908 establishments engaged in the factory manufacture of cheese, butter, and condensed milk in 1900, with 2,439 wage-earners, and products valued at $26,557,888. In 1890 there were 1,308 establishments, 2,461 wage-earners, and products valued at $14,385,966. The increase in the value of products during the decade was $12,171,922, or 84.6 per cent. In the last ten years butter making has to a considerable extent departed from the farmhouse to the creamery or factory, while the manufacture of condensed milk in factories has greatly increased, so that the industry entitled "cheese, butter, and condensed milk," stands well up in the list of leading industries.

There were 223 establishments engaged in the factory manufacture of boots and shoes in 1900, with 15,796 wage-earners, and products valued at $25,585,631. In 1890 there were 257 establishments, 15,361 wage-earners, and products valued at $23,661,204. The increase in the value of products during the decade was $1,924,427, or 8.1 per cent.

There were 354 establishments engaged in the factory manufacture of furniture in 1900, with 14,481 wage-earners, and products valued at $23,643,245. In 1890 there were 415 establishments, 13,211 wage-earners, and products valued at $23,539,011. The increase in the value of products during the decade was $104,234, or four-tenths of 1 per cent.

There were 147 establishments engaged in the tanning, currying, and finishing of leather in 1900, with 6,530 wage-earners, and products valued at $23,205,991. In 1890 there were 210 establishments, 6,200 wage-earners, and products valued at $23,348,078. The decrease in the value of products during the decade was $142,087, or six-tenths of 1 per cent.

There were 134 establishments engaged in the manufacture of electrical apparatus and supplies in 1900, with 10,370 wage-earners, and products valued at $22,695,024. In 1890 there were 66 establishments, 3,890 wage-earners, and products valued at $8,189,180. The increase in the

value of products during the decade was $14,505,844, or 177.1 per cent.

There were 87 establishments engaged in the roasting and grinding of coffee and spice in 1900, with 1,541 wage-earners, and products valued at $22,470,856. In 1890 there were 70 establishments, 1,260 wage-earners, and products valued at $31,013,213. The decrease in the value of products during the decade was $8,542,357, or 27.5 per cent. The business of roasting coffee and grinding coffee and spices is a leading industry in the borough of Brooklyn. The investment of capital more than doubled in the recent decade, but as the price of coffee was virtually cut in two between 1890 and 1900 the value of the product has diminished. It is closely associated with the wholesale grocery trade, which is centered in New York city.

There were 393 establishments engaged in the manufacture of millinery and lace goods in 1900, with 11,274 wage-earners, and products valued at $21,037,782. In 1890 there were 165 establishments, 6,038 wage-earners, and products valued at $10,803,361. The increase in the value of products during the decade was $10,234,421, or 94.7 per cent.

There were 101 establishments engaged in the manufacture of gas in 1900, with 5,381 wage-earners, and products valued at $20,917,726. In 1890 there were 94 establishments, 3,970 wage-earners, and products valued at $18,716,683. The increase in the value of products during the decade was $2,201,043, or 11.8 per cent.

There were 858 establishments engaged in the manufacture of confectionery in 1900, with 7,230 wage-earners, and products valued at $18,842,148. In 1890 there were 657 establishments, 5,920 wage-earners, and products valued at $12,920,812. The increase in the value of products during the decade was $5,921,336, or 45.8 per cent.

There were 392 establishments engaged in the manufacture of patent medicines and compounds in 1900, with 2,885 wage-earners, and products valued at $17,075,937. In 1890 there were 227 establishments, 1,467 wage-earners, and products valued at $8,032,938. The increase in the value of products during the decade was $9,042,999, or 112.6 per cent.

There were 82 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 13,062 wage-earners, and products valued at $16,194,850. In 1890 there were 46 establishments, 8,585 wage-earners, and products valued at $9,046,025. The increase in the value of products during the decade was $7,148,825, or 79 per cent.

There were 560 establishments engaged in the manufacture of fur goods in 1900, with 4,454 wage-earners, and products valued at $15,828,996. In 1890 there were 281 establishments, 4,342 wage-earners, and products valued at $12,434,272. The increase in the value of products during the decade was $3,394,724, or 27.3 per cent.

There were 193 establishments engaged in the manufacture of musical instruments in 1900, with 7,244 wage-earners, and products valued at $15,509,839. In 1890 there were 211 establishments, 7,142 wage-earners, and products valued at $15,713,919. The decrease in the value of products during the decade was $204,080, or 1.3 per cent. Pianofortes were made in New York as far back as 1785,[1] when George Ulshoefer, a German musician, exhibited a pianoforte of his own make in the coffee room of the City Tavern. New York city has for years led all cities in the United States in the manufacture of pianos.

There were 30 establishments engaged in the manufacture of iron and steel in 1900, with 5,418 wage-earners, and products valued at $13,858,553. In 1890 there were 44 establishments, 6,848 wage-earners, and products valued at $15,849,537. The decrease in the value of products during the decade was $1,990,984, or 12.6 per cent.

As a colony New York attained less prominence in the iron industry than its neighbors to the east and south. The first iron works recorded by Bishop were the furnace and forge built by Philip Livingston upon the Livingston manor in Columbia county to utilize the ore of the Salisbury mine (of which he was one of the principal owners) just across the Connecticut line.[2] In 1850 a rich deposit of iron was found in Sterling Mountain in Orange county, near the New Jersey border, and this mine is worked at the present day. A blast furnace was at once erected near by, and, in 1751, a forge for the making of anchors. The first steel made in New York was produced at the Sterling works in 1776, and during the Revolution the iron was used for cannon, bar iron, etc. But its most famous product was the great chain which was forged there and then stretched across the Hudson at West Point to bar the passage of British ships. Other mines were opened and furnaces built in the Highlands, either in Orange county or the neighboring counties of Putnam and Dutchess, but it was not until after the Revolution that the far richer deposits in the Adirondacks were worked. The first iron works in that region were built in Essex county in 1801, and the mining of iron ore in New York became, especially after the construction of the Champlain Canal, a great industry. The ore extracted from the mines of the Adirondacks and Highlands was turned into pig iron by local blast furnaces,[3] and then shipped to the manufacturers of merchant bar iron, plates, rails, spikes, and steel. Troy was long the center of New York's iron and steel industry. In that city, in 1865, was established the second Bessemer steel works built in the United States.[4] And in 1875, upon the consolidation of 2 large establishments, it possessed probably the largest plant in the United States. The beginning of the great iron works and rolling mills in Troy and Albany may perhaps be traced to a nail factory erected in Albany in 1787; at any rate, nails were the principal product of the rolling mill built by Brinckerhoff in 1807, which afterwards became

[4] Tenth Census of the United States, Manufactures, folio 862.

the property of the Albany and Rensselaer Iron and Steel Company and finally of the Troy Steel Company. In the production of iron and steel New York held a high place until 1890. But with the decline of iron mining the production of pig iron has also fallen off, while the eastern manufacturers of iron and steel have steadily lost ground since coke became the most economical fuel. In 1860 and 1880 New York ranked third among the states in the production of iron ore, and in 1870 and at the census of 1890 fourth, although in 1890 the value of its product slightly exceeded that of Pennsylvania, which ranked third in production. But since then the competition of Lake Superior ore, produced at low cost, together with litigation among the mining companies of the state, have reduced the New York output to a seventh of what it was ten years ago. At the present time, however, a corporation capitalized at $40,000,000 is building an iron and steel plant at Buffalo, where bituminous coal and coke may be cheaply transported.

There were 893 establishments engaged in the manufacture of carriages and wagons in 1900, with 6,981 wage-earners, and products valued at $13,068,385. In 1890 there were 1,098 establishments, 9,776 wage-earners, and products valued at $16,803,241. The decrease in the value of products during the decade was $3,734,856, or 22.2 per cent.

There were 91 establishments engaged in the manufacture of soap and candles in 1900, with 2,020 wage-earners, and products valued at $12,833,645. In 1890 there were 101 establishments, 1,711 wage-earners, and products valued at $9,036,982. The increase in the value of products during the decade was $3,796,663, or 42 per cent.

There were 203 establishments engaged in the manufacture of ironwork, architectural and ornamental, in 1900, with 4,942 wage-earners, and products valued at $12,745,249. In 1890 there were 155 establishments, 4,018 wage-earners, and products valued at $8,386,281. The increase in the value of products during the decade was $4,358,968, or 52 per cent.

There were 111 establishments engaged in lithographing and engraving in 1900, with 6,335 wage-earners, and products valued at $11,062,856. In 1890 there were 94 establishments, 4,094 wage-earners, and products valued at $8,333,764. The increase in the value of products during the decade was $2,729,092, or 32.7 per cent. Electrotyping and photoengraving, although not invented in New York, have been most largely used there. New York wood and steel engravers are preeminent, and the finest quality of bank-note engraving is done in New York city. The first distinctive lithographing establishment in New York was started about 1830 as a branch of a Philadelphia house. The business has developed rapidly in recent years and has now become one of New York's leading industries. Buffalo has one of the largest show printing houses in the world.

There were 244 establishments engaged in the manufacture of gloves and mittens in 1900, with 9,889 wage-earners, and products valued at $10,835,898. In 1890 there were 212 establishments, 6,208 wage-earners, and products valued at $7,369,730. The increase in the value of products during the decade was $3,466,168, or 47 per cent. The glove industry is localized in the twin cities of Gloversville and Johnstown, in Fulton county, close to the Adirondacks, whence came formerly the supply of deerskin (buckskin). Kid and lamb skins are now made into glove leather by numerous tanneries in Fulton county.

There were 87 establishments engaged in the manufacture of agricultural implements in 1900, with 5,551 wage-earners, and products valued at $10,537,254. In 1890 there were 116 establishments, 5,620 wage-earners, and products valued at $11,680,842. The decrease in the value of products during the decade was $1,143,588, or 9.8 per cent.

The manufacture of agricultural implements is principally foundry and machine shop work and in the early part of the Nineteenth century was not specialized. New York's share in the development of the industry has always been an honorable one, as befits a great agricultural commonwealth. James Oliver perfected the chilled plow and built up a large business at Syracuse. The Pitts Brothers patented the first successful threshing machines in 1837,[1] and from Buffalo long supplied them to farmers throughout the country. Ketchum was the first to build distinctive mowing machines and they were likewise manufactured in Buffalo, while the famous Walter A. Wood mower, patented in the early fifties, is still made at Hoosick Falls. A great deal of Buffalo's western trade has passed to Ohio and Illinois competitors, but in the state as a whole the amount of capital invested and of wages paid in this industry has increased to the present day. The principal centers are Auburn, Syracuse, Hoosick Falls, Poughkeepsie, and Buffalo.

There were 250 establishments engaged in the manufacture of jewelry in 1900, with 3,022 wage-earners, and products valued at $10,244,624. In 1890 there were 195 establishments, 1,994 wage-earners, and products valued at $7,385,139. The increase in the value of products during the decade was $2,859,485, or 38.7 per cent.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Albany, Auburn, Binghamton, Buffalo, Cohoes, Elmira, Kingston, Newburg, New York (including sub-totals for the boroughs of Brooklyn, Manhattan and Bronx, Queens, and Richmond), Oswego, Poughkeepsie, Rochester, Syracuse, Troy, Utica, and Yonkers as returned at the censuses of 1890 and 1900, with the percentages of increase.

[1] One Hundred Years of American Commerce, Vol. II, pages 353 and 355.

TABLE 4.—COMPARATIVE SUMMARY, ALBANY, AUBURN, BINGHAMTON, BUFFALO, COHOES, ELMIRA, KINGSTON, NEWBURG, NEW YORK, OSWEGO, POUGHKEEPSIE, ROCHESTER, SYRACUSE, TROY, UTICA, AND YONKERS, 1890 AND 1900, WITH PER CENT OF INCREASE.

	Year.	Number of establishments.	Capital.	Wage-earners. Average number.	Wage-earners. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
The State	1900	78,658	$1,651,210,220	849,056	$408,855,652	$221,886,271	$1,143,791,776	$2,175,726,900

[1] Decrease.

[2] Less than one-tenth of 1 per cent.

It appears from Table 4 that there has been a considerable increase during the past decade in the combined manufactures of these 16 cities. The number of establishments increased from 49,954 to 53,794, or 7.7 per cent; the average number of wage-earners, from 605,478 to 647,948, or 7 per cent; and the value of products from $1,440,072,313 to $1,757,165,715, or 22 per cent. The percentage of increase in all these particulars was smaller in these 16 cities than in the state as a whole. The proportionate production of the 16 cities in the state's total has declined since 1890. This is due to the development of industrial cities and villages not included in Table 4, but included in Table 5, notably Niagara Falls, which doubled its population from 1890 to 1900; Schenectady, the seat of the General Electric Company's large plant, and also of a branch of the American Locomotive Company; Jamestown, a center for worsted goods and furniture; and Lestershire, a suburb of Binghamton. The city of Kingston shows the most rapid growth, the value of products having increased from $4,009,574 to $5,280,478, or 31.7 per cent. In New York, the leading city, the number of establishments increased from 37,163 to 39,776, or 7 per cent; the average number of wage-earners from 415,552 to 462,763, or 11.4 per cent; and the value of products from $1,084,850,236 to $1,371,358,468, or 26.4 per cent. The number of establishments, number of wage-earners, and value of products in this city in 1900, constituted 50.6, 54.5, and 63 per cent, respectively, of the totals for the state.

The leading manufacturing industries of New York city in the order of their importance were: Clothing, men's, factory product; clothing, women's, factory product; sugar and molasses, refining; printing and publishing, newspapers and periodicals; foundry and machine shop products; liquors, malt; tobacco, cigars and cigarettes; slaughtering, wholesale, not including meat packing; printing and publishing, book and job; petroleum, refining.

In Buffalo, the city second in rank, the leading manufacturing industries were: Slaughtering and meat packing, wholesale; copper, smelting and refining; foundry and machine shop products; oil, linseed; cars and general shop construction and repairs by steam railroad companies; liquors, malt; soap and candles; flouring and grist mill products; lumber, planing mill products; clothing, men's, factory product; iron and steel.

In Rochester, the city third in rank, the leading manufacturing industries were: Clothing, men's, factory product; boots and shoes, factory product; foundry and machine shop products; tobacco, cigars and cigarettes; flouring and grist mill products; liquors, malt; photographic apparatus and materials; optical goods.

In Syracuse, the city fourth in rank, the leading manufacturing industries were: Clothing, men's, factory product; foundry and machine shop products; iron and steel; liquors, malt; iron and steel, pipe, wrought; typewriter supplies; boots and shoes, factory product; agricultural implements; flouring and grist mill products; furniture, factory product.

In Troy, the city fifth in rank, the leading manufacturing industries were: Furnishing goods, men's; shirts; iron and steel; foundry and machine shop products: liquors, malt; hosiery and knit goods; paper and wood pulp; printing and publishing, newspapers and periodicals; flouring and grist mill products.

In Albany, the city sixth in rank, the leading manufacturing industries were: Cars and general shop construction and repairs by street railroad companies; liquors, malt; printing and publishing, book and job; chemicals; tobacco, cigars and cigarettes; paper goods, not elsewhere specified; gas machines and meters; slaughtering and meat packing, wholesale.

In Yonkers, the city seventh in rank, the leading manufacturing industries were: Carpets and rugs, other than rag; fur hats; sugar and molasses, refining; foundry and machine shop products; patent medicines and compounds; electrical apparatus and supplies; photographic materials.

In Utica, the city eighth in rank, the leading manufacturing industries were: Cotton goods; clothing, men's, factory product; hosiery and knit goods; steam fittings and heating apparatus; foundry and machine shop products; liquors, malt; lumber, planing mill products.

In Binghamton, the city ninth in rank, the leading manufacturing industries were: Tobacco, cigars and cigarettes; flouring and grist mill products; clothing, men's, factory product; patent medicines and compounds; lumber, planing mill products; furniture, factory product.

In Cohoes, the city tenth in rank, the leading manufacturing industries were: Hosiery and knit goods; cotton goods; iron and steel, pipe, wrought; shirts; iron and steel; house furnishing goods, not elsewhere specified.

In Auburn, which ranks eleventh in Table 4, but which is the city twelfth in rank in the state, the leading manufacturing industries were: Agricultural implements; boots and shoes, factory product; foundry and machine shop products; cordage and twine; woolen goods.

In Elmira, which ranks twelfth in Table 4, but which is the city sixteenth in rank in the state, the leading manufacturing industries were: Lumber, planing mill products; bridges; cars and general shop construction and repairs by steam railroad companies; hosiery and knit goods; tobacco, stemming and rehandling; iron and steel.

In Oswego, which ranks thirteenth in Table 4, but which is the city eighteenth in rank in the state, the leading manufacturing industries were: Boxes, wooden packing; matches; hosiery and knit goods; starch; malt; cars and general shop construction and repairs by steam railroad companies.

In Poughkeepsie, which ranks fourteenth in Table 4, but which is the city twentieth in rank in the state, the leading manufacturing industries were: Iron and steel; clothing, men's, factory product; agricultural implements; foundry and machine shop products; glass; patent medicines and compounds.

In Newburg, which ranks fifteenth in Table 4, but which is the city twenty-second in rank in the state, the leading

manufacturing industries were: Clothing, men's, factory product; foundry and machine shop products; fur hats; shipbuilding, iron and steel; lime and cement; silk and silk goods.

In Kingston, which ranks sixteenth in Table 4, but which is the city twenty-eighth in rank in the state, the leading manufacturing industries were: Cars, street railroad, not including operations of railroad companies; lumber, planing mill products; lime and cement; shirts.

Table 5 presents the totals for the manufacturing industries of the 106 cities and villages withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and villages, and shows their rank in population and in value of products.

TABLE 5.—URBAN MANUFACTURES.

[1] Given as Sing Sing in 1890.
[2] Less than one-tenth of 1 per cent.
[3] Given as Greenbush in 1890.
[4] By the act of February 6, 1900, parts of the towns of Brunswick, Lansingburg, and North Greenbush were annexed to the city of Troy, but this act did not become effective until January 1, 1901. Including this annexed territory, the population of Troy in June, 1900, was 75,057.
[5] Given as West Troy in 1890.

Of the 78,658 establishments in the state, 62,567, or 79.6 per cent, were located in these 106 cities and villages. They furnished employment to 761,580 wage-earners, or 89.7 per cent of the total number, and the value of their products, $1,975,039,088, formed 90.8 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Albany, Amsterdam, Auburn, Binghamton, Buffalo, Cohoes, Elmira, Jamestown, Kingston, Newburg, Greater New York (also the boroughs of Brooklyn, and Manhattan and Bronx), Oswego, Poughkeepsie, Rochester, Schenectady, Syracuse, Troy, Utica, Watertown, and Yonkers, by specified industries.

Table 9 shows the totals for the cities and villages withdrawn from the enumerators, exclusive of those shown in Table 8.

TABLE 6.—MANUFACTURES

NORTH CAROLINA.

Table 1 shows the manufacturing and mechanical industries of the state of North Carolina as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] As given for the year 1900 in Dana's supplement, "State and City," to the Commercial and Financial Chronicle, under date of April 13, 1901.
[6] Does not include value of rented property.

Although North Carolina is an agricultural state, Table 1 shows that there has been a large growth in its manufacturing and mechanical industries during the half century. The population during these years increased from 869,039 to 1,893,810, or 117.9 per cent, while the average number of wage-earners employed in manufacturing establishments increased from 14,601 to 70,570, or 383.3 per cent, embracing, in 1900, 3.7 per cent of the entire population, compared with 1.7 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 93,325, or 4.9 per cent of the total population of the state. Both the greatest percentage of increase and the greatest absolute increase in the value of products are shown for the decade ending with 1900.

North Carolina has waterpower estimated at 3,500,000 horsepower, of which, at present, only 639,000 is available, according to a calculation by the late W. C. Kerr, state geologist. When the electrical transmission of energy becomes more general in the state, a much greater proportion of this power can be profitably applied to manufactures. Table 1 shows that during the last decade the number of men among the wage-earners increased 96.6 per cent, while the number of women increased 151.2 per cent, and the number of children, 119.2 per cent. Steps have already been taken to check the increase of child labor shown by these figures. In the absence of legislation, nearly all the mill owners have agreed to discontinue the employment of children under 12 years of age.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for educational, eleemosynary, and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	12,210	$78,290,034	13,988	74,976	$13,974,225	$9,175,717	$53,530,990	$30,479,165	$20,647,961	$2,403,864	$96,130,049
Hand trades[1]	1,023	908,504	1,160	2,219	687,000	104,389	1,542,972	1,993	1,493,595	47,384	3,153,280
Educational, eleemosynary, and penal institutions	13	71,127	1	64	8,037	1,820	91,136	7,345	75,157	8,634	173,496
Establishments with a product of less than $500	4,971	1,715,013	5,514	4,312	97,758	55,260	367,466	139,170	228,296		1,036,890
All other establishments	6,203	75,595,390	7,313	68,351	13,181,430	9,014,248	51,529,416	30,330,657	18,850,913	2,347,846	91,766,383

[1] Includes bicycle and tricycle repairing, 40; blacksmithing and wheelwrighting, 396; boots and shoes, custom work and repairing, 93; carpentering, 68; clothing, men's, custom work and repairing, 54; clothing, women's, dressmaking, 22; dyeing and cleaning, 9; furniture, cabinetmaking, repairing, and upholstering, 33; lock and gun smithing, 8; masonry, brick and stone, 13; millinery, custom work, 139; painting, house, sign, etc., 26; paper hanging, 2; plastering and stuccowork, 1; plumbing, and gas and steam fitting, 33; sewing machine repairing, 5; taxidermy, 1; watch, clock, and jewelry repairing, 80.

Of the 12,210 establishments of all classes shown in this table, 5,994, or 49.1 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $4,190,170, or only 4.4 per cent of the total value of the products of the state.

In addition to the 12,210 active establishments in the state during the census year, with a capital of $78,290,034, shown in Table 2, there were 174 idle establishments, with a capital of $762,243, divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Brick and tile	28	$71,005	Kaolin and other earth grinding	2	$32,500
Chemicals	1	42,000	Leather, tanned, curried, and finished	4	38,810
Cotton, ginning	40	27,375	Lumber and timber products	34	162,182
Flouring and grist mill products	12	14,332	Rice, cleaning and polishing	2	66,000
Furniture, factory product	2	16,800	Tobacco, chewing, smoking, and snuff	4	126,075
Hosiery and knit goods	3	84,900	Woodenware, not elsewhere specified	1	52,300
Iron and steel	1	11,000	All other industries	40	16,964

TABLE 3.—COMPARATIVE SUMMARY OF TEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for selected industries for state	1900	4,071	$65,067,116	55,642	$10,406,314	$8,020,076	$44,333,174	$77,351,282

[1] Exclusive of 1 establishment for the manufacture of "furniture, chairs," for which no figures are available, as the statistics were included in "all other industries."

The 10 leading industries of the state in 1900, as shown by Table 3, embraced 4,071 establishments, or 56.3 per cent of the total number in the state; used a capital of $65,067,116, or 85.1 per cent of the total; gave employment to 55,642 wage-earners, or 78.8 per cent of the total number; and paid $10,406,314, or 75 per cent of the total wages. The value of their products was $77,351,282, or 81.5 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of cotton goods is the most important industry in the state. The 177 establishments reported in 1900 gave employment to 30,273 wage-earners, or 42.9 per cent of the wage-earners employed in the state, and the products were valued at $28,372,798, or 29.9 per cent of the total value of the products of the state. In 1890 there were 91 establishments, 8,515 wage-earners, and products valued at $9,563,443. The increase in the value of products during the decade was $18,809,355, or 196.7 per cent.

The growth of the manufacture of cotton goods has been steady since 1850. The period both of greatest absolute increase and of greatest percentage of increase in the value of products was during the decade ending with 1900. In 1890 the state was tenth in rank in this manufacture in the United States; it is now third, Massachusetts being first and South Carolina second. In 1890 among Southern states it ranked third; it is now second, South Carolina preceding it, and Georgia taking third place. Although second in value of products, it is first in number of establishments, in average number of employees, and in total wages paid. The amount of cotton consumed yearly by the spindles now running is nearly equivalent to the annual cotton crop of the state, which in 1899 was 473,155 commercial bales.

The manufacture of lumber and timber products ranks second among the industries of the state, with 1,770 establishments, 11,751 wage-earners, and products valued at $14,862,593. In 1890 there were 713 establishments, 6,466 wage-earners, and products valued at $5,898,742. The increase in the value of products during the decade was $8,963,851, or 152 per cent. The growth of this industry during the last two decades has been remarkable.

There were 80 establishments engaged in 1900 in the manufacture of chewing and smoking tobacco and snuff, the industry third in rank, with 6,403 wage-earners, and products valued at $13,620,816. In 1890 there were 90 establishments, 6,002 wage-earners, and products valued at $4,783,484. The increase in the value of products during the decade was $8,837,332, or 184.7 per cent. Tobacco has been for years one of North Carolina's best-known products, certain brands of its smoking tobacco and cigarettes having both a national and foreign reputation.

There were 1,773 establishments engaged in the manufacture of flouring and grist mill products in 1900, with 1,019 wage-earners, and products valued at $8,867,462. In 1890 there were 1,039 establishments, 1,124 wage-earners, and products valued at $5,279,068. The increase in the value of products during the decade was $3,588,394, or 68 per cent.

There were 101 establishments engaged in the manufacture of planing mill products in 1900, with 1,939 wage-earners, and products valued at $2,892,058. In 1890 there were 42 establishments, 584 wage-earners, and products valued at $915,070. The increase in the value of products during the decade was $1,976,988, or 216 per cent.

There were 21 establishments engaged in the manufacture of cottonseed oil and cake in 1900, with 564 wage-earners, and products valued at $2,676,871. In 1890 there were 11 establishments, 318 wage-earners, and products valued at $529,746. The increase in the value of products during the decade was $2,147,125, or 405.3 per cent.

There were 44 establishments engaged in the manufacture of furniture in 1900, with 1,759 wage-earners, and products valued at $1,547,305. In 1890 there were 6 establishments, 152 wage-earners, and products valued at $159,000. The increase in the value of products during the decade was $1,388,305, or 873.1 per cent. The little town of High Point, the center of this new development, is already noted for its manufacture of furniture.

There were 12 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 1,141 wage-earners, and products valued at $1,511,376. In 1890 there were 9 establishments, 434 wage-earners, and products valued at $393,576. The increase in the value of products during the decade was $1,117,800, or 284 per cent.

There were 75 establishments engaged in the tanning, currying, and finishing of leather in 1900, with 366 wage-earners, and products valued at $1,502,378. In 1890 there were 55 establishments, 107 wage-earners, and products valued at $190,887. The increase in the value of products during the decade was $1,311,491, or 687.1 per cent.

There were 18 establishments engaged in the manufacture of fertilizers in 1900, with 427 wage-earners, and products valued at $1,497,625. In 1890 there were 12 establishments, 343 wage-earners, and products valued at $994,135. The increase in the value of products during the decade was $503,490, or 50.6 per cent. Nearly all the phosphate rock used as a basis for fertilizer manufacture is brought into the state from Tennessee, South Carolina, and Florida. Some years ago much of this rock was mined in North Carolina, and large deposits still exist in the state, but imbedded in them are small white pebbles which, crushed with the phosphate rock, lower the grade of the fertilizer. No plan for separating them has yet been devised. Much of the cottonseed meal produced in the state is used as a source of ammonia in the manufacture of fertilizers. Slaughterhouse material, brought from Chicago and Omaha, is employed for the same purpose. The potash used is imported from Germany.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the city of Wilmington, as returned at the censuses of 1890 and 1900, with the percentages of increase.

TABLE 4.—COMPARATIVE SUMMARY, WILMINGTON, 1890 AND 1900, WITH PER CENT OF INCREASE.

	DATE OF CENSUS.		Per cent of increase, 1890 to 1900.
	1900	1890	
Number of establishments	131	121	8.3
Capital	$2,968,199	$1,752,667	69.4
Wage-earners, average number	1,850	1,358	36.2
Total wages	$568,250	$460,608	23.4
Miscellaneous expenses	$158,723	$105,571	50.3
Cost of materials used	$1,734,054	$1,014,384	70.9
Value of products, including custom work and repairing	$2,960,028	$1,904,147	55.5

It appears from Table 4 that there has been an increase during the past decade in the manufactures of this city. The number of establishments increased from 121 to 131, or 8.3 per cent; the average number of wage-earners from 1,358 to 1,850, or 36.2 per cent; and the value of products from $1,904,147 to $2,960,028, or 55.5 per cent. The number of establishments, number of wage-earners, and value of products, in this city in 1900, constituted 1.8, 2.6, and 3.1 per cent, respectively, of the totals for the entire state.

Table 5 presents the totals for the manufacturing industries of the 15 cities and towns withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and towns, and shows their rank in population and in value of products.

Per cent of urban manufactures to total for state	15.0	34.5	12.7	33.4	36.6	73.8	34.3	38.8	-------	-------	7.3	-------	-------

Of the 7,226 establishments in the state, 1,086, or 15 per cent, were located in these 15 cities and towns. The capital reported for these establishments was $26,431,260, or 34.5 per cent of that for the entire state. They furnished employment to 23,571 wage-earners, or 33.4 per cent of the total number, and the value of their products, $36,806,902, formed 38.8 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the city of Wilmington by specified industries.

Table 9 shows the totals for all industries in the cities and towns withdrawn from the enumerators, exclusive of the city of Wilmington.

TABLE 6.—MANUFACTURES

NORTH DAKOTA.

North Dakota was admitted as a state on November 2, 1889. Prior to that date it formed a part of the territory of Dakota, therefore, the Eleventh Census (1890) was the first in which the statistics for the state were published separately.

Table 1 is a comparative summary of the manufacturing and mechanical industries of North Dakota as returned at the censuses of 1890 and 1900, with the percentages of increase for the decade. This table also presents the average number of wage-earners employed by manufacturing establishments in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1890 AND 1900, WITH PER CENT OF INCREASE FOR THE DECADE.

	1900	1890	Per cent of increase.		1900	1890	Per cent of increase.
Number of establishments	1,130	382	195.8	Miscellaneous expenses	$302,492	$236,909	27.7
Capital	$5,396,490	$2,894,553	86.4	Cost of materials used	$5,615,793	$3,087,161	81.9
Salaried officials, clerks, etc., number	168	[1]348	[2]51.7	Value of products, including custom work and repairing	$9,183,114	$5,028,107	82.6
Salaries	$141,432	[1]$243,749	[2]42.0				
Wage-earners, average number	2,398	1,499	60.0				
Total wages	$1,222,472	$759,132	61.0	Total population	[3]312,239	182,719	70.9
Men, 16 years and over	2,168	1,398	55.1	Wage-earners engaged in manufactures	2,398	1,499	60.0
Wages	$1,160,288	$733,179	58.3	Per cent of total population	0.8	0.8	----------
Women, 16 years and over	193	85	127.1	Assessed value of real estate	$90,942,019	$65,181,187	39.5
Wages	$57,433	$23,195	147.6	Value of land and buildings invested in manufactures[4]	$1,411,428	$699,680	101.7
Children, under 16 years	37	16	131.3	Per cent of assessed value	1.6	1.1	----------
Wages	$4,751	$2,758	72.3				

[1] Includes proprietors and firm members, with their salaries; number only reported for 1900. (See Table 5.)
[2] Decrease.
[3] Exclusive of 6,907 Indians and other persons on Indian reservations, which classes were not included at previous censuses.
[4] Does not include the value of rented property.

While Table 1 indicates that the manufacturing and mechanical industries have increased during the past decade, it is still true that the principal industries of the state are agriculture and stock raising. Manufacturing is limited almost entirely to the so-called neighborhood industries, and, with the exception of the flour and grist mill industry, practically the entire product is consumed at or near the point of production. During the year 1900 the product of the flour and grist mills was valued at $4,134,023, or 45 per cent of the total value of the product for the entire state. There were 6,060,839 bushels of cereals of all kinds reported as material, valued at $3,065,489. This quantity included 4,827,477 bushels of wheat, valued at $2,756,484. The next most important cereal ground was barley, of which there were 590,564 bushels, valued at $112,844.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments, institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	COST OF MATERIALS USED. Total.	COST OF MATERIALS USED. Purchased in raw state.	COST OF MATERIALS USED. Purchased in partially manufactured form.	COST OF MATERIALS USED. Fuel, freight, etc.	Value of products, including custom work and repairing.
Total	1,335	$5,662,347	1,465	2,464	$1,228,088	$308,664	$5,675,275	$3,485,369	$1,893,290	$296,616	$9,287,259
Hand trades[1]	558	1,088,681	628	841	443,735	71,019	917,741	350	863,893	53,498	2,038,966
Governmental establishments	3	5,100	-------	4	1,520	-------	6,805	6,000	655	150	10,685
Penal institutions	2	152,000	-------	20	800	1,200	29,701	25,000	1,501	3,200	38,900
Establishments with a product of less than $500	200	108,757	213	42	3,296	4,972	22,976	1,875	21,101	-------	54,560
All other establishments	572	4,307,809	624	1,557	778,737	231,473	4,698,052	3,452,144	1,006,140	239,768	7,144,148

[1] Includes bicycle and tricycle repairing, 23; blacksmithing and wheelwrighting, 293; boots and shoes, custom work and repairing, 20; carpentering, 35; clothing, men's, custom work and repairing, 50; clothing, women's, dressmaking, 10; dyeing and cleaning, 1; furniture, cabinetmaking, repairing, and upholstering, 7; lock and gun smithing, 2; masonry, brick and stone, 8; millinery, custom work, 46; painting, house, sign, etc., 12; plastering and stuccowork, 1; plumbing, and gas and steam fitting, 12; taxidermy, 2; watch, clock, and jewelry repairing, 34.

In addition to the 1,335 active establishments in the state during the census year, with a capital of $5,662,347, shown in Table 2, there were 10 idle establishments with a capital of $44,950.

Table 3 presents the totals for the manufacturing industries in Fargo and Grand Forks, and places them in comparison with the totals for the entire state and the state exclusive of these cities.

TABLE 3.—URBAN MANUFACTURES.

	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
Total for state	1,130	$5,396,490	1,252	2,398	$1,222,472	$302,492	$5,615,793	$9,183,114
Total for urban manufactures	170	1,921,130	183	1,026	610,547	140,587	1,752,403	3,222,568
Fargo	93	1,092,026	98	705	383,500	76,352	1,272,753	2,137,802
Grand Forks	77	829,104	85	321	227,047	64,235	479,650	1,084,766
Total for state exclusive of urban manufactures	960	3,475,360	1,069	1,372	611,925	161,905	3,863,390	5,960,546
Per cent of urban manufactures to total for state	15.0	35.6	14.6	42.8	49.9	46.5	31.2	35.1

It appears from Table 3 that, compared with the totals for the state, the 2 cities furnished employment to 42.8 per cent of the wage-earners and made 35.1 per cent of the products.

The detailed statistics of the census of 1900 are presented in the 3 tables which follow.

Table 4 shows the totals for the state by counties.

Table 5 shows the totals for the state by specified industries.

Table 6 shows the totals for all industries in the cities withdrawn from the enumerators.

TABLE 4.—MANUFACTURES

[No manufactures reported

OHIO.

Table 1 shows the manufacturing and mechanical industries of the state of Ohio as returned at the censuses of 1850 to 1900, inclusive, with the percentages of increase for each decade. This table also presents the average number of wage-earners employed by manufacturing establishments, in comparison with the total population of the state, and the value of the land and buildings owned and reported by manufacturers as capital, in comparison with the assessed value of all real estate and improvements.

TABLE 1.—COMPARATIVE SUMMARY, 1850 TO 1900, WITH PER CENT OF INCREASE FOR EACH DECADE.

	DATE OF CENSUS.						PER CENT OF INCREASE.				
	1900	1890	1880	1870	1860	1850	1890 to 1900	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860
Number of establishments	32,398	28,673	20,699	22,773	11,123	10,622	13.0	38.5	19.1	104.7	4.7
Capital	$605,792,266	$402,793,019	$188,939,614	$141,923,964	$57,295,303	$29,019,538	50.4	113.2	33.1	147.7	97.4

[1] Decrease.
[2] Includes proprietors and firm members, with their salaries; number only reported in 1900. (See Table 7.)
[3] Not reported separately.
[4] Not reported.
[5] As given in the report of the Secretary of State of Ohio, 1900, page 678.
[6] Does not include value of rented property.

Table 1 shows that there has been a large growth in the manufacturing and mechanical industries of Ohio during the half century. The population during these years increased from 1,980,329 to 4,157,545, while the average number of wage-earners employed in manufacturing establishments increased from 51,491 to 345,869, embracing, in 1900, 8.3 per cent of the entire population, compared with 2.6 per cent in 1850. Probably the best indication of the importance of the wage-earning class is afforded by the greatest number employed at any one time during the year. In 1900 this was 451,686, or 10.9 per cent of the total population of the state. The greatest percentage of increase in the value of products, 121.6, is shown for the decade ending with 1870, but the greatest absolute increase, $293,389,674, was between the years 1880 and 1890.

If the value of products given for 1870 is reduced to a gold basis, the absolute increase for each decade from 1850 to 1900, successively, is found to be $58,998,869, $94,079,740, $132,527,502, $293,389,674, and $190,750,049. The increase was therefore greater at each successive decade except the last. At the censuses of 1840, 1850, 1860, and 1870 Ohio ranked fourth in the United States in the value of all manufactures. In 1880 the state became fifth, and has held that rank ever since.

Of the various causes which have contributed to the early development and steady advance of manufacturing in Ohio, the great commercial advantages of the state must be considered the most important. Water communication with the Atlantic seaboard is afforded by Lake Erie and the Erie Canal, and with the states of the northwest by the western Great Lakes and the Sault Ste. Marie Canal, while the Ohio River, which forms the southern boundary of the state for 436 miles, and its tributary, the Muskingum River, navigable for several miles above Zanesville, furnish cheap communication with western Pennsylvania and the entire Mississippi Valley. Two canals, connecting Lake Erie with the Ohio River, one from Cleveland to Portsmouth, and the other from Toledo to Cincinnati, were constructed by the state between the years 1825 and 1835. Settlements, trade, and local manufactures developed almost entirely along these waterways during the earlier years of the century. Other parts of the state were opened up by the construction of railroads, but the effect of these water routes in the localization of manufactures is still very marked, for in 1900 the great manufacturing centers of the state were located at the lake and river termini of the two principal canals, along these canals and their feeders north of Cincinnati and south and southeast of Cleve-

land, and along the Ohio River west and northwest of Wheeling.

During the first half of the century, owing to the existence of these water routes to the East, Ohio was the most accessible region west of the Allegheny Mountains, and was the first state, therefore, to feel the effect of westward emigration on a large scale. From 1820 to 1880 the population exceeded that of any other state west of the Allegheny Mountains. Many of the settlers came from New England, New York, and Pennsylvania, bringing with them the mechanical knowledge gained in their former homes. Machinery and tools were also brought from these older manufacturing sections, and industries for the supplying of local needs were started. Production for the broader market received its first great impetus when steam navigation began on the Ohio River, between the years 1810 and 1820. The rapid settlement of the Mississippi Valley developed a market which eastern manufacturers found difficult to enter in competition with the more favorably located establishments of Cincinnati. The rise of this city as a manufacturing center was remarkable. Coal brought down the Ohio River at small expense from Pennsylvania was most largely used. Pennsylvania furnished also crude forms of iron, and forests in the vicinity supplied abundant hard wood. In 1803 manufactured products were shipped to points along the Mississippi River as far south as New Orleans.[1]

Cleveland was essentially a commercial city during the first half of the century, its prominence being due to its location on Lake Erie, and to the trade which passed through the Ohio Canal. By 1860 railroad construction had begun to deflect commerce to other centers, but the decline threatened at that time[2] was averted by the industrial development which followed the opening of the Sault Ste. Marie Canal, in 1855. Water communication was thus furnished with the richest mines of iron ore in the United States, and the iron industries of Cleveland and the Mahoning Valley began their great development.

Among the natural resources of Ohio are a fertile soil, extensive hard-wood forests, and an abundance of coal and natural gas. This last came largely into commercial use in the state in 1884.[3] The production increased until 1889, but, on account of the exhaustion of many of the wells, has declined since that date. Ohio ranked fourth in 1899, however, in the value of natural gas produced, and considerable quantities were piped into the state from Pennsylvania, Indiana, West Virginia, Kentucky, and Canada. This fuel has been used at various times in Toledo, Findlay, Dayton, Springfield, Columbus, Zanesville, Newark, and many smaller places.[4] During 1899 it was used in 691 different establishments in the state. Petroleum also was used as a fuel, though to a less extent. The waterpower of Ohio is not extensive, its use being confined very largely to flour and grist milling, lumber milling, and the manufacture of paper and wood pulp.

Table 2 divides the industries of the state between the hand trades and the manufactures proper. This table also gives the statistics for governmental establishments, educational, eleemosynary, and penal institutions, and establishments with a product of less than $500; these were not reported at previous censuses, and therefore are omitted from the other tables and their use confined to Table 2.

TABLE 2.—SUMMARY FOR ALL ESTABLISHMENTS.

CLASSES.	Number of establishments.	Capital.	Proprietors and firm members.	WAGE-EARNERS.		Miscellaneous expenses.	COST OF MATERIALS USED.				Value of products, including custom work and repairing.
				Average number.	Total wages.		Total.	Purchased in raw state.	Purchased in partially manufactured form.	Fuel, freight, etc.	
Total	39,524	$608,410,892	44,125	349,172	$154,194,618	$69,867,179	$448,574,587	$109,646,052	$309,842,856	$29,085,679	$834,834,666
Hand trades[1]	13,696	17,648,395	15,724	29,753	13,959,714	5,484,310	24,053,373	551,734	22,943,027	558,612	58,948,854
Governmental establishments	2	116,779	--------	455	65,509	574	38,698	----------	38,428	270	225,583
Educational, eleemosynary, and penal institutions	25	595,455	--------	928	72,972	8,904	191,649	7,673	170,808	13,168	413,488
Establishments with a product of less than $500	7,099	1,906,392	7,501	1,920	100,807	129,495	494,563	46,644	444,714	3,205	1,757,482
All other establishments	18,702	588,143,871	20,900	316,116	139,995,616	64,243,896	423,796,304	109,040,001	286,245,879	28,510,424	773,489,259

[1] Includes bicycle and tricycle repairing, 377; blacksmithing and wheelwrighting, 3,585; boots and shoes, custom work and repairing, 1,461; carpentering, 1,135; clothing, men's, custom work and repairing, 1,543; clothing, women's, dressmaking, 767; dyeing and cleaning, 132; furniture, cabinetmaking, repairing, and upholstering, 303; lock and gun smithing, 105; masonry, brick and stone, 441; millinery, custom work, 1,231; painting, house, sign, etc., 887; paper hanging, 147; plastering and stuccowork, 207; plumbing, and gas and steam fitting, 612; sewing machine repairing, 20; taxidermy, 5; typewriter repairing, 2; watch, clock, and jewelry repairing, 736.

Of the 39,524 establishments of all classes shown in this table, 20,795, or 52.6 per cent, were small shops included in the groups of "hand trades" and "establishments with a product of less than $500." The value of the products of these establishments, consisting principally of the sums received for custom work and repairing, amounted to $60,706,336, or only 7.3 per cent of the total value of the products of the state.

In addition to the 39,524 active establishments in the state during the census year, with a capital of $608,410,892, shown in Table 2, there were 226 idle establishments, with a capital of $5,163,185 divided as follows:

INDUSTRIES.	Number of idle establishments.	Capital.	INDUSTRIES.	Number of idle establishments.	Capital.
Boots and shoes, factory product	3	$84,600	Lime and cement	4	$18,530
Brick and tile	35	261,526	Liquors, distilled	4	30,875
Cars, steam railroad, not including operations of railroad companies	1	8,000	Lumber and timber products	24	33,650
Cheese, butter, and condensed milk, factory product	11	24,150	Lumber, planing mill products, including sash, doors, and blinds	5	18,550
Cooperage	3	19,600	Oil, linseed	2	10,000
Flouring and grist mill products	26	156,975	Paints	1	20,000
Foundry and machine shop products	11	122,420	Paper and wood pulp	2	259,666
Furniture, factory product	3	803,022	Petroleum, refining	1	65,000
Glass	8	308,018	Pottery, terra cotta, and fire-clay products	14	332,052
Hosiery and knit goods	3	68,091	Saws	1	60,527
Iron and steel	8	1,597,700	Starch	1	400,000
Iron and steel, nails and spikes, cut and wrought, including wire nails	3	122,100	Wire	1	220,000
Leather, tanned, curried, and finished	3	14,450	Woolen goods	6	33,300
			All other industries	42	70,383

TABLE 3.—COMPARATIVE SUMMARY OF TWENTY-SEVEN LEADING INDUSTRIES.

INDUSTRIES.	Year.	Number of establishments.	Capital.	WAGE-EARNERS. Average number.	WAGE-EARNERS. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.

The 27 leading industries of the state in 1900, as shown in Table 3, embraced 9,557 establishments, or 29.5 per cent of the total number in the state; used a capital of $403,595,111, or 66.6 per cent of the total; gave employment to 213,545 wage-earners, or 61.7 per cent of the total number; and paid $97,643,723, or 63.4 per cent of the total wages. The value of their products was $547,619,814, or 65.8 per cent of the total. In the discussion of Table 3, which follows, these industries are ranked with reference to the value of their products.

Table 3 shows that the manufacture of iron and steel is the most important industry in the state. The 107 establishments reported in 1900 gave employment to 33,677 wage-earners, or 9.7 per cent of the wage-earners employed in the state, and the products were valued at $138,935,256, or 16.7 per cent of the total value of the products of the state. In 1890 there were 101 establishments, 23,546 wage-earners, and products valued at $65,206,828. The increase in the value of products during the decade was $73,728,428, or 113.1 per cent.

In the manufacture of iron and steel, Ohio has always led all states west of the Allegheny Mountains. It ranked next to New York and Pennsylvania in 1850, and since 1870 has held the second place, ranking next to Pennsylvania. There were 43 blast furnaces in operation in 1900, with products valued at $40,366,637, and 64 rolling mills and steel works, with products valued at $98,568,619. The iron ore production of Ohio in 1899 was comparatively small, amounting to 53,221 long tons,[1] or but 1.2 per cent of the iron ore used in the furnaces of the state during the census year. The coal production, on the contrary, was large, amounting to 16,500,270 short tons.[2] But as only a small amount of the coal mined in the state is made into coke,[3] the blast furnaces are supplied with their most important fuel chiefly by Pennsylvania and West Virginia. Natural gas is used in a few of the rolling mills and steel works.

The manufacture of iron and steel in 1900 was carried on chiefly in the eastern and northeastern parts of the state—Youngstown, Cleveland, Lorain, Bellaire, Mingo Junction, Niles, Steubenville, and Canal Dover turning out products valued at $88,731,725, or 63.9 per cent of the total for the state. Columbus, in the central part of the state, and Ironton, in the southern part, are also important centers. Furnaces in these districts use some local coal, and in some cases use local ores entirely. In general, however, the localization of the industry shows little relation to the deposits of iron and coal in Ohio, being rather a result of the accessibility of the eastern and northeastern parts of

the state to the Connellsville, Pa., and West Virginia coke, and to the Lake Superior iron ore. None of the principal consuming points in other states, except Pittsburg and the Shenango Valley in Pennsylvania, receive Connellsville coke so cheaply,[1] and none of the eastern iron centers are as favorably located in relation to the Lake Superior mines. In the early years of the century, the industry was dependent chiefly upon local deposits of bog and other iron ores, and upon the supply of wood for the manufacture of charcoal. The first furnace in Ohio was established in 1804 on Yellow Creek, in the Mahoning Valley, near Youngstown, which in 1900 was the leading city in the state in the iron and steel industry.[2] On the Lake Erie shore the industry probably dates from 1825, when a furnace was operated in the present county of Lake, east of Cleveland. Furnaces multiplied rapidly in this section during the next twelve years, but declined with the exhaustion of the forests which supplied the charcoal used as fuel. In those early years the most important center for the industry was the celebrated Hanging Rock district, in the south central part of the state, bordering upon the Ohio River. In 1832 a furnace, located in this district, shipped pig iron to New York by way of New Orleans "at a fair profit," and had exported a small amount on order to England.[3] Of the 35,236 tons of iron produced in the state in 1840, 20,574 tons were from the furnaces of Lawrence county, in this district. The first furnace in Ohio to use bituminous coal was built expressly for the purpose in Mahoning county, in 1846, and from that time coal furnaces increased rapidly. At a later date coke became the principal fuel. The state exempted from payment of toll on the canals all fuel to be used in iron works.[4]

Closely allied to the iron and steel manufacture is the manufacture of tin and terne plate, in which industry Ohio ranked third in 1900. There were 12 establishments in operation having products valued at $6,023,314. This manufacture was not shown separately in 1890, and for this reason its statistics for 1900 are shown only in Table 7.

The manufacture of foundry and machine shop products ranked second among the industries of the state in 1900, with 861 establishments, 41,799 wage-earners, and products valued at $72,399,632. In 1890 there were 600 establishments, 24,795 wage-earners, and products valued at $43,617,072. The increase in the value of products during the decade was $28,782,560, or 66 per cent. These products included engines, boilers, and machinery of many varieties. The industry is carried on extensively in all the leading cities of the state, but Cleveland and Cincinnati, in the order named, are the most important centers. In 1900 Ohio led all other states in the manufacture of metal-working machinery, and ranked third in the manufacture of pumping machinery. The manufacture of machine tools and wood-working machinery is made a specialty at Cincinnati; mining machines are made at Akron and Columbus, and machine tools at Hamilton. Machinery, stoves, and machine tools are exported.[5] The manufacture of foundry and machine shop products has always been one of the most important in the state, ranking second in 1850 as well as in 1900. In the early years of the century it was confined very largely to the city of Cincinnati, being favored in that locality by cheap water communication with the coal fields of Pennsylvania, West Virginia, and southern Ohio, and by the facilities for receiving pig and other crude iron from the Pittsburg district. The states of the Mississippi Valley have always constituted the principal market for Ohio machinery. A shop for the manufacture of cotton and woolen machinery was built at Cincinnati in 1809.[6] Steam navigation on the Ohio and Mississippi rivers created a demand for steamboats and steam engines, which was the chief cause of the great prosperity this city enjoyed between the years 1820 and 1832. In 1835 its foundries and machine shops manufactured 100 steam engines, 240 cotton gins, 20 sugar mills, and 22 boilers.[7] Between 1831 and 1841, 1,500 plantation cotton-spinning machines were sent to the South from a single machine shop at Cincinnati.[8] In 1851 there were 44 foundries and machine shops in that city. One-third of these manufactured stoves almost exclusively, as many as 1,000 stoves being produced in a single day.[9] The first steam fire engines put into regular service in the United States were built at Cincinnati in 1853.[10]

There were 1,150 establishments engaged in 1900 in the manufacture of flouring and grist mill products, the industry third in rank, with 2,438 wage-earners, and products valued at $37,390,367. In 1890 there were 910 establishments, 3,311 wage-earners, and products valued at $39,468,409. The decrease in the value of products during the decade was $2,078,042, or 5.3 per cent. Ohio ranked third in the United States in this industry in 1900. The most important of the products was wheat flour, valued at $26,060,827. The mills were widely scattered over the state, the greatest value of products being shown for Lucas county, which includes the city of Toledo. Ohio is the easternmost state in the corn belt. It produced 99,048,816 bushels of corn in 1899, and 39,998,006 bushels of wheat, ranking seventh in the former and third in the latter.[11] Flour and grist milling is one of the oldest industries in Ohio, flour having been sent to New Orleans as early as 1803.[12] In 1814 a nine-storied steam flour mill, famous in its day, was built at Cincinnati. In 1815

large quantities of Indian meal were exported to the West Indies.[1] In 1817 the first warehouse in Toledo for the receipt of grain was built, and in 1838 grain supplies began to reach that city from southern Michigan. In the same year a crude horsepower corn elevator was built, the first, it is claimed, to be constructed in the West.[2] The completion of the Wabash Canal in 1851, and of the Toledo, Wabash, and Western Railroad in 1856, diverted to Toledo the greater part of the traffic of central Indiana and Illinois, at that time the most productive region of the West.[3] In 1899 Toledo stood sixth in rank in grain receipts, and fourth in rank in corn receipts, among the primary grain markets of the United States.[4]

There were 190 establishments engaged in the manufacture of liquors in 1900, with 3,978 wage-earners, and products valued at $31,771,591. In 1890 there were 179 establishments, 3,666 wage-earners, and products valued at $28,484,290. The increase in the value of products during the decade was $3,287,301, or 11.5 per cent. These products included, in 1900, malt liquors valued at $18,522,639, distilled liquors valued at $12,447,268, and vinous liquors valued at $801,684.

The relative importance of the production of malt and distilled liquors has been reversed during the last half century. In 1850 the production of distilled liquors was valued at $3,040,604, and the production of malt liquors at only $528,998. The distribution of the malt liquor industry in 1900 corresponded approximately to the distribution of population. The distillation of liquors in the state has always been greatest at Cincinnati, where it is favored by the large corn production of Ohio, Kentucky, and Indiana. Ohio ranked third in this industry in 1900, the distilled liquors produced in Cincinnati being valued at $9,419,687, or 75.7 per cent of the total for the state. The industry was carried on in Ohio at least as early as 1803, when whiskey was sent from Cincinnati to New Orleans.[5] At the census of 1810, distilleries were reported in each of the 36 counties of the state, producing in all, 1,212,266 gallons of whiskey. Several of the largest distilleries in the world are located at Cincinnati, and some of the whiskey produced is exported.[6]

The cultivation of Catawba grapes and the manufacture of wine were begun in the Ohio Valley about the year 1825.[7] In 1851 there were 40 manufacturers of wine in the city of Cincinnati. About the year 1858 the climate of southern Ohio became unfavorable to the culture of grapes, and grape growing and wine manufacturing have localized recently in the counties along the shore of Lake Erie, the most important centers being near Kelleys and Put In Bay islands, where there are 6,000 acres of vineyards. In 1900 Ohio ranked third in the United States in this branch of the industry.

There were 1,196 establishments engaged in the manufacture of tobacco in 1900, with 12,180 wage-earners, and products valued at $20,832,629. In 1890 there were 995 establishments, 8,259 wage-earners, and products valued at $16,387,719. The increase in the value of products during the decade was $4,444,910, or 27.1 per cent. In 1900 the products included chewing and smoking tobacco and snuff, valued at $5,752,853; cigars and cigarettes, valued at $11,239,824; and stemmed and rehandled tobacco, valued at $3,839,952. The manufacture is carried on most largely at Cincinnati. The southwestern part of Ohio and the north central part of Kentucky, immediately opposite. constitute one of the largest tobacco-growing regions in the United States. Tobacco manufacturing was probably carried on in Ohio before the year 1810, a tobacconist having reported in 1832 that he had been manufacturing at Cincinnati by steam power for five years, and by horsepower for twenty years previously.[8]

There were 2,054 establishments engaged in the manufacture of lumber and timber products in 1900, with 8,539 wage-earners, and products valued at $20,790,854. In 1890 there were 1,461 establishments, 11,727 wage-earners, and products valued at $15,279,843. The increase in the value of products during the decade was $5,511,011, or 36.1 per cent. The characteristic product of the Ohio mills is hard-wood lumber, more than half of which consists of white oak. The small quantities of white and Norway pine lumber manufactured in the state were reported from points along the Lake Erie shore, particularly from Cleveland and Toledo. Cincinnati was the point of greatest production in the state during the census year, the 6 mills reported turning out products, consisting mainly of oak and poplar lumber and veneers, valued at $2,044,650. The total quantity of lumber sawed in the state during the census year was 990,497,000 feet, board measure. The industry was naturally one of the earliest in the history of the state, and its growth has been steady during the half century. Lumber and staves were sent to New Orleans as early as 1803,[5] and in 1815 a steam sawmill was in operation at Cincinnati.[9]

There were 71 establishments engaged in slaughtering and meat packing in 1900, with 1,765 wage-earners, and products valued at $20,660,780. In 1890 there were 138 establishments, 1,346 wage-earners, and products valued at $17,012,198. The increase in the value of products during the decade was $3,648,582, or 21.4 per cent. Cincinnati has always been the chief center of this industry. In 1900 the production of this city was valued at $10,370,177, or 50.2 per cent of the total for the state, Cleveland ranking second, with products valued at $7,514,470. The earliest packing houses were flat boats on the Ohio River,

and in 1803 beef and pork were shipped from Cincinnati to New Orleans.[1] The pioneer establishment of the western packing industry, as now understood, was founded at Cincinnati in 1818, by Elisha Mills.[2] In 1833, 85,000 hogs were packed for the market, and in 1851 the number had increased to 324,529. Between 1842 and 1852 Cincinnati packed 27 per cent of the hogs packed in the United States, and was the first city to receive the sobriquet of Porkopolis on this account. Its preeminence was due to its shipping facilities and to its location close to the junction of Ohio, Kentucky, and Indiana, the three largest hog-raising states in the United States at that time.[3] Since 1861 the center of corn production has moved westward, and Chicago, Kansas City, and Omaha have taken from Cincinnati its early precedence in this industry. Prior to 1872 meat packing in Cincinnati was confined to the winter months. In that year, by means of artificial refrigeration, summer packing was made possible, and the inevitable decline in the industry at Cincinnati was delayed until 1879.

Closely allied to slaughtering and meat packing is the manufacture of soap and candles. There were 55 establishments engaged in this manufacture in 1900, with 1,427 wage-earners, and products valued at $8,150,069. In 1890 there were 49 establishments, 1,013 wage-earners, and products valued at $5,746,660. The increase in the value of products during the decade was $2,403,409, or 41.8 per cent. Over 2,500,000 pounds of candles and over 15,000,000 pounds of soap were made at Cincinnati in 1851.[4]

There were 1,253 establishments engaged in printing and publishing in 1900, with 11,021 wage-earners, and products valued at $20,391,868. In 1890 there were 987 establishments, 9,026 wage-earners, and products valued at $17,188,851. The increase in the value of products during the decade was $3,203,017, or 18.6 per cent. These products included the printing and publishing of newspapers and periodicals, valued at $12,189,640; book and job printing, valued at $7,941,570; and the printing and publishing of music, valued at $260,658. This industry is centered largely in the city of Cincinnati, which has for a long time taken high rank in the publishing of school books and music. A newspaper was published at Cincinnati as early as 1793.[5]

There were 81 establishments engaged in the factory manufacture of boots and shoes in 1900, with 12,718 wage-earners, and products valued at $17,920,854. In 1890 there were 63 establishments, 5,743 wage-earners, and products valued at $8,489,728. The increase in the value of products during the decade was $9,431,126, or 111.1 per cent. These products included women's shoes valued at $12,096,360, and misses' and children's shoes valued at $3,272,732. Ohio has always been the largest boot and shoe manufacturing state west of the Allegheny Mountains, ranking fourth in this industry in 1900. In 1851 there were 5 shoe factories in Cincinnati,[6] and in 1900 this city ranked third in the United States in the manufacture of women's and children's shoes. Columbus and Portsmouth were also important centers. The industry is favored by the large western market and by the local production of leather.

There were 539 establishments engaged in the factory manufacture of men's clothing in 1900, with 6,521 wage-earners, and products valued at $16,593,824. In 1890 there were 508 establishments, 15,210 wage-earners, and products valued at $20,604,134. The decrease in the value of products during the decade was $4,010,310, or 19.5 per cent. Allied to this industry is the factory manufacture of women's clothing, with 126 establishments in 1900, 4,817 wage-earners, and products valued at $7,772,771. In 1890 there were 31 establishments, 2,546 wage-earners, and products valued at $4,352,098. The increase in the value of products during the decade was $3,420,673, or 78.6 per cent. The greater part of the clothing manufacture of Ohio has always been carried on in Cincinnati. In 1832 a tailor in that city employed 6 men and 8 women, and had begun to make clothing for the outside market.[7] The factory manufacture of men's clothing advanced rapidly until 1880; there was only a slight gain during the next decade, and a decline between 1890 and 1900. In addition to the 813 wage-earners employed in the shops of Cincinnati in 1841, nearly 4,000 women were engaged in this industry at their homes.[8] The products of these factories found a market in all the states of the South and West. In 1894 much of the manufacturing was still carried on at the homes of the workers in Cincinnati and the neighboring towns, and in the cities of Covington and Newport in Kentucky.[9] The factory manufacture of women's clothing has developed recently, alongside the factory manufacture of men's clothing, and its advance has been continuous. In 1900 the value of products in Cleveland was $4,213,248, compared with $2,074,805 in Cincinnati.

There were 543 establishments engaged in the manufacture of carriages and wagons in 1900, with 7,274 wage-earners, and products valued at $15,919,173. In 1890 there were 709 establishments, 9,493 wage-earners, and products valued at $18,777,866. The decrease in the value of products during the decade was $2,858,693, or 15.2 per cent. These products included family and pleasure carriages valued at $11,271,303, business and farm wagons valued at $2,576,867, and automobiles and other horseless conveyances valued at $147,000. Ohio ranked first in this industry in 1900.

Closely allied to the manufacture of carriages and wagons

is the manufacture of carriage and wagon materials. There were 109 establishments engaged in this industry in 1900, with 4,529 wage-earners, and products valued at $7,186,271. In 1890 there were 99 establishments, 2,697 wage-earners, and products valued at $4,310,607. The increase in the value of products during the decade was $2,875,664, or 66.7 per cent. These products included carriage and wagon bodies, wheels, spokes, and other parts. These two branches of the industry were carried on most extensively at Cincinnati and Columbus, lighter vehicles being made a specialty. Their importance is due in a large measure to the abundance of hard-wood timber and leather. Carriage manufacturing was one of the early industries of Cincinnati. It is recorded that the first steel-spring gig ever seen in that city was manufactured there in 1825.[1] In 1851, 24 factories were in operation in Cincinnati.[2]

There were 78 establishments engaged in the manufacture of agricultural implements in 1900, with 6,852 wage-earners, and products valued at $13,975,268. In 1890 there were 106 establishments, 7,701 wage-earners, and products valued at $14,333,258. The decrease in the value of products during the decade was $357,990, or 2.5 per cent. Ohio ranked first in this industry in 1880, and second in 1890 and 1900. Plow making was carried on in a crude manner in Cincinnati as early as 1813,[1] and in 1832 an establishment in Columbus manufactured 1,500 plows per annum.[3] The preeminence of the state in agriculture created an extensive market in the middle of the century, while the forests of hard wood and the local or nearby manufactures of iron furnished abundant supplies of the chief materials. What has grown to be one of the largest factories of its kind in the United States was established at Springfield in 1854. Important centers in 1900 were Springfield, Dayton, Canton, and Akron. Each year whole train loads of these products leave Springfield for the West and Northwest, and for Eastern ports to be shipped to Russia, Australia, and other grain-growing countries.

There were 91 establishments engaged in car construction and general shop work of steam railroad companies in 1900, with 11,534 wage-earners, and products valued at $12,975,182. In 1890 there were 64 establishments, 7,397 wage-earners, and products valued at $8,096,905. The increase in the value of products during the decade was $4,878,277, or 60.2 per cent. The industry is centered in the cities of Columbus, Cleveland, Dennison, and Toledo. In addition to repairing, which constituted the greater part of the work of these establishments, 9 passenger cars and 1,334 freight cars were built during the census year.

There were 248 establishments engaged in the manufacture of pottery, terra cotta, and fire-clay products in 1900, with 11,870 wage-earners, and products valued at $11,851,225. In 1890 there were 125 establishments, 4,606 wage-earners, and products valued at $5,047,501. The increase in the value of products during the decade was $6,803,724, or 134.8 per cent. The pottery products were valued at $6,994,805, and the terra cotta, fire and other clay products at $4,843,615. Ohio rose from second to first rank in this industry between 1890 and 1900. In the latter year the total value of its pottery, terra cotta, and fire-clay products constituted 26.8 per cent of the total for the United States. The rank of Ohio in this industry is due very largely to the development of its extensive deposits of suitable clays.[4] The value of special technical training in this line is appreciated, and a department of ceramics was established in the State University at Columbus in 1894.[5]

The manufacture of white ware, the most important of the several branches of the industry, is carried on chiefly in the city of East Liverpool, on the Ohio River, in the eastern part of the state. This city is unique in the United States in that its industrial activity is confined almost entirely to the manufacture of pottery. Of the 4,473 wage-earners employed in all industries in this city in 1900, 3,908, or 87.4 per cent, were employed in the pottery manufacture. The manufacture of yellow ware has been carried on at this point since 1839, but the manufacture of white ware, begun in 1872, has become the more important branch of the industry. In 1900 the white granite ware and semivitreous porcelain manufactured in East Liverpool were valued at $2,808,445, or 49.1 per cent of the total for the United States. The manufacture of white ware does not have the advantages of suitable clays near at hand, the kaolin and other fine clays used for the manufacture of china and porcelain being brought from a considerable distance. The remarkable development of the manufacture in East Liverpool, between 1872 and 1892, was due chiefly to the supply of specially skilled labor which had been attracted to that point from English pottery centers, in order to engage in the manufacture of coarser wares.

Zanesville, Roseville, and Akron have always been important centers for the manufacture of yellow and earthen ware, the industry in the early years of the century being carried on chiefly by farmers, who made use of the clays found in abundance on their lands. Products were sent down the Muskingum to markets on the Ohio River, and even to New Orleans. In recent years, however, the farmer-potter has been driven from the field by the concentration which has followed the introduction of improved machinery. Art tiling is manufactured extensively at Zanesville, and since 1880 Cincinnati has been an important center for the manufacture of art pottery. Ohio manufactures more than one-third of the sewer pipe made in the United States. There are large factories at and near Akron, and for many miles along the Ohio River. The manufacture was begun in the state in 1848, and considerable quantities of pipe are exported.

Allied to the manufacture of pottery is the manufacture of brick and tile, the statistics of which are shown in

[1] History of Cincinnati, page 324.
[2] Cincinnati in 1851, page 183.
[3] Documents Relative to Manufactures, supra cit., page 862.
[4] Report of the Geological Survey of Ohio, Vol. V, page 643 ff.
[5] Report of the Ohio Bureau of Labor Statistics, 1895, page 9 ff.

Table 7. The products for the year 1900 were valued at $4,629,587. This industry is carried on in Ohio, not chiefly for the supply of local building needs, as in most other states, but for the general market. Vitrified paving brick is made in large quantities at Zanesville and Canton and sent into many other states. Pressed brick is also an important product in Zanesville. The first pressed brick manufactured west of the Ohio River was made in that city in 1861.

There were 354 establishments engaged in the manufacture of planing mill products in 1900, with 4,696 wage-earners, and products valued at $11,066,671. In 1890 there were 335 establishments, 5,356 wage-earners, and products valued at $12,910,538. The decrease in the value of products during the decade was $1,843,867, or 14.3 per cent.

There were 165 establishments engaged in the factory manufacture of furniture in 1900, with 6,723 wage-earners, and products valued at $9,514,764. In 1890 there were 215 establishments, 7,076 wage-earners, and products valued at $9,988,129. The decrease in the value of products during the decade was $473,365, or 4.7 per cent. This industry began at an early date in Ohio, the manufacture of desks, escritoires, and veneered tables being advertised in a local newspaper in 1800, and in 1815 mahogany was brought from Central America to be manufactured into tables, chairs, and bureaus at Cincinnati.[1] The manufacture was carried on largely during the census year at Cincinnati and Cleveland. The first-named city is an important market for the hard-wood lumber of Kentucky, Tennessee, and West Virginia, and the furniture manufactured is shipped throughout the middle West, and exported.[2]

There were 9 establishments engaged in the refining of petroleum in 1900, with 1,008 wage-earners, and products valued at $8,396,977. In 1890 there were 15 establishments, 1,976 wage-earners, and products valued at $16,343,493. The decrease in the value of products during the decade was $7,946,516, or 48.6 per cent. In 1899 the wells of Ohio produced more petroleum than those of any other state, the greater part of which was shipped, or piped, to refineries in other states.[3] In 1900 Ohio ranked fifth in the refining industry, Lima, Cleveland, and Toledo being the principal centers.

There were 19 establishments engaged in the manufacture of rubber and elastic goods in 1900, with 3,505 wage-earners, and products valued at $7,330,104. In 1890 there were 7 establishments, 658 wage-earners, and products valued at $1,486,777. The increase in the value of products during the decade was $5,843,327, or 393 per cent. Rubber and elastic goods valued at $5,524,674, or 75.4 per cent of the total for the state, were reported for Akron, this city being one of the most important centers of the industry in the United States.

There were 31 establishments engaged in the manufacture of food preparations in 1900, with 1,100 wage-earners, and products valued at $7,166,532. In 1890 there were 35 establishments, 270 wage-earners, and products valued at $1,029,842. The increase in the value of products during the decade was $6,136,690, or 595.9 per cent.

There were 51 establishments engaged in the manufacture of paper and wood pulp in 1900, with 3,184 wage-earners, and products valued at $6,543,513. In 1890 there were 50 establishments, 2,921 wage-earners, and products valued at $7,209,750. The decrease in the value of products during the decade was $666,237, or 9.2 per cent. These products included manila paper valued at $1,368,700, book paper valued at $942,642, and strawboard valued at $800,038. The industry is carried on largely in Butler, Montgomery, and Warren counties. The first mill in Ohio was built in 1805 on Little Beaver Creek, in the eastern part of the state,[4] and in 1832 there were 8 paper factories in operation at and above Cincinnati, for the supply of the book and news printing industry of that city.[5]

There were 64 establishments engaged in the manufacture of electrical apparatus and supplies in 1900, with 3,773 wage-earners, and products valued at $6,504,847. In 1890 there were 11 establishments, 348 wage-earners, and products valued at $604,780. The increase in the value of products during the decade was $5,900,067, or 975.6 per cent. One of the largest plants in the world for the manufacture of carbon points for arc lights is located at Cleveland.[6]

There were 26 establishments engaged in the roasting and grinding of coffee and spice in 1900, with 678 wage-earners, and products valued at $5,849,644. In 1890 there were 32 establishments, 488 wage-earners, and products valued at $7,806,763. The decrease in the value of products during the decade was $1,957,119, or 25.1 per cent.

There were 58 establishments engaged in the tanning, currying, and finishing of leather in 1900, with 1,384 wage-earners, and products valued at $5,182,065. In 1890 there were 113 establishments, 1,447 wage-earners, and products valued at $6,701,670. The decrease in the value of products during the decade was $1,519,605, or 22.7 per cent. The most extensive operations were at Cincinnati. There were 6 tanneries in that city in 1815,[7] and large quantities of Ohio leather were shipped to New York in 1847, the greater part of which was exported to England.[8] The value of products increased between 1850 and 1880, but has decreased since that year. The industry has been

favored until recently by the abundance of oak bark available for tanning purposes.

There were 28 establishments engaged in the manufacture of glass in 1900, with 4,546 wage-earners, and products valued at $4,547,083. In 1890 there were 59 establishments, 6,435 wage-earners, and products valued at $5,649,182. The decrease in the value of products during the decade was $1,102,099, or 19.5 per cent. These products included tableware valued at $668,469; beer, soda, and mineral water bottles valued at $637,428; and lamp chimneys valued at $622,721. In 1815 a glass factory was built at Cincinnati, and at the census of 1820 window glass and hollow ware were shown among the manufactures of that city. In 1831 a window-glass works was reported at Zanesville, and another at Moscow.[1] The industry first became of importance in Ohio between 1880 and 1890, in consequence of the use of natural gas, and declined somewhat between 1890 and 1900, because of the removal of many factories to the Indiana gas region. Oil, also, was used as a fuel to some extent during the census year, the cost of natural gas and oil amounting to $142,515, or 57.1 per cent of the total cost of fuel used in the industry. Since the introduction of natural gas as a fuel in glass works at Findlay, in 1884, there has been a continual change in the distribution of the industry in the state, factories moving rapidly from one locality to another as the earlier gas fields became exhausted and new fields were opened up.[2] The industry was largely carried on in 1900 in Belmont, Lucas, and Licking counties.

In addition to the industries included in Table 3, attention is directed to two other industries, the statistics of which are shown in Table 7. There were 5 establishments engaged in the manufacture of cash registers in 1900, with products valued at $5,414,711. The city of Dayton is one of the chief centers for this manufacture in the United States, the value of its products being $4,927,261, or 91 per cent of the total for the state. There were 20 establishments engaged, in 1900, in the manufacture of grindstones, with products valued at $906,459. The importance of this industry is due to the existence, in the vicinity of Cleveland, of a superior variety of sandstone known as the "Berea grit." By far the greater part of the grindstones manufactured in the United States are made in Ohio, and considerable quantities are exported.

URBAN MANUFACTURES.

Table 4 shows the totals for the manufacturing and mechanical industries of the cities of Akron, Canton, Cincinnati, Cleveland, Columbus, Dayton, Springfield, Toledo, Youngstown, and Zanesville, as returned at the censuses of 1890 and 1900, with the percentages of increase.

[1] Tenth Census of the United States, Manufactures, folio 1135.

[2] Testimony of the Ohio State Geologist, supra cit.

TABLE 4.—COMPARATIVE SUMMARY, AKRON, CANTON, CINCINNATI, CLEVELAND, COLUMBUS, DAYTON, SPRINGFIELD, TOLEDO, YOUNGSTOWN, AND ZANESVILLE, 1890 AND 1900, WITH PER CENT OF INCREASE.

	Year.	Number of establishments.	Capital.	Wage-earners. Average number.	Wage-earners. Total wages.	Miscellaneous expenses.	Cost of materials used.	Value of products, including custom work and repairing.
The State	1900	32,398	$605,792,266	345,869	$153,955,330	$69,728,206	$447,849,677	$832,438,118

Per cent of 10 cities to total for state	1900	39.8	59.9	59.9	61.3	72.1	58.1	60.2
	1890	49.5	66.7	64.6	68.6	73.4	65.3	67.4

[1] Decrease.

It appears from Table 4 that there has been a considerable increase during the past decade in the combined manufactures of these 10 cities. The average number of wage-earners increased from 189,134 to 207,244, or 9.6 per cent, and the value of products from $432,203,987 to $501,309,177, or 16 per cent, but the number of establishments decreased from 14,206 to 12,905, or 9.2 per cent. The percentage of increase in the average number of wage-earners and in the value of products was smaller in these cities than in the state as a whole. The city of Youngstown shows the most rapid growth, the value of products having increased from $14,667,260 to $34,801,101, or 137.3 per cent. In Cincinnati, the leading manufacturing city in the state, the number of establishments decreased from 7,832 to 5,127, or 34.5 per cent; the average number of wage-earners from 84,167 to 63,240, or 24.9 per cent; and the value of products from $196,063,983 to $157,806,834, or 19.5 per cent. The number of establishments, number of wage-earners, and value of products, in this city in 1900, constituted 15.8, 18.3, and 19 per cent, respectively, of the totals for the state.

The value of products manufactured in the cities of Cincinnati and Cleveland amounted in 1880 to $153,859,215 and in 1900 to $297,656,640, constituting 44.2 and 35.8 per cent, respectively, of the totals for the state. There has been a noteworthy change in the relative positions of these cities during the century. Cincinnati was founded first, and developed early as a manufacturing city. In 1840 the capital invested in manufactures in this city was $7,469,912, compared with $128,632 in the city of Cleveland. During the first half of the century, the latter was chiefly a commercial center, but its development since 1860 as a manufacturing center has been rapid. The value of its products in 1900, $139,849,806, was almost equal to that of Cincinnati, $157,806,834.

The leading manufacturing industries of Cincinnati, in the order of their importance, were clothing, men's, factory product; foundry and machine shop products; slaughtering and meat packing; liquors, distilled; boots and shoes, factory product; liquors, malt; carriages and wagons; tobacco, cigars and cigarettes; and furniture, factory product.

In Cleveland, the city second in rank, the leading manufacturing industries were iron and steel; foundry and machine shop products; slaughtering and meat packing; clothing, women's, factory product; liquors, malt; clothing, men's, factory product; electrical apparatus and supplies; shipbuilding, iron and steel; petroleum, refining; bridges; and iron and steel, bolts, nuts, washers, and rivets.

In Columbus, the city third in rank, the leading manufacturing industries were iron and steel; foundry and machine shop products; boots and shoes, factory product; cars and general shop construction and repairs by steam railroad companies; carriages and wagons; liquors, malt; patent medicines and compounds; and oleomargarine.

In Toledo, the city fourth in rank, the leading manufacturing industries were flouring and grist mill products; coffee and spice, roasting and grinding; foundry and machine shop products; bicycles and tricycles; liquors, malt; petroleum, refining; lumber and timber products; and oil, linseed.

In Dayton, the city fifth in rank, the leading manufacturing industries were foundry and machine shop products; cash registers; cars, steam railroad, not including operations of railroad companies; tobacco, cigars and cigarettes; agricultural implements; slaughtering and meat packing; sewing machines and attachments; tobacco, stemming and rehandling; and liquors, malt.

In Youngstown, the city sixth in rank, the leading manufacturing industries were iron and steel; foundry and machine shop products; iron and steel pipe, wrought; and lumber, planing mill products.

In Akron, the city seventh in rank, the leading manufacturing industries were food preparations; rubber and elastic goods; foundry and machine shop products; printing and publishing, book and job; agricultural implements; pottery, terra cotta, and fire-clay products; oilcloth, enameled; and flouring and grist mill products.

In Springfield, the city eighth in rank, the leading manufacturing industries were agricultural implements; foundry and machine shop products; and printing and publishing, newspapers and periodicals.

In Canton, the city ninth in rank, the leading manufac-

turing industries were agricultural implements; ironwork, architectural and ornamental; iron and steel; watch cases; and foundry and machine shop products.

In Zanesville, which ranks tenth in Table 4, but which is the city fifteenth in rank in the state, the leading manufacturing industries were pottery, terra cotta, and fire-clay products; soap and candles; agricultural implements; and iron and steel.

Table 5 presents the totals for the manufacturing industries of the 101 cities and villages withdrawn from the enumerators, places them in comparison with the totals for the entire state and the state exclusive of these cities and villages, and shows their rank in population and in value of products.

[1] Less than one-tenth of 1 per cent.

Of the 32,398 establishments in the state, 21,005, or 64.8 per cent, were located in these 101 cities and villages. They furnished employment to 302,176 wage-earners, or 87.4 per cent of the total number, and the value of their products, $719,792,803, formed 86.5 per cent of the total for the state.

Table 6 shows the totals for the state by counties.

Table 7 shows the totals for the state by specified industries.

Table 8 shows the totals for the cities of Akron, Canton, Cincinnati, Cleveland, Columbus, Dayton, Hamilton, Lima, Springfield, Toledo, Youngstown, and Zanesville by specified industries.

Table 9 shows the totals for all industries in the cities and villages withdrawn from the enumerators, exclusive of those shown in Table 8.

TABLE 6.—MANUFACTURES
